Dedication

Dedicated to our sons, Adam & Darren, who learned how to interact, RUN, PEEK and POKE from the computer.

Introduction

Would you like to put a little more excitement in your life? You can become a private eye and solve all kinds of mysteries while using the computer.

Don't worry if you are not sure about some of the things you will be doing. **THE MYSTERY AND ADVENTURE COMPUTER STORYBOOK** will show you step-by-step how to enter the programs onto your computer and help solve a mystery or follow an adventure.

THE MYSTERY AND ADVENTURE COMPUTER STORYBOOK contains twenty-two stories. Within each story there are computer programs. You will be asked to type the programs into your computer and then answer some questions. The computer will "talk back" and respond to your answers. Many of the computer's answers will surprise and amuse you.

We hope that you have lots of fun with **THE MYSTERY AND ADVENTURE COMPUTER STORYBOOK**.

Instructions

THE MYSTERY AND ADVENTURE COMPUTER STORY-BOOK contains over 50 programs to play on your computer. They are written in BASIC language for the Timex Sinclair 1000, ZX 81, Apple, Commodore, Atari, TRS-80 and all other microcomputers.

Although the programs are all written in BASIC language, each company's microcomputer has features or differences in its BASIC language, which makes programming different from the others. The computer programs have been created to work on all popular microcomputers.

When you type

1. Type the lines exactly as they appear in the program.
2. At the end of each line press RETURN or ENTER.
3. After you type in the complete program, type RUN.
4. If something does not seem right, check your computer manual.

5. If you have a Timex, you'll notice that there is no apostrophe on your keyboard. So, when you see one in a program just leave a space.

INVERSE LETTERING

Inverse lettering or reverse lettering is that special black background that appears in a program. Each computer has a different way of using inverse lettering.

For Atari, press the Atari logo key.

For Commodore, hold down CTRL and press 9.

For TRS-80 go into the P mode and change the background color.

For Apple, type a line number and then the word INVERSE. After you are done with the INVERSE line, type a line number and NORMAL on the following line.

EXPERIMENT

Once you have mastered the programs, you may want to try a program of your own. That is a good idea. Depending on your computer, you can try lots of interesting things. You may even try colors and sounds.

Good luck and happy computing.

21.	Who Did It?	107
22.	The Missing Camp Counselor	112

The Needle and Haystack Club

You are the new kid on the block. You want to make friends with your neighbors—Bonnie, Alice, A.J., Evan and Sarelle.

“You always look as if you are having fun,” you say. “May I join in?”

The kids look you up and down. They look at each other.

“Well, maybe,” says Evan. “But first you have to prove that you are smart.”

“We are the Needle and Haystack Club,” says Bonnie. “We specialize in finding lost things—and lost people.”

“All right,” you say. “Who or what is missing? Give me a chance to play detective!”

“Come back tomorrow, same time, same place, and we’ll have a puzzle for you to solve,” says A.J.

“Okay, here’s the problem,” says Alice, the next day. “Sarelle

2 • MYSTERY AND ADVENTURE

Martin is hiding in one of our houses. You have to find her. We'll give you some clues. See how fast you can move!"

Alice gives you a map showing where Sarelle's four friends live.

Type in the program and see where they live.

RUN

And now you are off and running!

You decide to go to A.J.'s house first.

"I am looking for Sarelle," you say.

"Sorry, I can't help you," says A.J. He seems to be in an awful hurry.

But before he slams the door, you notice that there's a suitcase right beside him. The initials on the suitcase are "S.N."

"H'm," you say. "Very suspicious behavior."

4 • MYSTERY AND ADVENTURE

Next you try Evan's house.

Evan's mother has just given him a haircut and his shoulders are covered with black hair.

"Where is Sarelle?" you say.

Evan shakes his head. "All I know is she slipped this letter in my mailbox the other day. It was raining and the paper got wet and smeary. See if you can read it," says Evan.

RUN

```

"RED HEAD," you say. "Evan has black hair. Why has he written RED HEAD, and where is his telephone number?" You hurry to the next stop, Alice's house.

"I am looking for Sarelle," you say.

"Oh, I can help you," says Alice. "The other day, we both wore our matching blue coats and red gloves to school. By mistake, we got them mixed up."

"The next day, when I put on a glove, I found this note squashed inside it. It's so tiny and creased I can't read it!"

Alice gives you the note.

"H'm, very interesting," you say. "I can read this note all right."

Type in this program to find out what the note said. The paper is exactly the same size as you see on the screen. The paper has no wrinkles.

NEW

The Great Crespo

About fifty years ago most people knew about The Great Crespo. Crespo thrilled millions of people with unusual body-building exercises. Exhibitions by Crespo were world famous. When it came to body-building competitions, The great Crespo collected more top awards and trophies than any other body builder in history.

Fame and fortune seemed glamorous, but Crespo's family life was a failure. There had been one marriage. It ended in divorce. One baby, a son, was born during the marriage, but Crespo never saw the child after the marriage ended. There was so much travel, fame and fortune in Crespo's life that there was no time for family.

Now, nearly fifty years later, Crespo is lonely. Few people recall The Great Crespo. Young people have never seen the exhibitions. Now Crespo regrets not having a family life. Would it be possible to find the only child?

Crespo picks up the telephone and speaks to a young lawyer. The

lawyer has never heard of the body builder, but agrees to help. After settling on a fee, the lawyer has these posters displayed on billboards around the country. Type in the program to read the message.

