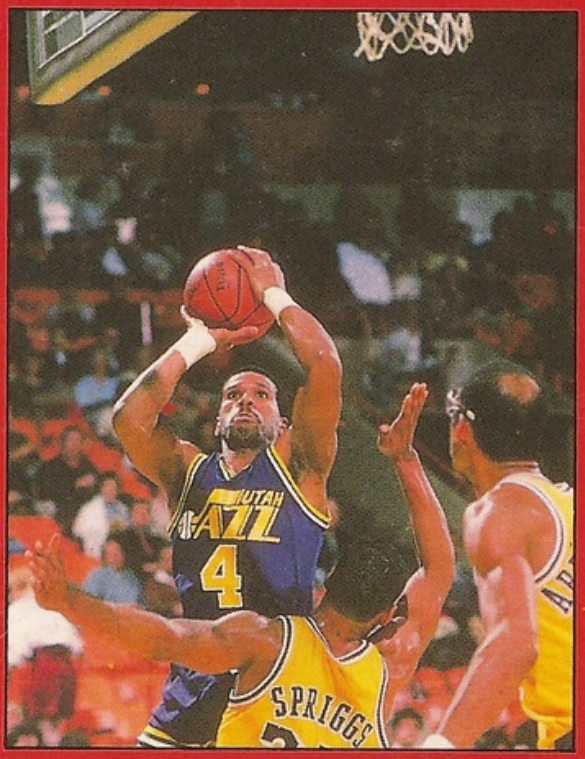
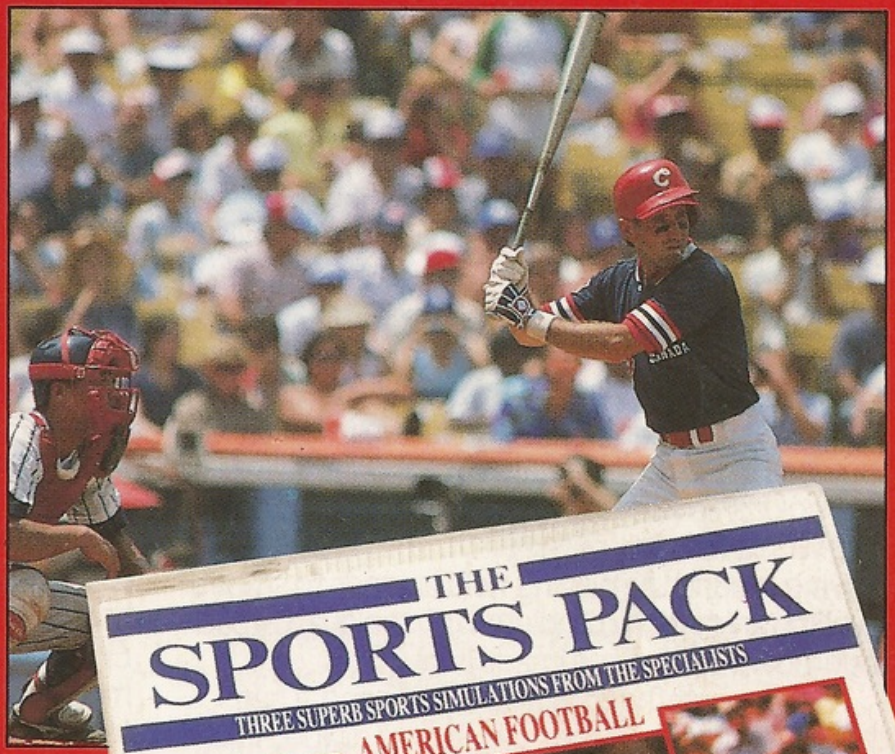
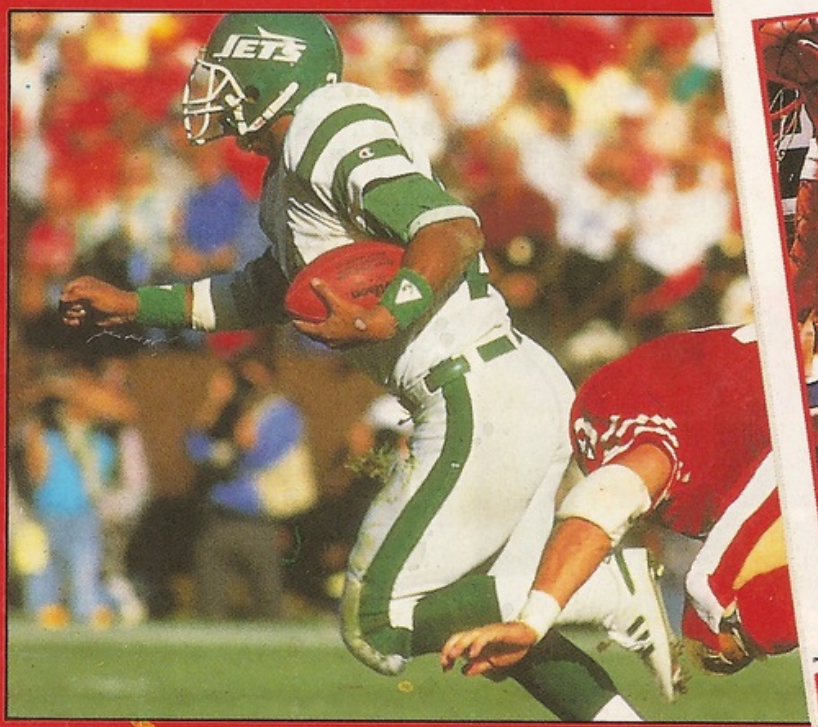
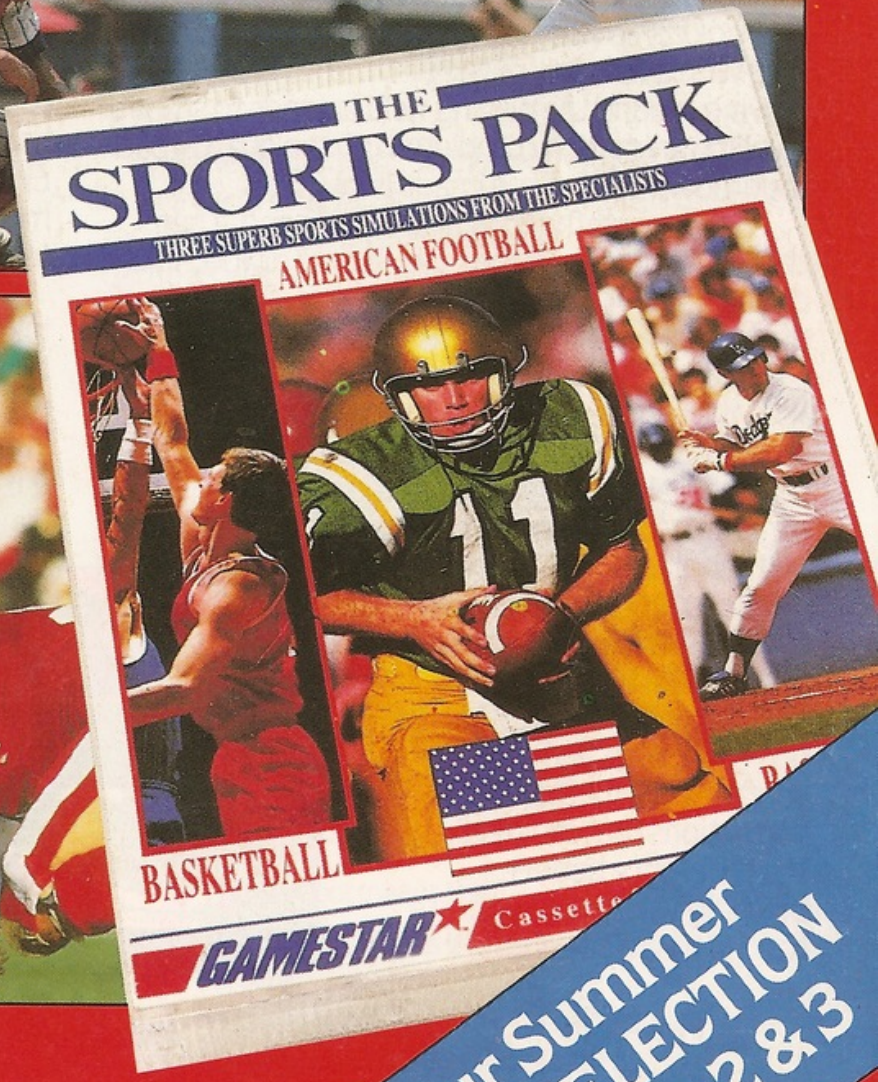
PROGRAM

