COMPETITION-PRO Joystick

PRECISION GAME CONTROL!

SPECTRUM JOYSTICK NOW AVAILABLE FROM WHSMITH Boots

Outstanding Features

- Self centreing stick
- Super strong nylon and steel construction
- A total of 8 directions *plus* 2 large fire buttons (for left or right handed operation)
- Arcade proven moulded leaf switches ensure incredible reliability
- Complete with boxed interface on Spectrum models
- A wide range of Joystick compatible software readily available from W H Smith and leading computer shops or direct from us

ACCESS
BARCLAYCARD VISA

NEW

Conversion Tape I Only £4.95 – Converts seven leading arcade games to run with the Kempston Joystick: Horace Goes Skiing – Sinclair, Hungry Horace – Sinclair, Flight Simulation – Sinclair, Arcadia – Imagine, Penetrator – Melbourne House, Spectres – Bug Byte, Space Zombies – Mikrogen.

ALSO

Conversion Tape II Only £4.95 – Converts: Orbiter – Silversoft, Escape – New Gen, Tanx – DK'Tronics, Centipede – DK'Tronics, Spectral Invaders – Bug Byte, Cruising On Broadway – Sunshine, Frenzy – Quicksilva (Early Versions).

Joystick Compatible Spectrum Software now available from Kempsoft:
■ Astro Blaster ■ Blind Alley ■ Cosmic Guerilla ■ Cosmos ■ Cyber Rats ■ ETX ■ Frenzy ■ Frogger ■ Galaxians ■ Gulpman ■ Jet Pac ■ Joust ■ Knot in 3D ■ Mazeman ■ Meteoroids ■ Night Flite ■ PSSST ■ 3D Tunnel ■ Time Gate ■ Slippery Sid ■ Spookyman ■ Sheepwalk ■ 3D painter ■ Bozy Boa ■ Violent Universe.

Hardware I wish to order the following:		AMOUNT
☐ **New** Spectrum Joystick Interface, allows you to use any Atari/Commodore type joystick with Spectrum	@ £15.00	
☐ Spectrum Joystick including interface	@ £24.99	
☐ VIC 20, Commodore 64, Atari 400/800 Joystick	@ £14.50	
Please tick appropriate boxes All prices include P&P and VAT. Overseas prices add £4.00 P&P	TOTAL

5 SINCLAIRVOYANCE The days of amateurism are over and soon the costs of entering the Sinclair market could mean that the days of the small company are numbered.

9 SINCLAIR USER CLUB With the cessation of the National ZX Users' Club, we make a special offer to former members to allow them to continue to take advantage of club facilities.

13 NEWS Clive becomes a knight; Timex announces its plans for its new computers; and much more.

17 LETTERS Tips on programming, comments on articles, and views on software.

23 HARDWARE WORLD We expand our add-on reviews this month to take account of the increasing number of ways you can improve your machine.

31 SOFTWARE SCENE Another three pages of cassettes for the Spectrum and ZX-81.

36 CAMBRIDGE AWARD Your chance to become the first holder of the Cambridge Programming Award.

43 SPECTRUM EXPANSION Cover story. Stephen Adams reviews the alternatives to upgrading your 16K Spectrum to 48K.

48 DISASSEMBLERS John Gilbert follows his article on assemblers by assessing their companions, the disassemblers.

57 PROGRAM PRINTOUT Fourteen pages of listings for the Spectrum and ZX-81.

78 USER OF THE MONTH Our popular feature is about a businessman and his wife who have found the ZX-81 to be a great help in their company.

86 PROGRAMMING Nick Goldman and Jerry Seabridge show how two programs can be merged on the ZX-81.

93 BOOKS John Gilbert reads more from the growing Sinclair bookshelf.

101 STARTING FROM SCRATCH Our regular article for those who have just been converted to the wonders of Sinclair computers.

102 SINCLAIR SIMON Simon and the knighthood.

110 HELPLINE Andrew Hewson turns his attention to machine code programming.

117 MIND GAMES In a special three-page article, Quentin Heath makes a last journey to Middle Earth and answers many of the queries about The Hobbit.

NEXT MONTH

Continuing our series of articles on programming, we give some hints on how to write your own chess program and we speak to Bill Matthews, the man who holds the purse strings at Sinclair Research.