```

RUN

Now the lawyer's problems begin. Hundreds of men come to his office, claiming to be Crespo's son and asking for the large reward.

Crespo had told the lawyer that the son would be almost fifty years old, but couldn't remember the son's date of birth, eye color, or hair color.

Crespo knew the child's first name was originally Samson, but the first name had been changed before the child went to school. No one could find any records showing the name change.

The lawyer did as much investigating as he could. He narrowed

down the list to four people who could possibly be Crespo's son. Now the lawyer suggested that The Great Crespo interview the men individually. This is the list of names The Great Crespo was given, along with the lawyer's notes:

Name	Age	Eye Color	Occupation
Robert Crespo	51	Brown	Accountant
Pat Crespo	50	Blue	Painter
Frank Crop	49	Blue	House Builder
Sam Crespo	49	Brown	Body Builder

With only one glance at the list, Crespo knew that only one man on the list could be the missing son. Who do you think it is? Type in the program to see if you are right.

The Lost Coat

Joe Fine has owned FINE CLEANERS for years. Everyone knows that he is a perfectionist when it comes to business. In the past ten years, only two garments have been damaged, and one lost. Each time Joe Fine paid his customers for the mistakes. Joe Fine's reputation is important to him.

Today a young man enters the store. Joe Fine has seen him before. He remembers having cleaned something for him. Type in the program to see what item Joe remembers.

The Mailman

It is a bitterly cold winter afternoon when Gladys Milman telephones you to ask for help. Her dog, Mandy, has been accused of biting the new mailman. Gladys is very upset because the mailman is threatening to sue her.

"I don't understand it," says Gladys. "Mandy barks a lot. But she would never bite anyone."

At the police station the Chief asks the mailman to sketch the scene of the accident. This is what the mailman drew. Type in the program, then return to the story.

"I'm going to sue Gladys Milman. She shouldn't allow her dog to run loose. Who knows how many other people have been bitten?" says the mailman. "I was just doing my job. I could have been killed by that vicious dog. The dog must be tied up."

"Did you have a doctor look at your wound?" asks the police chief.

"No," says the mailman. "I came right here to report the accident. I want to make sure that the lady and her dog don't get away with such behavior."

"Did you go home to change your clothes or apply medication to the wound?" asks the Chief. He can see no sign of a wound on the mailman.

"Of course not," says the mailman. "Look at this bite!" Would you go home and change your clothes with a bite like this?" He rolls up the pant leg of his neatly pressed uniform. The Chief sees a nasty-looking wound below the man's right knee.

Now the mailman looks the Chief squarely in the eye and says,

"Can't you see what a terrible bite this is? Why do you look at me as if you thought I'd done something wrong?"

"I'm not sure you didn't," says the Chief.

Type in the program to find out why the Chief didn't believe the mailman.

The Case of The Missing Horse

Nobody in town likes Frank Bridges. Almost anybody might have stolen his horse, Samantha, just to teach Frank Bridges a lesson for being so mean. But Frank Bridges insists that the prankster must be one of three people: Ray Raines, Jim Fowler, or Susan Simmons. All three pass by his farm regularly and know his habits. Type in the program to find out their location.

Before you set off to question the suspects, Frank Bridges gives you a description of his missing horse.

Jim Fowler is a garden and pet supply salesman. A neatly trimmed lawn surrounds Jim's house. The only horse you see here is a ceramic statue of a jockey on a white horse. It rests beside the front door. At the rear of the house you can see a large garage that has three locks. Shades are pulled over the window. There are blotches of oil in the driveway.

Jim Fowler lets you in. "Yes, I did like Frank's horse, but I would never steal it. I'm no thief," says Fowler. "Someone probably felt sorry for the poor horse who had to live with that Bridges creep. Anyone could give it a better home."

It's a long walk down the road to the Simmons' house, so you decide to stop on the way and take a look at Frank Bridges's description of the missing horse. Type in the program.

Outside the Simmons' house you see deep prints in the ground. They could have been made by a horse. A large bale of hay is against the barn door. You know that Susan Simmons had once worked for Frank Bridges. She quit after they had a disagreement about the handling of one of Frank's horses.

"I hope you don't mind if I ask you a few questions. I'm trying to find Frank Bridges's horse, Samantha. He thinks you may know something about the disappearance," you tell her.

"Why me?" says Susan, surprised. "I haven't seen that miserable man in almost three months."

"I understand that you didn't leave the job on good terms. Is that right?" you say.

"Right," she answers. "He was constantly telling me what to do and what not to do. I told him to find another trainer to boss around."

"I noticed that you have a bale of hay near the barn. Do you own a horse?" you ask.

"No, I don't own one, but I'm training a horse for someone else," says Susan. "My assistant is out riding it now."

Ray Raines lives on a ranch that has a path leading up to the house. A series of three fresh, deep prints and one not-too-deep one are on the path. On the right side of the path the grass has been

cropped in an irregular pattern. Some blades are higher than others. On the left side, the grass hasn't been cropped at all and the blades are all the same length.

Raines answers the door in a pleasant manner, but when you mention Frank Bridges's name, he gets angry. You tell him about the missing horse. "I haven't seen Bridges in almost six months, and I'd like to keep it that way. I made him a saddle for his horse, Samantha, but he didn't appreciate my fine work. That man doesn't know how to take care of anything," says Raines.