THE MAGAZINE OF THE HOME COMPUTER CLUB









A super Stateside sports simulation

Your Summer MAIN SELECTION See pages 2 & 3

It's an all-American hat-trick of sports sensation!

Three of the USA's best-loved sports in one great value Selection.

When it comes to all-American sports action they don't come much faster or harder than this!

Whether you're an avid television spectator of American sports coverage or just want to combine sparkling sports simulations with an understanding of these popular Stateside games, *The Sports Pack* puts you in the boots of the top jocks.

So load up your RAM and play ball!

Kick off with Grid-Iron football.

At first you won't believe your eyes. For, as shown in these representative screen shots, *Championship Football* puts you right down on the field with a full view of the pitch. The realism of moving around the playing field extends to smooth scrolling animation complete with the quarterback countdown at the scrimmage line!

Play against the computer or a friend. Then choose from among the many teams divided into divisions. You choose the players, carefully mixing offensive and defensive strengths.

Ready? OK here comes the kick-off. Watch how the upraised hands at the bottom of the screen move to collect the flying ball. And just as in real football you're subject to the rules of American football governing yardage, tackling and ball handling.

But of course American football is all about tactics – plotting the traps, blasts, streaks, and pickups of good offensive plays and countering with the formations that can mean the difference between blocking yardage or letting a touchdown through.

The computer allows you the full arsenal of special play including the punt, kicking field goals, open-field running and scoring the all-important point after touchdown.

Watch the play-calling screen for up-to-date status reports and the options of dozens of offensive plays and 12 defensive formations.

So whether you're a rookie, an aspiring quarterback or a star linebacker, strap on your helmet and make your play with the pigskin!

Down on the Diamond for the great National Pastime!

Not for nothing is Baseball described as one of America's great national pastimes. The game is one of the most engrossing sports there is. Now *Championship Baseball* takes you out to the ball game and puts you on the batting plate, the pitcher's mound or the team dug-out for a computerised simulation that is practically the real thing. Wear the hats of both manager and player; *Championship Baseball* lets you assume the manager's role in choosing and fielding the best team before taking part in the game itself.

With your team picked and ready it's time to take the field either fielding or batting. As each hitter steps up to the plate his name and batting style are displayed on the on-screen scoreboard. Watch carefully as the pitcher winds for his throw. If it's a curve ball you might be advised to leave it. Or why not try a bunt to confuse the field?

The fielders also have their work cut out for them retrieving the grounders or leaping for the fly balls as the batter heads for first base. Naturally the rules of major league baseball apply so a runner trying to steal home can be tagged or a fly ball can be caught on the full to get the batter out.

"The game has everything that the real game has. Recommended for sports freaks" ***Computer Games***

All the excitement of the real sport is contained in this electronic facsimile which includes the nine most popular offensive and defensive plays in the game as well as the ability for players on the offense to call timeouts. Best of all, you don't have to be seven feet tall to play on the Gamestar team!

9784 Released at £19.99 (for the set) 128
CLUB PRICE £12.95 (for the set)

Slam dunk's and hook shots in a game of guts and strategy.

The ball ricochet's up from the floor and into your hand. In one motion you've scooped it up on the rebound, reached up and rammed it through the hoop with a jump shot to end them all! The scoreboard lights up just seconds before the buzzer sounds the end of the second quarter.

It's *Championship Basketball* and you're finding out why Basketball players need to combine the skills of an athlete with the talents of a juggler.

This is Two-On-Two, the simulation that pits pairs of players against each other or one person against the computer. Learn complete ball control from the baseline to the downcourt, and teamwork with either your human or computerised team mate.

Important
This issue of Program features 30 exciting items for your computer. To order, use the order form on the back of your statement. The Main Selection, The Sports Pack, will be sent to you in two month's time unless another item is ordered. Remember you may order further items in addition to, or instead of the Main Selection.

