

The major concern of ClubSpot is to cater to computer clubs and their members. A major benefit for computer clubs is in recruiting new members, and many clubs find their pages on ClubSpot useful for displaying club news and information for their members. Several computer clubs use their ClubSpot pages as the focal point of club meetings. The example, the North London Computer Club news almost immediately. For ClubSpot also includes information produced by enthusiasts, containing material of interest to ordinary Microonet members. There are pages concerned with shows and exhibitions, communications systems other than BeebSpot, a schools area, and several BeebSpot areas. Such as BBC Micro owners with news and information about all aspects of the machine.

ClubSpot also includes information produced by enthusiasts, containing material of interest to ordinary Microonet members. There are pages concerned with shows and exhibitions, communications systems other than BeebSpot, a schools area, and several BeebSpot areas. Such as BBC Micro owners with news and information about all aspects of the machine.

ClubSpot also includes information produced by enthusiasts, as well as club and courses it organises, as well as news. ClubSpot has a complete list of all the clubs there are. Presetel's subscription charges of £13 per quarter, and on top of that the line. This can cost as little as £70. Then connect their computer to the telephone line. Microonet must first buy a modem to send and receive messages to and from other subscribers to the Presetel system.

On page 101 of The Home Computer Advanced Course we introduced you to Microonet, an area within Presetel (British Telecom's public viiewdata service) that is designed for the use of thousands of home computer users who have a desire to use ClubSpot's facilities of a Main

club again, as Presetel have just given the move a go. It is now on 1,500 frames of information. It is now over 8008. At this point it had grown to over 1,500 frames of information. Presetel within Microonet, with its front page at became a sub-information provider when Microonet was set up, ClubSpot pages of Presetel, followed by the IPC moved on to the Practical Computing pages of Presetel, and Computer Clubs As time went on, it proved a popular success and London Computer Clubs began about the Association of Computer Clubs. As its name implies, it began as a small part of one of Presetel's before Microonet came into existence. ClubSpot began several years ago, is run by members of computer clubs.

Both Microonet and Viiewfax are commercial areas, selling telesoftware and providing news and information to several databases, of which the main one is still Microonet 800. The other name for several databases, of which the Microcomputing, This is an umbrella name for hobbyists initiatives, such as examples of hobbyist initiatives, such as two are Viiewfax 258 and ClubSpot 810. Both Microonet and Viiewfax are BBC Micro owners with news and information about all aspects of the machine.

Since our previous article was written cost of the phone calls themselves.

Anyone wishing to become a member of Microonet must first buy a modem to connect their computer to the telephone line. This can cost as little as £70. Then