Although you haven't seen any horse, you know who took Frank Bridges's horse. Can you guess who has Samantha?

Type in the program.

```

You have heard he is dangerous. Just the thought of him sends shivers up your spine. As you hurry on in the dark, you glance at each person that passes.

Now the street is deserted. Suddenly you hear a tap, tap, tapping behind you. You look over your shoulder. You see the shape of a huge man carrying something in his hand. You walk faster.

As you continue on your way, you sense that someone is still behind you. You decide to cross to the other side of the street. The Tapper does the same thing as you do.

All kinds of frightening thoughts pass through your mind as you try to lose the stranger. You hope you'll see a police officer, but there's no one in sight. All the stores are closed. The streets are deserted. You wish you hadn't stayed so long at the arcade.

You sneak alongside parked cars and quickly scamper across the street again. You pause to catch your breath. You hear a sound. Could it be raindrops falling on the cars? No. It isn't raining. You listen to the tap, tap, tapping as it gets louder. The sound is coming closer.

You feel trapped and look around for an escape. This is the only thing you see.

Type in the program and then return to the book.

```

Racing toward it, you run up the steps. It feels good to be out of the street. With long strides you rush up to the first floor. It seems as if the building is deserted. You hope the stranger doesn't follow you.

But once again you hear the tapping sound, this time on the stairs.

Quickly you run up to the next floor. But you can still hear the tapping sound following you.

You are terrified. You climb up to the top floor and onto the roof. Closing the roof door behind you, you wait. Minutes pass, and there is no tapping. He's left, you think, with a sigh of relief.

Suddenly the roof door bursts open. The terrifying tapping starts again. You watch in horror as a large, shadowy form roams across the roof. You know that you'll be discovered in a matter of seconds, for there's nowhere to run to.

Now the tapping is so close that you can hear the man's heavy breathing. Your back is pressed against the edge of the roof. As the man gets within reach, you make a grab for his cane and hold on tightly.

"Give it back!" he says.

"What are you going to do with it?" you say, shivering with terror.

"It's going to rain! Give me back my umbrella!" he says.

"Your umbrella!" you gasp. "Why are you carrying an umbrella?"

"I always carry an umbrella," says the man. "It keeps off the rain."

"But it isn't raining," you say.

"Exactly," says the man triumphantly. It *never* rains when I carry an umbrella!"

The man takes the umbrella from you.

Type in the program to see what he says next.

A Day At The Beach

Yesterday you read an article about your town's Historical Society in the newspaper. The Historical Society protects and takes care of the very old places in your area-places that help to show what life was like there a long time ago. The newspaper article said that the Society has found an old map in its library. The map is of a beach in your town that used to be an Indian reservation.

Type in the program to see the map:

NEW

```
10 PRINT "-----"

70 PRINT "O  O O      O /W"
80 PRINT "-----"
90 PRINT "O = TEEPEE"
100 PRINT "X = HISTORICAL SPOT"
```

```

110 PRINT "      IN QUESTION"
120 PRINT "W = WATER"
RUN

```

There are lots of reservations in your town. Many roads, beaches and parks there have Indian names. The Historical Society is especially concerned that some of the beaches where the Indians once lived are being ruined by companies who dump their garbage there.

The Historical Society is very excited about the map it just found. What do you think the "X" on the map means? The Society thinks it may mean that some kind of treasure is buried there, because the Indians who lived there did a lot of trading with the settlers who lived nearby. The Indians may have buried the coins and jewelry to keep them safe.

You are doing a report on Indians for your history class at school, so you decide to take your bike and go watch the Historical Society workers digging at the beach. The trouble is, you forgot to take the map from the newspaper. There are three beaches in your town. You decide to check out each one to discover where the workers are. You come to the first beach. Type in the program to see what the sign says:

NEW

```

10 PRINT "-----"

RUN

Congratulations! You have found the Historical Society workers. You walk over to the big hole in the sand they have been digging and ask lots of questions. Suddenly, you notice a bony hand sticking out of the sand. No one seems to understand why you are jumping up and down and yelling. Then they see the hand too. You grab a shovel and help the workers. You have discovered an ancient burial ground!

The report you write on your experiences gets an A and you get a membership from the Historical Society for helping it to discover the burial ground.

The “S-Thief”

Stories about the “S-Thief” have been in all the newspapers. The police have named her “Sylvia, the S-Thief ,” because of descriptions given by the victims. Sylvia is stunning, steals, sometimes uses scissors, and always carries a large switchblade in the back pocket of her jeans, say the reports.

The switchblade has an engraving on it. Type in the program for a closer look.

Some people say the engraving looks like a squared-off "S." Others say it looks like a snake.

The insurance people are angry. They are tired of paying out insurance money to victims of the S-Thief. The insurance company sends you to question the latest of Sylvia's victims.

You notice that Frank Friendly seems annoyed when you ask him yet again for a description of the robber.

"It was definitely Sylvia, the S-Thief," he says. "She was wearing a tight silver shirt and jeans. She walked into my store at about seven o'clock, just as I was getting ready to go to the bank. I had opened the cash register and was putting the money into the bank-deposit bag.

"Suddenly, there she was! She shoved the sharpest scissors I'd ever seen right up to my face. I was scared! When she ordered me to go into that closet, I went right in. She locked the door and I didn't stir until I heard her leave the store. Then I broke open the closet door. I saw that the bank bag was empty, and I called the police." then

"Are you sure the thief was Sylvia?" you ask.

"Of course I'm sure," says Frank. "I saw that switchblade - the one with the snake engraving - it was right there in the back pocket of her jeans. There was no mistaking it!"

Again Frank describes what happened. "From the moments she came into the store, I was too scared to move," he says. "She held those terrible scissors to my head and we were eyeball to eyeball as she forced me into the closet. I didn't budge, even after she'd slammed the door and locked me in."

You examine the closet door and see that it could easily have been locked from the outside. You examine the lock that Frank Friendly had to break to get out of the closet. Still, you have a feeling that something isn't quite right. Suddenly, you know what it is.

Frank Friendly has described something as clearly as a newspaper reporter—but it's something he couldn't possibly have seen! Type in the program to see what that something is.

And you get a silver star from the insurance company for being smart and sensitive.

The Cousin Connection

As you snatch the envelope from the mailbox, you notice the unusual stamp. You see that the stamp and the postmark are from Peru. "Oh good. A letter from Uncle Jake!" you say. Your Uncle Jake is the only person you know who lives in South America.

When Jake sold his business, he took the money to Peru. There he bought a beautiful mansion with seven gardens. His favorite hobby is raising exotic flowers. Occasionally he mails you photographs of flowers with square leaves and blossoms with triangular forms. Many of your friends have admired these photographs of unusual plants.

Quickly you tear open the envelope. There are no photographs inside, and you do not recognize the name at the bottom of the letter. Type in this program to read the letter.

You try to recall the details that Uncle Jake told you about Felix. He is a professional tennis player, but you have never seen Felix. Uncle Jake mentioned him often in letters, but there was never a photograph of him.

To locate Felix, you decide to visit Peru. On the plane you reread Uncle Jake's letters and look at the photographs, hoping to find Felix's address or home town. You uncover no clues.

Looking through telephone books in Peru, you find that there are many people in different cities with the name, Felix Miros. You

are not even sure if your Felix has a telephone.

You decide to place this advertisement in the newspaper. Type in the program to see it.

There must have been at least a hundred phone calls, but you know most of the callers were fakes. They did not know enough about Uncle Jake. Three of the callers sounded as though they might be the real Felix Miros. You have to be sure.

You make appointments to meet each Felix individually.

Felix #1 arrives right on schedule. As you shake his hand, he pulls it back quickly.

"You must forgive me," he says. "I have blisters on my fingers from my last match at Wimbledon. You know, I am a professional tennis player."

Soon he tells you about visiting Uncle Jake at the mansion every week. He moves restlessly around your hotel room. He picks up your photographs of plants and examines them.

"You are very good at trick photography," he says. "How on earth did you manage to reshape the leaves and flowers with a camera lens? Very clever!"

Felix #2 knows a lot about Uncle Jake's passion for gardening.

He peers out of the window. Type in the program to find out what he sees.

The Star Ring

You had a great day at school showing off your new star ring. Everyone said how beautiful it was.

Bill asked to try it on. He slipped it on for just a moment, then gave it back. "That's a fine stone," he said. "Very rare."

Lawrence held the star ring in his palm. He was amazed by its weight. "It must be very valuable," he said.

Richard looked carefully at the ring while it was on your finger. He didn't say anything about it. You could tell he was jealous. When the bell rang, he rushed off to class.

When you got home from school, you took your ring off and placed it star-side up somewhere in your room. Type in the program to see where you put your ring.

The Joyride

You answer your telephone. It's your friend, Bruce. He is calling from the police station. Bruce has been accused of taking Rosie's new sports car for a joyride. The car was stolen from Rosie's garage and found in Bruce's driveway.

At the police station, Bruce says, "I know I said I'd love to get my hands on that car! But I didn't take it. Someone must have stolen it and parked it in my driveway so the police would arrest me."

Rosie shows up at the police station. She is angry.

"Bruce, I never want to see you again," she shouts. "How could you steal a car? My car? I must have been crazy to be a friend of yours. Stealing is just so cheap and tacky, I'm not even going to mention this incident to anyone. I just want to forget I ever met you."