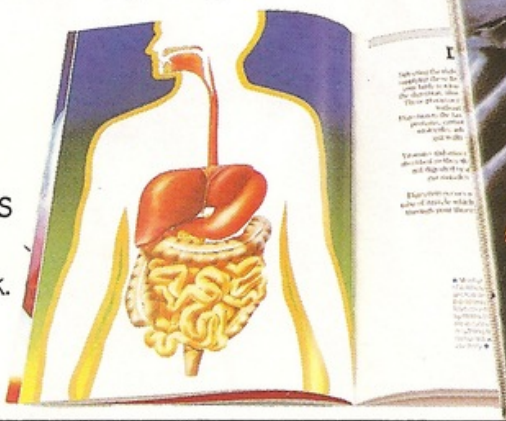
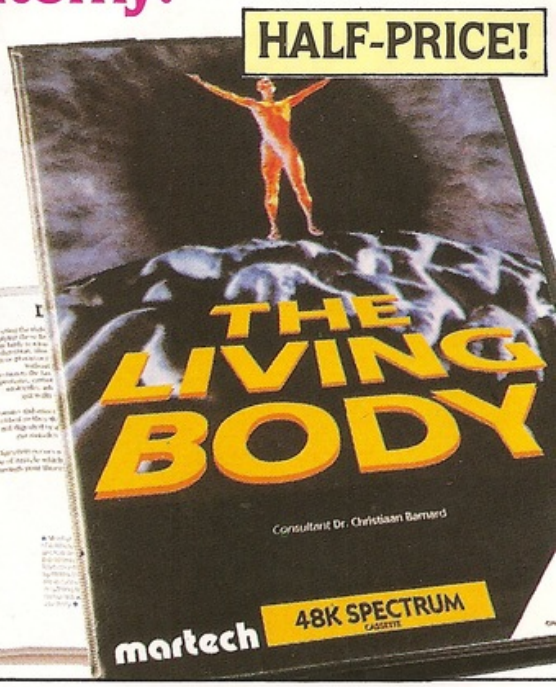
The entertaining way to learn anatomy!

HALF-PRICE!

Learning about the human body has never been such fun. Complete with a stunning 32-page colour booklet, this incredible computer simulation of the workings of the human body will help you gain a valuable insight into understanding anatomy and biology, and is especially useful for GCSE level students. Six different arcade-style games test your learning ability on anatomy, the blood system, heart, breathing, digestion, and circulation. The authenticity of the program is assured by no less an authority than famous heart surgeon Dr Christiaan Barnard who was a consultant on this project.





Pack 245mm x 180mm includes 32 page book.

Everything you need to know to get started on Spectrum Machine Language

Helps you get the most from your Spectrum +2.

Don't worry if you haven't a clue about machine language. Joe Pritchard's superlative guide to the "mother tongue" of the Spectrum +2 Z80 CPU starts with a gentle introduction to this powerful computer language before gradually exploring how to apply it to produce faster programs and tweak up the capabilities of your machine. A total of 16 chapters cover ROM routines, Input and Output instructions, sound generation and all the methodology of producing fast and compact code. So don't worry if you've never before heard of a register, flag or jumps and loops. The plain and uncomplicated style of this book will cope with any confusion.

Paperback 210mm x 140mm 192 pages.

Enjoy a day at the races and solve a Dick Francis thriller!

Two offerings for the price of one.

Based on the Dick Francis' best-seller, this combined graphic adventure and racing game leads you into the darker side of the horse racing world. As physics teacher Jonathan Derry, you must solve the mystery behind a set of cassette tapes that are the key to an illegal and lucrative betting system. A comprehensive vocabulary allows you to question and talk to all the characters featured in the original book. The second part is the thrilling racing simulation which can be played on its own or as part of the adventure whenever you find yourself at the track.

SPECIAL SUMMER OFFER

Buy any two items and get one free!

Yes it's true. We're giving it all away. All you have to do is order any two items offered in this issue of The Home Computer Club magazine. We will send you a mystery gift worth at least £7.95 (and possibly more) especially selected from The Home Computer Club's tremendous titles.

Although you won't know what your free gift is before you receive it, you can be sure of two things. It will be suitable for your particular computer. And it will have already been offered in the Club. Since it began The Home Computer Club has been pleased to bring you the best software, bookware, and books available anywhere. So you can be sure that whatever your mystery gift is, it will have already met our high standards. This is no competition. You don't have to answer any questions or fill out any extra forms. Your gift will be despatched immediately as soon as we receive your order for two products chosen from this Summer edition of the magazine. But remember that any items in the magazine released or published as a set count as one selection towards your free gift.

WORTH AT LEAST £7.95

From the cinema screen to the micro!

Arcade adventure based on the famous legend.

He swings through the trees with the greatest of ease! Yes it's the Lord of the Jungle himself, brought to a computer screen near you and appearing in superb PixelScope complete with 3D animation!

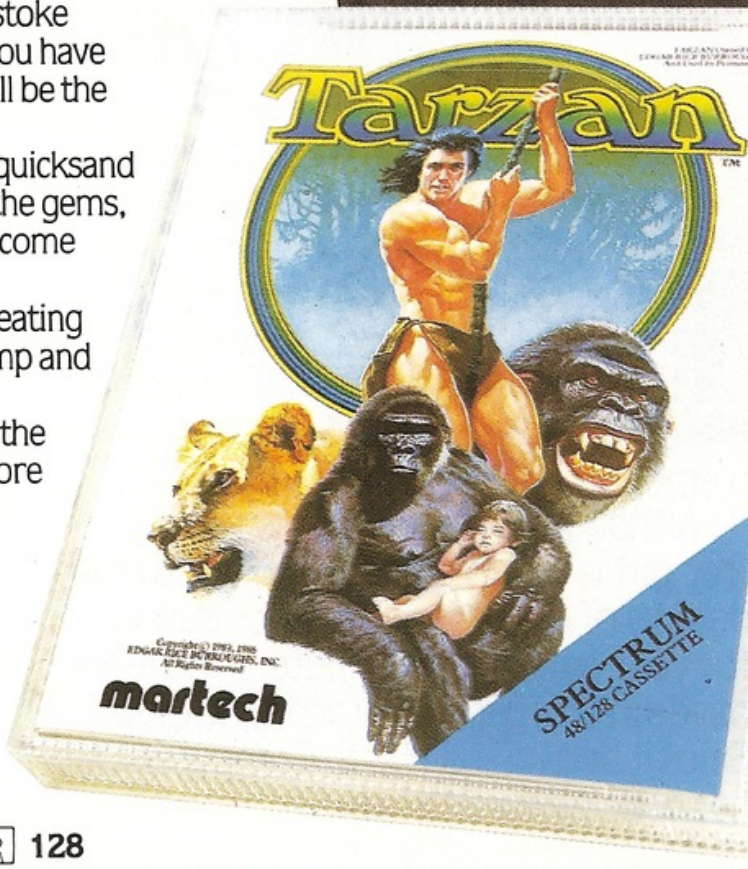
The aim of the game is to rescue Lady Jane Greystoke from the clutches of the Wamabo tribe. As Tarzan, you have three days to recover the seven gemstones which will be the ransom to secure her release.