Spectrum 16k-48k Series B ONLY £22!

SINCLAIR ADD-ON OFFER

from 16k – 48k

With our ME48 memory expansion add-ons your ZX Spectrum can increase its capacity by up to three times.

★ No soldering ★ easy to fit ★ simply plug in ★ fully guaranteed ★ no loss of memory through wobble or white out.

NB. Before ordering your Spectrum add-on please check which Spectrum you have in your possession.
At the back of the ZX Spectrum the metallic contact strips can be clearly viewed. In the series A the space separating the strips is the same width as the strips. In the series B the strips are twice as wide as the space between.

SPECTRUM	ZX81
ME16-48 Series A £34.50	ME1-16 £19.25
Series B £22.00	ME1-64 £44.25
ME16-80 Series B £46.00	

FITTING/TESTING SERVICE. While-you-wait, personal callers Monday-Friday 9.30-5.00, £3.00.
By return registered post £7.00.

FANTASTIC

ZX81 & SPECTRUM SS1 SPEECH SYNTHESISER

SIZE 3½"x 5¾"x 1"

- **★ Make amazing speech effects with your ZX Spectrum.**
- **★ Specially designed for use with your Spectrum. Just plugs in, no dismantling or soldering.**
- **★ No power pack, leads, batteries or other extras.**
- **★ Ample volume for built in loudspeaker, Manual Volume Control on panel. Can be plugged in to Existing hi-fi system.**
- **★ Uses no memory addresses.**
- **★ Free Dictionary of Sounds.**

SS1 SPEECH SYNTHESISER £39.00

NEW LEVEL-VU PRISM

Allows you to see your tape counter without moving from your seat!

- **★ attaches easily to recorder body or lid**
- **★ fits most recorders including Radio Shack, Vic-20, Atari**
- **★ greatly magnifies counter numerals**

LVP £3.99

★ All items are normally despatched within 24 hours

COMPUTER ADD ONS
7-9 Thane Works, Thane Villas, London N7 Tel: 01-609 7919

NEW TAPE LOAD ANXIETY?

Vu-Load takes the frustration out of loading your ZX81 or Spectrum programmes.

- **★ helps to ensure programme load every time**
- **★ monitors tape output level**
- **★ gives positive save indication**
- **★ detects blank tape without disconnecting cassette wires**
- **★ ready to use – no wiring**

TL £19.99

NEW EXTERNAL MEMORY FOR THE SPECTRUM!

Upgrade your Spectrum to 48K with the new ME16-48E suitable for series A and B

- **★ Plugs into the back of your Spectrum**
- **★ Specially designed to avoid loss of memory through wobble or white out**
- **★ Has a 'piggy back' connector so you can add other peripherals like the Spectrum printer etc.**

ME 16-48E £39.95

NEW MICRO TAPE save it – first time on American microtape

★ specially designed for use with micro computers
★ Low drop out occurance ★ uniform coating ★ High saturation level
★ So good, we can guarantee them for 12 months
AUDIO DIGITAL AD.C12 – 55p AD.C15 – 60p AD.C20 – 65p

★ Free 23 line memory test programme with every add-on.

Post and packing still only 40p per item.

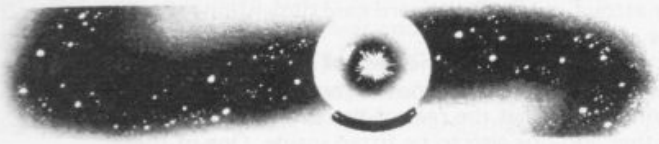
COMPUTER ADD-ONS 7-9 Thane Works, Thane Villas London N7

Market loses its innocence

FOR THOSE ROMANTICS who used to find the amateurism of much of the Sinclair market appealing, we have some bad news. There are signs that the dreams of being able to write a brilliant program and then make a fortune from it using the garage as business premises may soon be unfulfilled.

The latest signs of the major change are the entry of the record companies into the market. Virgin and K Tel have



been the first to take the plunge but no doubt others will follow quickly, bringing with them all the razzmatazz and hype associated with the promotion of pop music.