With angry tears in her eyes, she runs out.

You ask Bruce for a rundown on Rosie's friends. He tells you about Sandy and Charlie. "Both of them know about Rosie's car

and where she kept it," says Bruce. "I'd be embarrassed if they found out I'd been arrested for stealing. Rosie is right. It's tacky. Please don't tell them I'm at the police station."

You look at the addresses Bruce has given you and go to Sandy's house first.

You tell Sandy that Rosie's car was stolen from her garage and that Bruce has been arrested for stealing it. You feel that Bruce has been blamed for something he didn't do. Since Sandy and Bruce are friends, you figure it's all right to say that Bruce has been accused and needs help.

"I must admit I like that sports car and would love to drive it," says Sandy. "But I didn't take it. That would be stealing. And even if I did, I wouldn't be stupid enough to park the car in Bruce's driveway."

Charlie seems tense when you question him.

"Bruce and I are not on speaking terms," he says. "We were close friends at one time. But we haven't seen each other for the last three weeks. I don't know anything about him any more."

You question Charlie about the sports car.

"Of course I didn't take it," he says. "Did Rosie say I took it? If she did, she's lying. Just because I'd like to have a car like hers doesn't mean I'd steal it."

Now that you've heard everyone's story, type in the program to figure out who stole the car.

The case certainly seems strange. The two robberies appear similar, but it's unusual for a robber to strike the same place twice. You visit the insurance company. The clerk tells you that the insurance company has paid back insurance money to the owner of the **GOOD AND PLENTY CANDY SHOP** for both robberies.

You have a hunch that the robber will strike again exactly two weeks from the last robbery. On Tuesday, July 2, you decide to stay near the store, hidden behind a telephone booth.

At 11 o'clock a new-looking car pulls up outside the candy store. It is driven by a woman wearing a suit. She looks at her watch. Then she looks around to see if there's anyone in sight. She doesn't see you, but you see her putting on a clown mask. She enters the store and you follow quickly. She talks to the owner. Type in the program to see what she says.

The owner pulls open the cash register drawer and hands her money. She counts the money. You see the store owner remove his glasses from his shirt pocket. He places them on the counter.

Suddenly the robber shouts, "I told you to give me all the money you had—you're holding some back! Now I'm really mad."

The robber pulls out her gun, walks toward the owner, and jabs the gun smack into his chest. The owner tells her to look under the cash register drawer for more money. She grabs the money and pushes you and the owner into the store closet. She slams the door and you hear the latch snap shut.

"We're lucky to be alive," says the store owner.

"I don't think there's any luck involved at all," you say.

Type in the program and review the facts.

A Spectacular View

You shouldn't be there at night, but you are. Quietly you hide behind a wide tree trunk, watching the cleaning squad pick up the day's litter. You wait patiently as they sweep up the area and empty the trash cans. At last the place is spotless and they leave.

Now you can set up your telescope. It's too bad that Paddington Pond Park closes at sunset, since it's the best place for stargazing. Once in a while you sneak in with your telescope for that perfect sight. Quietly you set up your brand-new telescope, anxious to get a spectacular view of the stars.

Suddenly the stillness is shattered by the sound of a car. You hear a crash and see headlights moving toward the pond. You aim the telescope toward the car. Its fenders are badly dented. It must have crashed through the park gate. The car comes to a stop about two feet from the pond. A man gets out, leaving the engine running and the door open.

You can tell from the ornament on the car that it's an expensive

Rolls Royce. The headlights are still on. You can see that the man is puffing on a long, thin cigarette in a silver cigarette holder. The man studies a sign near the pond. Then he walks to the trash can and throws in his cigarette, holder and all. You hear the holder rattle against the metal trash can.

Now the man reaches into the car and does something that you cannot see. He moves to the back of the car and leans against it. Grunting loudly, he pushes the car into the pond. From the edge of the pond he watches as the car sinks beneath the water.

Through the telescope you watch in amazement as the man starts to roll on the ground, scraping his hands against the rough cement surface. Then he rubs the dirt and blood into his hair; finally the man lies still.

You hear police and ambulance sirens. The man is lifted into the ambulance and driven away. The police remain busy at the pond's edge. Quietly you move your telescope and go back behind the tree. You fall asleep. When you wake up the next morning, you find that the park has been sealed off by the police.

You try to sneak under the broken fence, but a security guard grabs you. He threatens to bring you to the police for having been in the park overnight. You explain about your interest in astronomy and show off your new telescope. The guard is kind, and lets you go.

"The park is closed today," he says. There was an accident last night—a Rolls Royce skidded into the pond. They'll be lifting it out today. Plenty of car company people will be swarming around like bees."

The guard goes on to tell you that the driver crashed because his brakes failed. "He was lucky to be able to jump out of the car before it took a dive. He'll sue the company and make a fortune—as soon as he gets out of the hospital."

You know that you must tell the car-company investigator what you saw. "That was no accident," you tell him, explaining what you saw through your telescope.

"I'd really like to believe you," he says. "You could save our company a lot of money. But who is going to believe the story of a kid who was illegally in the park at night? The man's lawyer would

make mincemeat of you in court. If you could only find some evidence to prove your story, I'd be really grateful."

The guard lets you back into the park and you walk toward the pond. Type in the program to see what is in the area.

You look for the company investigator to tell him about the cigarette. Instead you find the accident victim's lawyer. He has heard about your story, and he is angry.

"No judge will believe you," sneers the lawyer. "You made up the story so everyone would forget that you were breaking the law by being in the park after dark."