You'll have to overcome wild animals, deep pits, quicksand and other jungle dangers. Various objects including the gems, which are hidden in the undergrowth, help him overcome these perils.

Naturally Tarzan is no slouch when it comes to beating up hostile natives and the odd lion. He can punch, jump and somersault his way out of trouble.

But time is Tarzan's deadliest enemy. Whenever the loinclothed Lord gets into difficulties, time passes more quickly. Like the true hero he is however, Tarzan continues his mission during the night.

Under joystick or keyboard control, Tarzan can move in any direction until thwarted by impenetrable rock. And he can sneak through clearings in the undergrowth that are sometimes not always easy to see!



5960 Released at £8.95 **CLUB PRICE £6.70** 128

May the Lightforce be with you!

A kaleidoscope of arcade zappery.

It's the situation every patrolling commander of a Lightforce fighter has spent years training for. Dozens of hostile alien ships just itching for intergalactic conflict. Well if it's a fight they want, they've come to the right sector. Setting your laser blasters to auto-fire, you set your battle stations, line up your sights and swoop into the fray.

The smooth-scrolling screen and high-calibre weaponry assist you in easily blasting the initial waves of attackers as they fly past in a blaze of swirling colour. But don't get complacent. The more you destroy, the more they attack using devastatingly dangerous tactics. You'll soon feel the adrenalin pumping as your joystick/keyboard finger rattles against the firing control. With its well presented graphics and onslaught of pure colour, *Lightforce* has all the elements of what a top-rate shoot-em-up should be.

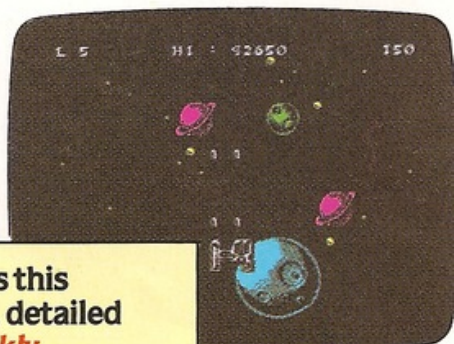
CLUB PRICE £5.95



"It is the graphic design that makes this program really stand out... bright, detailed and fast." ***Popular Computing Weekly.***

The eagerly-awaited sequel to last year's smash hit

Take a crack at beating Russian computer security.

One of the most intriguing games of last year was Hacker. The unique mix of adventure and arcade techniques which greeted players with the enigmatic "log on please" sign (see page 10 for another chance to order this highly original game).

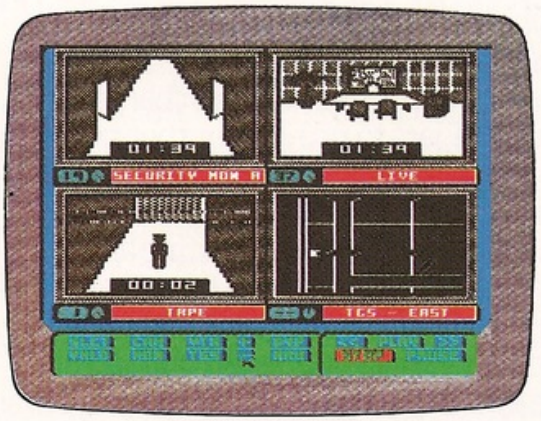
Now, just when you thought it was safe to go back online comes the grand sequel, *Hacker II*, the ultimate in strategy adventure simulation. Sub-titled The Doomsday Papers, it invites all you hacking wizards to have a shot at preserving Western civilisation as we know it.

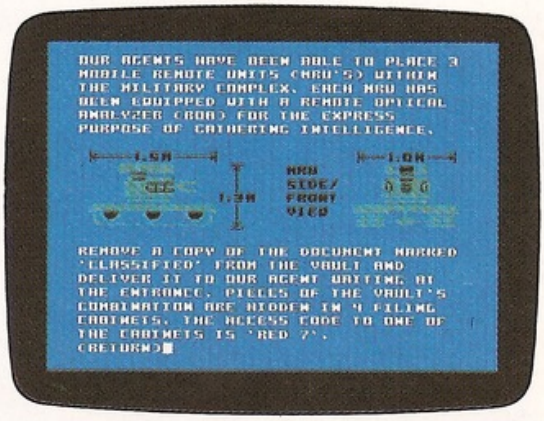
For deep inside a Soviet facility in Siberia lie the Doomsday Papers which hold the key to US national security. The CIA has enlisted your help in breaking into the installation and recovering the precious documents.

