Rank And File We continue our Basic programming project by looking at ways in which to organise data 254

Insights

Pinball Wizard A new program to design your own computer games 241

Cruise Control The technology behind one of the latest computerised missiles 243

Brighter Outlook Computers help to forecast weather accurately 248

Tracing Paper An image can be represented by X-Y co-ordinates. We examine one of the ways in which this can be done 258

Passwords To Computing

Against All Odds Parity checking, the oldest method of detecting errors when sending numbers, is still in use today 253

Pioneers In Computing

Gottfried Leibniz Scientists are working to perfect this 17th-century mathematician's idea of a language of logic 260

Sound And Light

Introducing Sound . . . And Light A new series to help you make the most of your computer's special effects 246

Next Week

• We look at the Tandy Color Computer, a home computer that has been on the market for some time and is well supported by software and peripherals

• Apple's Lisa might just look like an expensive business microcomputer but its software will revolutionise computing, both in business and at home

• CRTs (Cathode Ray Tubes) form the heart of both televisions and monitors. However, there are other forms of display, and we'll be looking at how some of them work