Now you tell the lawyer about the man's smoking. "How would I know he was a smoker if I didn't really see him?" you say.

"Lots of people smoke," says the lawyer. "You could have seen the man in town and noticed that he was a smoker. That's no evidence at all."

The lawyer walks away.

You wander toward the pond again. Type in the program. See if you can find that vital piece of evidence that will make people believe your story.

The police arrest the man. "The sign said NO SMOKING," whines the man. "And I *always* try to obey the law."

The police are not impressed. They send the man to jail. They warn you not to go in the park again after dark. The car company says you may use their private observatory for an even more spectacular view of the stars.

Stolen Software

You have just received a telephone call from the owner of OUR BYTE COMPUTER STORE. Six hundred boxes of computer software were stolen during last night's robbery. It's your job to investigate at the scene of the robbery.

The store manager tells you that the old locks on the warehouse doors were brittle and could easily be forced.

The saleswoman believes that more than one robber was involved because she saw different sizes of sneaker prints on the floor.

The cashier shows you where the cash register had been cracked open during the robbery. Some heavy tool had been used to break open the machine.

The night watchman describes the strange dream he had about a burglar with a scar on her left cheek and bright red, curly hair.

The janitor tells you that security is poor at the store. He says that a burglar alarm could have prevented the robbery.

The telephone is ringing. It's for you. Type in the program to see who is at the other end of the line.

Dangerous Living

Pinehead Studios is filming a new movie called *Dangerous Living*. It is being made on location in the small town of Fansville. *Dangerous Living* is an action movie, with car-chase scenes and other dangerous stunts. Although the tall, muscular star of the movie, Jonathan Andrews, has spent months getting ready for the movie, he feels there is still more work to do. He will not be doing any of the dangerous stunts. Instead, he will focus on in-depth character studies. Jonathan Andrews takes his work seriously.

Newspapers have been running photographs of the movie actors. People are anxious to read about their expensive cars and habits. They are interested in every detail of the actors' lives. Many of the performers are getting tired of being followed by news hounds and fans.

On Tuesday, June 18th, the Gold Coast Savings Bank of Fansville is robbed. This fact may seem unrelated to the movie, but there is a connection. Mrs. Joyce Charles says that she was standing

outside the Gold Coast Savings Bank about 2:30 in the afternoon. She witnessed the robbery. And she saw the burglar pull off his mask afterward. She says that she saw the face of Jonathan Andrews, the actor.

The spokeswoman for Pinehead Studios insists that it would have been impossible for Jonathan Andrews to have had time to rob a bank. He had been working on that day. "And anyway," she adds, "why would a rich, famous movie star want to rob a bank? I think that Mrs. Joyce Charles has been reading too many newspaper articles about *Dangerous Living*. She just imagined she saw him."

The police are not sure whether to believe Mrs. Joyce Charles. The spokeswoman from Pinehead persuades the police to let you investigate the story before the newspapers get hold of it.

You speak with Jonathan Andrews. He denies knowing anything about the bank heist. He insists that his schedule would not have left him time to do anything but work that day. He points to the work schedule pinned to his dressing room wall.

"Does that look like the schedule of a man who has time to rob banks?" he asks.

Type in the program and check the actor's schedule for yourself. Then return to the book.

Afterward you go to the bank. There you interview bank employees who were on the job during the robbery. Not one of them had seen the face of the robber. All had seen the mask on his face. Two clerks had noticed that the robber was even taller than Gregory, the bank guard. Gregory's nickname is Stretch because he is so tall. Gregory fainted during the robbery, so he didn't recall anything.

At last you interview Mrs. Joyce Charles. She still insists that she watched the robbery from outside the bank window. She saw a tall man, wearing a mask, enter and rob the bank. As soon as he walked out into the street again, he pulled off his mask. She recognized the face of Jonathan Andrews.

"I didn't run for the police," she says. "I thought maybe he was rehearsing a part of the movie. I never forget a face. I just know the man was Jonathan Andrews."

The police ask you if Jonathan Andrews should be considered as a suspect for the bank heist. Type in the program to help you decide.

You open the door and find Bruce, his clothes dripping wet from the rain that has been falling all day. He tells you he is upset because his clubhouse has been taken over by the Forster Gang. When he asked them to leave, Chad Forster told him to “—get out, OR ELSE!”

Throwing on your tan raincoat and grabbing your lucky umbrella, you follow Bruce to the clubhouse. Chad Forster is lying on a bench watching his friends play cards.

“Didn’t I tell you to get lost?” shouts Chad Forster.

Two gang members leap up and stand beside him.

An argument begins. Chad Forster insists that he built the clubhouse as a surprise for his buddies. Bruce claims that he built it as a getaway place to do his work. You hear two different stories, and wonder which one is correct.

“I’ve been building this clubhouse for three weeks. I just put the roof on yesterday,” says Chad. “It was sunny yesterday, so I worked on it until five o’clock. I came back this morning and found Bruce inside. I told him to get lost because it belongs to us, but he wouldn’t listen.

“You are lying,” says Bruce. “I finished the inside of the clubhouse last week, but I didn’t have any wood for the roof. This morning I found a heap of shingles at the dump and brought them here. I started hammering them on this morning and finished around noon. I went home for lunch. When I got back I found that this gang had taken over my clubhouse.”

You decide to question the Forster gang. As you step inside, you slip on the mat. Your new wallet falls from your pocket. Your paper money is scattered all over the floor. Chad helps you up, and Bruce picks up the money. The money is dry and clean, so you put it back into your new wallet.

Now you start questioning the gang members. Not one of them helped Chad to build the clubhouse. It was a real surprise to see it. “And to think that he built it with his own two hands!” says one of the gang admiringly.