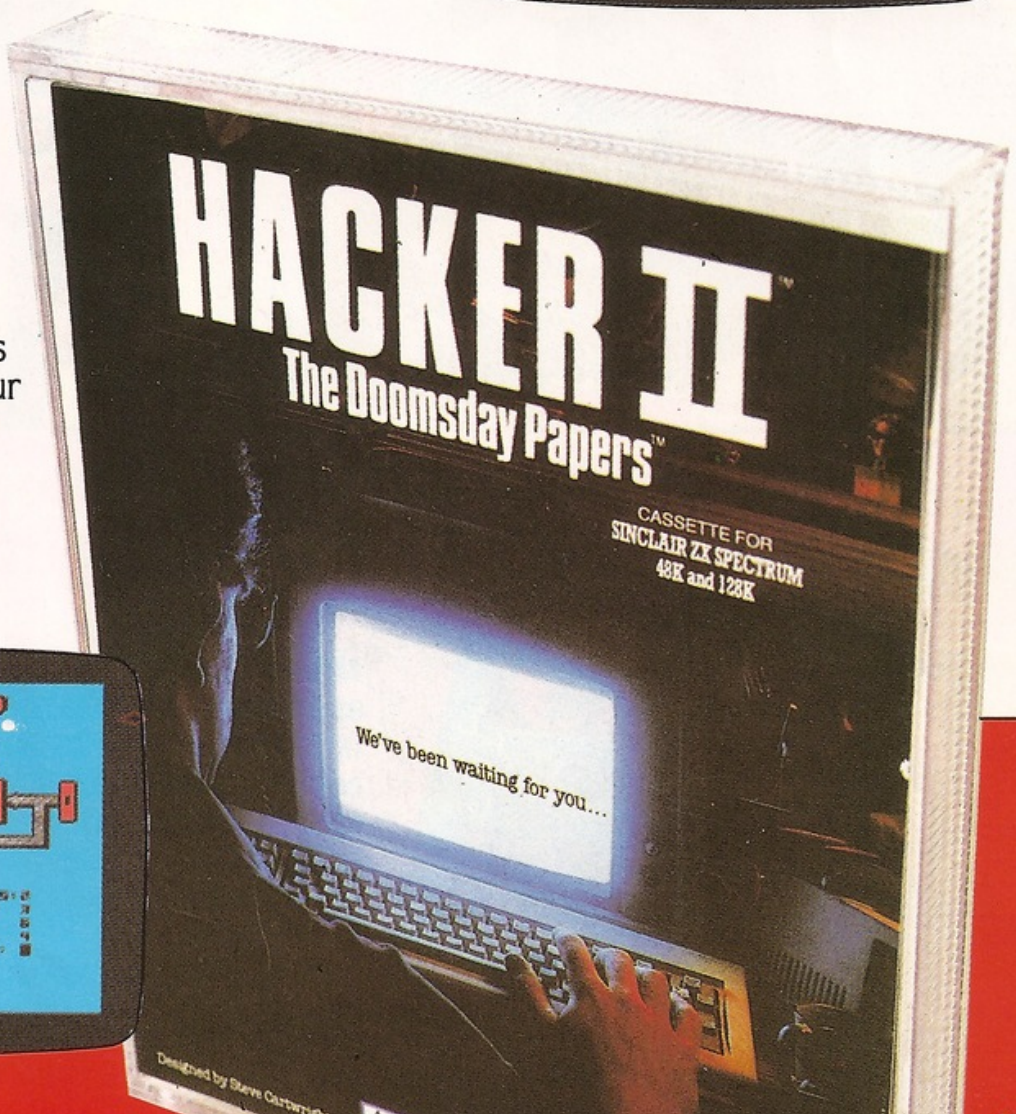
You'll need all your hacking skills to break into the computer that controls security. A CIA satellite link ties your computer directly into the Russian security complex. Once inside the danger begins. You'll have to find the safe and avoid the security cameras and monitors, not to mention guard patrols.

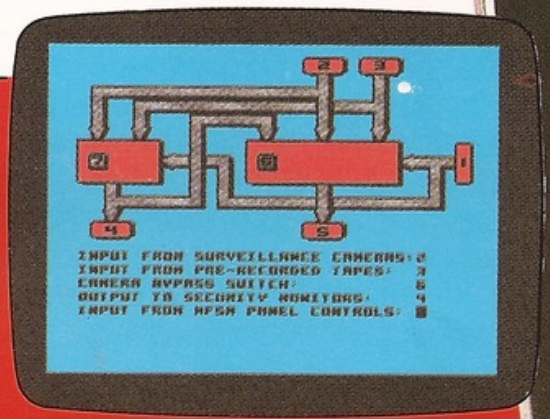
There is a way past the probing electronic eyes of the hidden video cameras, but you'll need to engage in some lateral thinking to work out the best method of bypassing them.

So with the Multi-Function Switching Matrix Operators Manual at your side, your fingers start working their magic on your computer keyboard. But time is running out...









1350 Released at £9.99 128

CLUB PRICE £7.45

A superb computer game and board game in one box!

The world of football is tougher and more ruthless than most businesses. And if you don't believe that just play *Brian Clough's Football Fortunes* with a few friends and use your management skills to beat the opposition and get to the top. Here's a chance for all you armchair managers to prove your theories about how your favourite team should be run. This exciting game combines the power of the computer and the traditional board to produce a stimulating and challenging entertainment for up to five players. The computer stays in the background handling chores such as dice rolling, calculating results and team strengths. Meanwhile you and your fellow players are left to haggle and deal your way to the top of the football league and on to a place in the FA and European Cup finals.

Pack includes board, counters, cards, currency and software.

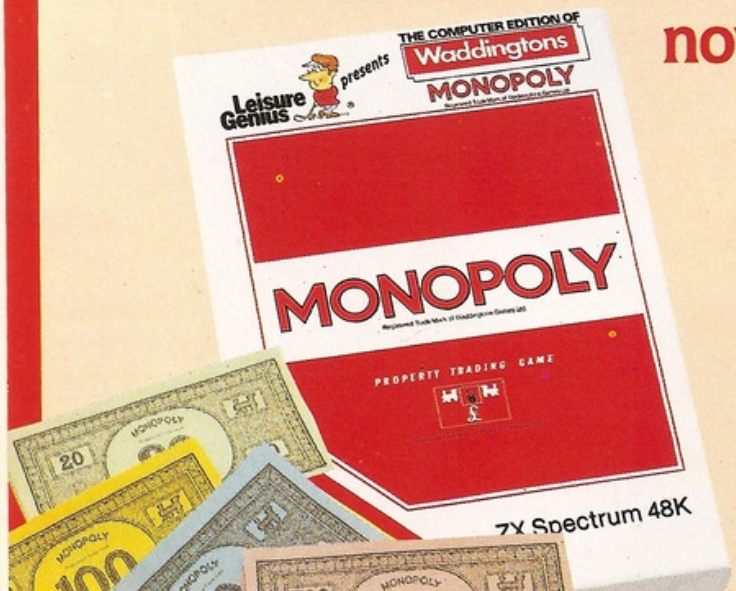
CLUB PRICE £7.45

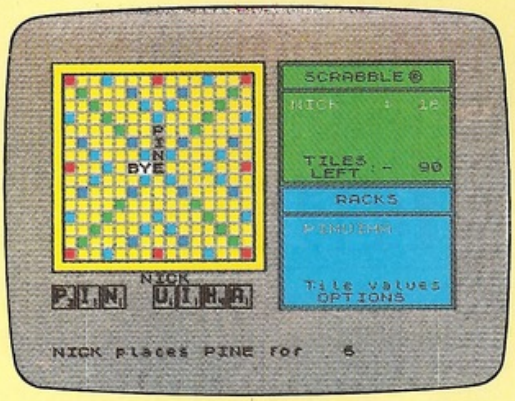
The world's most popular board game – now on computer!