Who really built the clubhouse? Type in the program to see if your guessed right.

Gary Stone is sure that the burglar must have slipped past building security checkpoints from the outside, but you decide to question the neighbors inside the building. Gary Stone politely gives you permission to do so.

Jared Andrews, the well-known comedian, answers the doorbell of Apartment 23. "The thief certainly didn't come from this floor," he says. "How can you be so sure?" you ask. "Well, that was the night I put a bucket of confetti over the hall door, hoping to give my neighbor a paper bath. Nobody came in that night. I was in a rush the next morning and didn't bother to look up. I'm still picking confetti from in between my dandruff," laughs Jared Andrews.

Tennis pro, Tom Laurett, lives in Apartment 35. "I wish I could help you, but I was too busy trying to get myself a meal to notice any sounds in the building," he says. "After I won the tournament, I was starving for a hot, home-cooked meal. When I got home I found the electricity was off, so I couldn't cook anything. I had to settle for a peanut butter and jelly sandwich that night!"

Apartment 68 is occupied by Robert Rose. He comes to the door clutching his head. You ask about the robbery, but he doesn't seem very interested. "Listen to that woman upstairs," he groans. "She never stops playing her miserable fiddle. I hate stringed instruments. They're bad for my nerves. How could I hear a robbery with that loud violin playing upstairs? The only time I got any rest was that night when the lights went out. Every time the lights flickered, the music stopped. When the power finally went out altogether, the music stopped for a long time. What a relief that was! Thank goodness for electrical problems. Sorry I can't help you!"

Violin player, Josephine Marche of the Palace Orchestra, is practicing in Apartment 78. "I know nothing about the robbery," says the musician. "I was practicing. I have to be absolutely perfect, you know, because we don't use sheet music at the Palace." She closed her eyes and played a few bars. "The neighbors probably

heard me. The man downstairs usually bangs a broom on the ceiling when he can't stand it any longer. But I just close my eyes and concentrate so deeply that I'm hardly aware of anything around me."

Actor Aaron Lawrence is about to leave Apartment 57 when you ask him about the robbery. He invites you into his apartment. You notice two candles on the dining table. "I see you were prepared for the power failure," you say. Lawrence explains, "My wife and I were celebrating our anniversary that night with a candlelight dinner: cold chicken and potato salad! I didn't even find out about the electricity problem until I saw the papers the next morning. I'm late for a filming, must go now!"

One of these people is not telling the truth. Type in the program to see who the burglar is.

The Auction

The Society of the Preservation of Odd Animals was supposed to inherit a fortune when Stanley Tipton died. Tipton left directions in his will that the Society was to get the proceeds from the sale of the valuable diamonds hidden in his safe.

It was also Stanley Tipton's wish that his collection of rare stuffed animals be sold at auction. However, he felt it only fair to offer his employees the choice of a gift before the auction began.

It may seem strange that Mr. Tipton should think his employees might be interested in owning any of his stuffed animals. But then, Stanley Tipton had many peculiar ways. For instance, he hired only women, and he insisted that each employee should learn as much as she could about his collection. Mr. Tipton was very interested in natural—and unnatural—history.

Here are the names and functions of Tipton's employees: Gloria, the housekeeper; Lisa, the cook; Kathleen, the groundskeeper; Susan, Tipton's cousin and secretary; and Beatrice, the butler.

Within weeks of working at Tipton's mansion, the cook had become an expert on the feeding habits of insects and mammals.

The housekeeper, Gloria, became so involved in natural history that she often traveled on expeditions with Tipton.

After hours, the groundskeeper lectured on rare animals at the local university.

Tipton was a very careful man. He had installed the most elaborate alarm devices available to protect his rare collection. The alarms were wired to the police station and could be turned off only with the assistance of the police. This alarm system assured Tipton that no part of his collection could leave the house without his knowledge. Of course, people could come and go, but nothing could be removed from the house without blasting off the sirens.

All of Tipton's employees knew where the safe was hidden and what was inside. They also knew all about the security system.

But in spite of the alarm system, the diamonds disappeared from the safe just before the auction! The Society would lose a vast fortune; they would gain only the proceeds from the auction.

As an alert detective from the police station, you figure that the diamonds must still be in the house, since no alarm went off.

But where are they? You start to investigate.

There are two major collections at the Tipton mansion. Type in the program to view THE RARE INSECT EXHIBIT. Then return to the book.

The RARE MAMMAL COLLECTION occupies another huge suite. On the day of the auction it contains: a pair of miniature spotted elephants, two rainbow-striped dogs, one green-toothed whale, a pair of tailless tigers, two curly-feathered ducks, two whiskerless cats, and a pair of long-necked rats.

The Tipton mansion is closed for a few days after the funeral. The employees take turns and come in to supervise while the auctioneers come in to make notes.

The mansion reopens on the day of the auction. The atmosphere is tense as you and the outside collectors wait for the favored employees to make their choices.

Not one of the employees wants an oddity from the Insect Collection.

Now everyone looks at the RARE MAMMAL CASE.

Gloria wants the pair of whiskerless cats, because she was with Tipton on the expedition that located them. She also knows that if ever she should decide to sell, there are several other collectors who would pay a high price for the strange twosome.

Kathleen, the groundskeeper, wants the green-toothed whale for her students to study more carefully. The university has promised her a huge glass tank, well protected, in which to display the whale. It is a very valuable whale. Kathleen figures that it's the only one of its kind ever found on this planet.

Lisa, the cook, wants only one of the spotted miniature elephants. She jokes that the pair became spotted from eating too many polka-dotted leaves.

Susan, Tipton's cousin, wants the two curly-feathered ducks.

Although she spent much time with Tipton as his secretary, she never became really knowledgeable about the oddities. However, she explains to the others, the ducks would blend in beautifully with the decor of her stone fireplace.

Beatrice, the butler, wants one of the long-necked rats. She says that it reminds her of Stanley Tipton.

Now all of the five employees have made their choices. They are free to leave.

Which of the five employees is about to walk out with the diamonds?

Type in the program to see if you guessed correctly.

Who Did It?

For the third time this month, the Tribeca Square Apartments have been robbed. Each time the security guard has been fired for not preventing the robbery.

You are the new security guard. Another robbery has just taken place. You will lose your job unless you find the thief.

This time a stereo and tape deck were stolen, along with a gold ring and a watch. You were the sole person near the only open door to the building. You are certain that no stranger entered the building on the day of the robbery. You believe that the burglar is one of the tenants in the building.

First you go to the apartment that was robbed. You learn that Marsha Cross left her apartment only once that day to do her laundry. She insists that the only people who could know that fact are her neighbors and the people who live near the laundry room. Type in the map to learn who could have seen Marsha.

RUN

Michael Griffin is a teenager. He lives with his aunt. Michael goes to school and also has a part-time job at a grocery store. On the day of the robbery Michael is at home with an upset stomach. When you visit him, he is wearing a gold ring, with the initials, M.G., on his right hand. Michael invites you in. The air conditioning feels wonderful on this hot, sticky, summer afternoon. "I've been resting here all day," says Michael. "The air conditioning makes so much noise I can't hear a thing!"

You leave Michael and knock on Jeri Fint's apartment door. Jeri lives alone. She is slow to answer the door. She apologizes for taking so long.

"Your knocking just woke me up. I've been napping for the last two hours," she says. "It's so hot!"

Jeri Fint says she knows nothing about the robbery.

You start to leave. You accidentally knock over a glass of iced tea on the kitchen table. The tea spills onto the floor. The big ice cubes roll over the floor. To make matters worse, you slip on the ice cubes

and fall. As you help to clean up the mess, you apologize. You feel embarrassed—who wouldn't?

When Charles Chase answers the door he says, "Yes, I saw Marsha Cross—she stopped in to return some laundry detergent."

Charles Chase doesn't seem surprised when you tell of the robbery. "The same thing happened last week when one of her friends went to the laundry room. It was the lady in 3B, Mary Astor," recalls Charles.

Pat Lee says she knows nothing about the robbery, but she did notice Charles Chase talking to Marsha around two o'clock that day.

The Missing Camp Counselor

You are a private eye. You receive a call from the director of Camp Chambers. One of the camp counselors, Mark Ericson, has disappeared.

"There's a reward for you if you can find him," says the camp director. He meets you at the gate. "We run a fine camp here. We specialize in swimming and in acting. We have a great Olympic-size pool and a very good stage."

The director leads you toward Mark Ericson's bunk.

"Mark's group of kids is very upset about his disappearance. So are we all. I hope you can find him," says the director.

You check through Mark's belongings but there are no clues.

You decide to question the youngsters in his group.

David cries because he misses Mark so much. "Mark would never miss the Sports Meet. Something terrible must have

happened to him!"

"When did you last see him?" you ask the group.

"He was on his way to the pool last night, to practice for the swim event," said Donna. "He never returned—not even to get dry clothes."

The group's other counselor, Mary, said, "Mark was the fastest swimmer at the camp. His group always won the swimming event at the Sports Meet. If he doesn't show up to compete on Monday, a rival team, the Bugles, will take the trophy."

"Maybe the Bugles got someone to take Mark for a long drive—at least until the Sports Meet is over," said Donna.

You head toward the olympic-size pool looking for clues. There are no signs of Mark around the pool. This is all you see. Type in the program.

You follow the paths around the pool, but there's no trace of Mark.

You see the camp director waving to you.

"Look at this!" he shouts.

He reads you this note.

To Karl I. Denarp, Camp Director

I decided to leave the grounds for a week. Tuesday morning I will drive to the Resting Hill Post. Have my campers meet me there at 9:00. I guess I really needed a rest. Do not try to find me.

Mark

"I'm very disappointed with Mark's behavior," says Mr. Denarp. "I apologize for bringing you here. It's too bad. By Tuesday the Sports Meet will be over. That's bad news for the kids."

"Where did the note come from?" you ask.

"One of the Bugles brought it to my office."

"H'm," you say. "I wonder why the rival team would be carrying a message from Mark?"

"The Bugles aren't bad kids. Sometimes they get carried away by their acting. I wish I knew what they were up to this time," said Mr. Denarp.

You examine the note carefully.

Mark took the time to decorate the note with stars.

Look at the stars very closely. Could Mark be trying to tell you something? Type in the program and see for yourself.

ANSWER: KIDNAPPED—LOOK UNDER THE STAGE

STORIES AND COMPUTER PROGRAMS THAT WORK TOGETHER — IT'S BASIC

WITH

THE MYSTERY AND ADVENTURE COMPUTER STORYBOOK

It's challenging, exciting, *and* educational! This book contains 20 stories and over 50 programs that can be used on Apple, Atari, Timex, Commodore or other home computers. So simple to understand, even an eight-year-old can program the computer—and become absorbed in an exciting story at the same time. THE MYSTERY AND ADVENTURE COMPUTER STORYBOOK is loaded with clues that the child programs into the computer. He is rewarded with exciting graphics (maps, mazes, coded messages) that will unravel the sequence of mysterious events. These stories combine text and computer programs to create a variety of fun, interesting plots. Programs that are simple enough for an eight-year-old, stories challenging enough for a twelve-year-old — that's how the MYSTERY AND ADVENTURE COMPUTER STORYBOOK introduces your child to the wonders of the computer *and* keeps him interested in reading.

The authors, Stuart and Donna Paltrowitz, are the creators of the *Mystery Maze* and *Close Escapes* series of computer software.