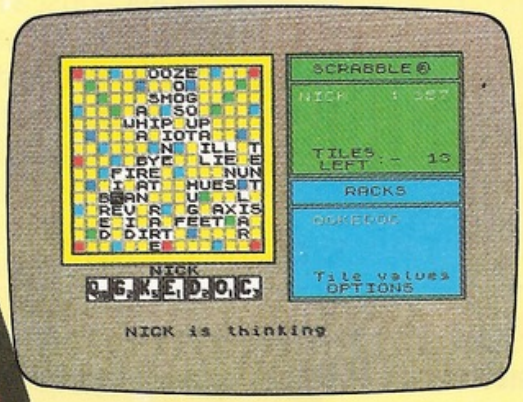


It was only a matter of time before Waddington's classic board game became available on computer. As well as retaining all the features that have made Monopoly a family favourite for many years, this computer version adds a whole new dimension to the game. Up to six people can play. Or one player can be matched against five computerised opponents. Whatever option you choose, the computer takes care of token moving, dice throwing, and rent calculation, leaving you free to concentrate on buying, selling and bankrupting your opponents!

2326 Released at £9.95 **CLUB PRICE £7.45** 128

d game makes it
mputer





See how the most successful board game in recent years comes to life with sound and music!

Finally it's here. The worldwide smash hit board game has at last made the transition to the micro-chip. And what a fun-packed conversion it has turned out to be. Just check the features of this great electronic version – fabulous sound and music effects, a gigantic repertoire of more than 3,000 questions, a fail-safe control that ensures you don't get asked the same question twice, and the ability to play *Trivial Pursuit* on your own!

Pack 210mm x 150mm includes two cassettes and booklet.

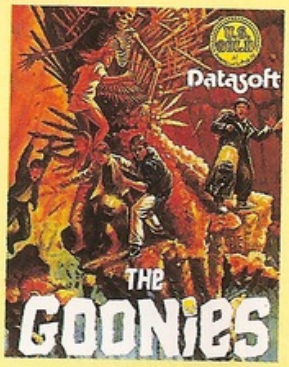
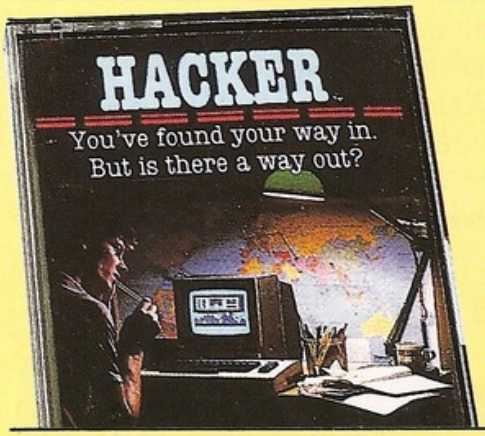
Arcade Action

Do you have what it takes to be a Goonie?

A Goonie must be shrewd, confident, and brave to overcome the spine-tingling adventures in this game. Unlike any arcade adventure game you've played before, you must manipulate two characters who work as a team, before you can win the game. *The Goonies* is the work of Datasoft, the brilliant software house responsible for such blockbuster classics as Zaxxon, Pole Position, and Bruce Lee.



4858 Released at £7.95 **CLUB PRICE £5.95** 128



Hack into a secret world of espionage and impending global disaster.

You won't find any playing instructions with *Hacker* – just a flashing screen message inviting you to "log on please". The skill comes in cracking the system by trial and error. But once you're into the strange computer system, you enter a complex adventure that could lead to global catastrophe. There are astounding graphics and sound effects. But you'll have to play by your wits to solve the mystery.

4646 Released at £7.99 **CLUB PRICE £5.95** 128

Pit your courage against the Headless Horrors and curse of the Gods!

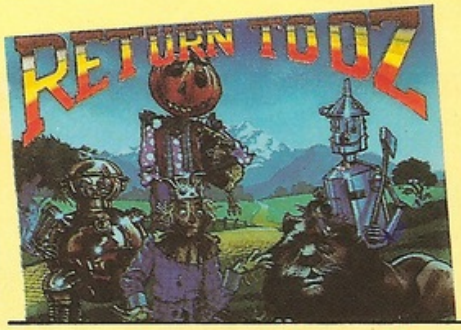
More than 500 screens in Hewson's incredible interactive "movie".

Full hidden object removal, smooth scrolling graphics, flicker-free animation and hundreds of tasks in more than 500 screens make this a mega-game to remember. Each character has their own personality and you can swap between them to achieve certain tasks. But there are numerous horrors to withstand – the headless guardians, stinging scorpions, and faceless robots to name a few.

"The multi-dimensional 3D scrolling is stunning." ***Your Sinclair.***

"The graphics are some of the most realistic to be found on the Spectrum" ***Sinclair User.***

2059 Released at £9.95 **CLUB PRICE £7.45** 128



Outwit the Gnome King in Return to Oz.

You're back in the land of Oz, but something is wrong. The yellow brick road is a pile of rubble and the Emerald City is in ruins. Dark forces now rule. With your friends Tik Tok the Robot, Jack Pumpkinhead and the Gump, you have only a few chances to overcome these fearsome opponents and restore the good Princess Osna to the throne.

4860 Released at £7.95 **CLUB PRICE £5.95** 128

Your chance to collect two smash hits at a great price!

One of the best double offers yet from the Home Computer Club. Uridium is the ultra-quick interstellar shoot-out with hard-glare graphics. Firelord is one of the first games to mix arcade animation with icon-driven trading strategy. In it, you are the Knight Errant who must recover the firestone and defeat the evil queen.

ALIENS

Taste the terror!

Conveys all the tension of the original film.

It's not often that films make as successful a conversion to computer game as *Aliens*. If you've seen the film you'll already be familiar with the non-stop tension and horror of the battle against the deadly extraterrestrials.

It's all here – the fear of stalking the monsters through dozens of dark chambers, the horror of encountering the dreaded Aliens, and the final encounter with the Alien Queen.

You assume the role of Warrant Officer Ripley, the sole survivor of the previous human encounter with the Aliens on the space freighter Nostromo. Now you must return to the remote planet where the Alien eggs were first discovered to investigate the fate of the space colony.

248 rooms to explore!

Once you've selected your six crew members, the exploration of all 248 rooms of the seemingly-deserted base can begin. Each carries a proximity metre that can detect an alien life form and a Smart Gun used to blast through doors and walls.

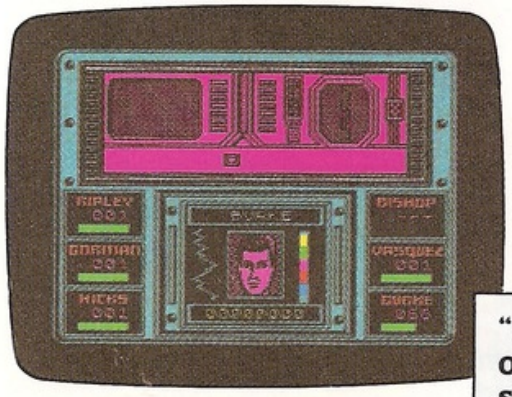
As you move from room to room the tension becomes almost tangible. For the Aliens can strike in an instant. But they won't necessarily kill you.

Instead they may impregnate the body of a crew member with horrific results. Your computer screen becomes the centre of operations from which you direct the mission, operate gun sights, check ammunition levels, check crew members bio-monitors, lock into their helmet video cameras and plot their position.

As you start the search for the Alien Queen's chamber things may appear to go smoothly for a time. But stay alert. For as darkness descends the Aliens begin to stir...

1238 Released at £9.99 **128**

CLUB PRICE £7.45



"I defy any player to get used to what are some of the most realistic graphic effects I've ever seen on the Spectrum... software magic... the tension is something you really feel."
Sinclair User.

Welcome to a new dimension of sprite and screen

Awarded "Classic" status by *Sinclair User.*

Let your artistic inclinations run riot with this superlative utility that is possibly the best Spectrum graphic development tool yet seen. Not only does *Animator 1* let you manipulate text, shapes, and colour in endless ways, it is also the gateway to easily producing your own sprite graphics and character sets for inclusion in your own programs.

No programming experience is necessary. You choose your drawing tools with a combination of key-commands and icons. Thereafter the screen becomes your drawing pad. Mix brush strokes with air-brush effects. Fill in your shapes with thousands of colour and texture combinations, then embellish your work by choosing from a limitless combination of print styles, types, and sizes.

Free Poster Machine included.

Producing fabulous electronic images is all very well. But how much more rewarding it would be if you could produce giant hard-copy versions of your works of Art. The free Poster Machine utility included with *Animator* lets you transform your screens into posters of all shapes and sizes by commanding your printer to produce a series of printed strips that you join together!

6635 Released at £9.95 128
CLUB PRICE £6.95

"The package invites use rather than putting up barriers." *Sinclair User.*

Hewson's 3-D brilliant bouncing ball breakthrough

"It's totally addictive" *Your Sinclair.*

Trust the ace programmers at top games software house Hewson to come up with some of the best games around. *Impossaball* is certainly up to their usual excellent standards. The screen opens on a bizarre corridor containing strange columns and spikes. It's a race against the clock to control a bouncing ball in and out of the corridors. As you attempt to run the gauntlet of obstacles before time runs out, you'll appreciate the sheer addictiveness of this superbly simple but madly fascinating program.

5921 Released at £8.95 128
CLUB PRICE £6.70

"For some beautifully-programmed race against time action you need look no further" *Popular Computing Weekly.*

All the thrills and spills of the ancient art of unarmed combat

> "*Uchi Mata* is a unique game. I really enjoyed doing it."
> *Brian Jacks*

Authorised by world judo champion Brian Jacks.

Judo is one of the most subtle forms of unarmed combat. In this authentic computer simulation of the art you start as a White Belt novice with the aim of working upwards to be a coveted Black Belt. Unlike other martial arts computer simulations, *Uchi Mata* teaches you the real story behind martial arts. It forbids kicking or punching. Instead you must use your opponent's weight against him to search for an opening and throw him off balance.

The authenticity of this challenging program is guaranteed by the technical consultancy of 7th Dan world Judo champion Brian Jacks, who has written the explanatory documentation. Your joystick becomes the means by which you execute throws and moves against your opponent or defend and block. If you've calculated correctly you'll be rewarded by the sight of your opponent flying over and landing on his back and an award of the maximum 10 points. But get it wrong and you'll be forced into defensive posture that could cost you the bout.

5957 Released at £8.95 128
CLUB PRICE £6.70

It's the caper of the century and you're Mr Big!

A game that proves crime does play!

After years of petty crime, you've decided it's time for the big heist. And as a modern-day Mr Big you'll use a computer to choose a team of specialists and plan the job that will finance a lifetime of relaxation in Rio!

But unlike a simple smash and grab, this caper requires a great deal of computer-aided planning. You must hire a team and a fence, buy information about the target's security systems and type of loot, and plan the routes in and out with maximum precision and timing.

Icons and pull-down menus give you access to five targets, blueprints and a team of villains, each with their own strengths and weaknesses. You have to decide the best men for the job based on their skills and payment demands. Once each team member has been assigned their route and action you can perform a "dry run" to check your tactics.

But when it comes to the real robbery a random element means things can (and do) go wrong and you'll need a few contingency plans to make sure all the team gets back to the getaway car. Only if you've planned each element of the caper correctly will the robbery succeed and the swag be credited to your secret bank account.

A different racetrack each time you play!

3 D Grand Prix excitement and you're in the driving seat.

The trouble with most race simulators is that once you've mastered the track it all becomes a little predictable and boring. So how about a Formula 1 racing simulation that lets you build your own track?

That's what Leisure Genius, the company responsible for popular computer conversions of Monopoly and Scrabble, thought. They came up with *Scalextric* modelled directly on the real race game and allowing you to construct your own track. Select one of the 17 pre-set tracks that are exact replicas of the great circuits of the world including Brands Hatch, Monza, Kyalami and the Nurburgring. Or construct your own circuit from scratch by selecting from the icons depicting curves and straights. Make it as tough as you like, with chicanes, hairpins, and banked curves. Of course you can save it permanently for future races. When the circuit is ready the race can begin. The view changes to a driver's-eye perspective from the starting grid, the flag drops and the race is on.

Take a corner too quickly and you'll either go into a skid or crash the car. And watch those chicanes. Remember, there's only room for one car at a time. Even if you recover from a shunt, you'll lose valuable seconds from your lap time.

1393 Released at £9.95 128

CLUB PRICE £7.45

There's gold in them thar hills!

Written with the Graphic Adventure Creator!

"An entertaining adventure... it has some fine touches" *Crash.*

Howdy pardner ... mosey on down to the old town of Skintsville and lend an ear to the *Legend of Apache Gold.* For the old timers do say that when the old Apache chiefs go to the happy hunting grounds, they have their gold buried with them. And as it's been a month of Sundays since you've heard the jingle of dollars, it's time to take that last slug of firewater and hit the trail in search of the Apache treasure. The power of the GAC means you can type in whole sentences to execute commands and directions. Along the way you'll meet various varmints, ride the rapids, and even fall foul of the strange powers that protect the buried gold!'

Around The World in 80 Plays

Can you beat the international endurance record?

An authentic adaptation of the smash hit coin-op classic

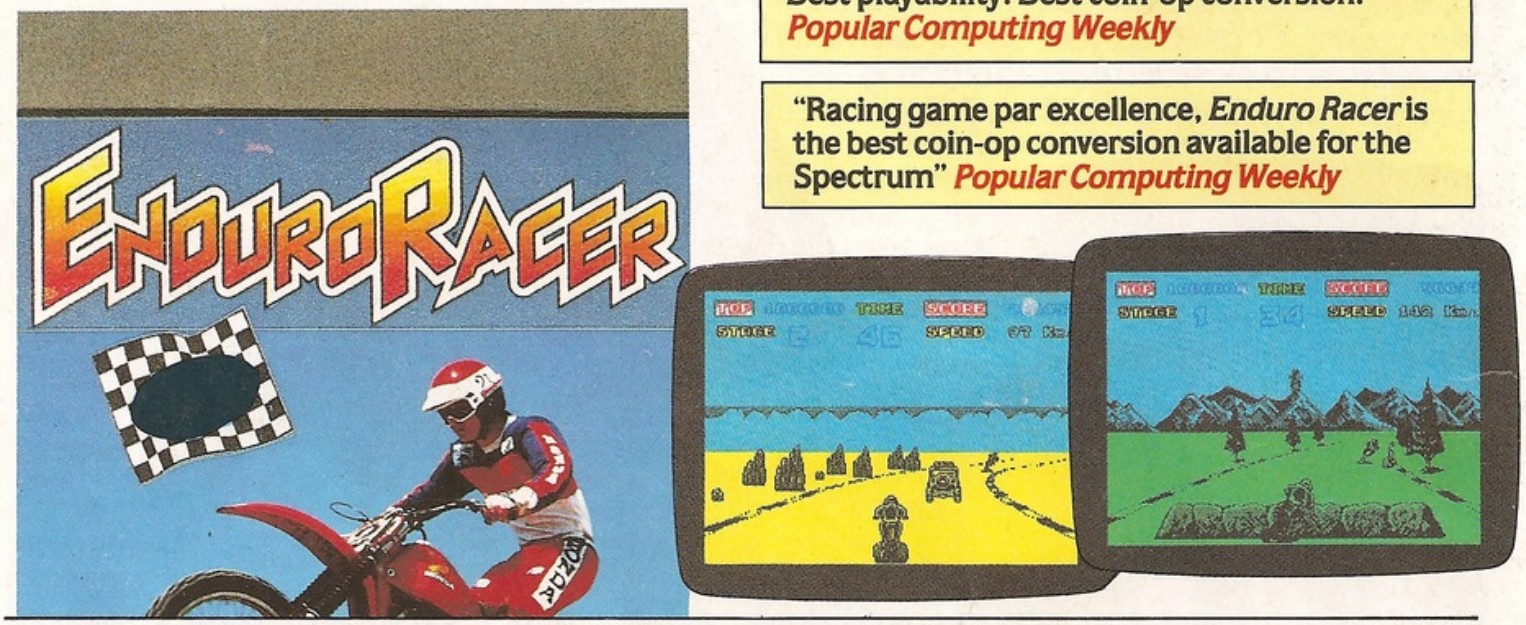
The road sweeps under you in a blur of tarmac. You clench the handlebars of the Super Racer, get your head down and twist the throttle even more. As you go faster the surrounding countryside changes from exotic desert to populated beach to rickety bridge surrounded by shark infested waters and to who else knows what? This is the top endurance race and its course takes you right round the world. Every few hundred yards your bike lurches up into the air as it strikes another pothole or irregularity in the surface and it's all you can do to stay on as the machine careers into the air before bringing you down to earth with a bump! That's if you are lucky. Mis-calculate and both rider and bike will tumble off the track in a spectacular crash.

1793 Released at £9.99

CLUB PRICE £7.45

"This program has so many bests it's difficult to know where to start. Best and fastest scrolling on a racing game. Best sprite design. Best playability. Best coin-op conversion." ***Popular Computing Weekly***

"Racing game par excellence, *Enduro Racer* is the best coin-op conversion available for the Spectrum" ***Popular Computing Weekly***



Tease your brain with the most original mix of arcade and strategy

It's just you and the Deactivators against a building full of bombs!

Being a night watchman at a high security installation is fairly routine stuff. Until alarms start ringing and you realise with horror that a terrorist team has infiltrated the building to plant bombs in dozens of rooms and destroyed the central computer sending the security Droids on the rampage. It's time to send in *Deactivators*, a team of intelligent robots, to find the explosives and throw them out the window before they explode.

If that sounds easy, you ain't seen nothing! Some rooms lack doorways, others defy gravity and turn upside down. All the while the bomb fuses are spluttering away and deranged security Droids hamper the operation.

6626 Released at £8.95 128