An example of what to expect was the launch of Virgin Games at the Garden Club, the former roof garden at Derry and Toms. Loud music, large crowds, a Maggie Thatcher impersonator and, almost as an afterthought, the games being shown and their writers wandering around looking a little lost.

That may have been the latest sign but the moves away from the old, friendly, low-key activities of the early market when a few people selling games from wooden desks was considered a big event have been happening subtly for the last year.

The changes in the popular ZX Microfairs have shown what has been happening. Originally it was a small group of companies selling their wares on bare trestle tables, with little thought given to presentation. At the recent fair at Alexandra Pavilion in north London, a number of bigger companies like Quicksilva, dK'Tronics and Kempston had specially-designed stands and more companies are thinking of doing the same thing.

At the same time, Imagine made a name for itself by being the first company not to follow the usual method of steady growth. After the founders broke with Bug-Byte, they announced their presence with colour advertisements through-

out the home computer press to establish themselves quickly in a booming market.

It is a move which appears to have been a success, with many of the company's games featured regularly in the Top Ten software sales.

The effect of all the changes has been to raise the threshold of entering the Sinclair market. It is still possible to follow the 'amateur' route of writing a program and to start selling it through small advertisements in *Sinclair User*. That will no doubt continue to prove profitable but for a program to make really big money it will now need a major launch. Without strong financial backing and a supporting catalogue of other software, that would be impossible.

It would be much easier to go to an established company and let it look after the marketing and to pay you a royalty on the sales. Apart from allowing you to enter the market more quickly, it also removes what can be a major headache.

The eventual change of the market into something more similar to that of records has been mentioned previously a number of times in this column. While many people might feel that it is a change for the worse, it is one which must happen if home computing is to fulfil its promise of becoming a major leisure industry in the next few years.

When the market was new and small, people were more willing to tolerate delays and poor quality because that was to be expected from new and inexperienced developments. As more people have become hooked by home computing, the tolerance level has fallen.

If sales are to continue to grow, the need for tips on how to do many of the basic things in the hobby, such as LOADing and SAVEing, must disappear. No-one expects to buy a record

and then find they have to spend half an hour adjusting a music centre before they can play it.

In the same way people should be able to buy a program and have no difficulty LOADing it. The introduction of ROM cartridges is a great help in that, as has already been recognised in the States.

For those who are worried that the ethics of the music industry may be the deathknell of home computing as they know it, it has a number of differences which should ensure that does not happen. For a start, while it is possible to have Top Ten-selling cassettes we are unlikely to have Top of the Cassettes on television and day-long radio programmes promoting the latest releases.

Also, unlike the music industry, it is possible to derive plenty of enjoyment from using a computer without having to buy other people's programs. It can be costly making your own record but for the computer you have to pay only for the cassette and take time to record your program and, after all your work, you may be able to make a fortune.

Arise, Sir Uncle Clive

WE CONGRATULATE Sir Clive on his knighthood, even if it presents some problems to his many supporters. Do they call him Sir Uncle Clive or Uncle Sir Clive? We are sure the difficulty will not last for long.

There can be no doubt that he has done a great job for the British computer industry and has made the sector one of the few bright lights in the general gloom of British manufacturing. That has been achieved on the success of only one good idea, the cheap home computer.

That resulted in a rapid rise to fame and fortune. It also engendered a belief that he can be seen as a saviour of British industry and that only stimulates growing pressure—increased by the news that he has an option on the factory of that former saviour of Northern Ireland, John de Lorean.

The more honours Sir Clive receives, the more the pressure grows and the more difficult it will be to live up to expectations.

dk'tronics

ZX KEYBOARD FOR USE WITH 81 SPECTRUM

Our new cased keyboard has 52 keys, 12 of which are used for the numeric pad. The numeric pad offers useful features, you can cursor with one hand and it will be a boon for anyone who enters a lot of numeric data. The pad is a repeat of the 1 – 9 keys, it also has a full stop and a shift key. The numeric pad keys are red in colour, the normal keyboard keys are grey, with the case being black, which results in making the keyboard very attractive. The keyboard case dimensions are: 15" x 9" x 2½". The computer (either 80/81 or Spectrum), fits compactly inside.

You will have to remove the computer from it's original case, it is then screwed to the base of the case. The case has all the bosses already fitted and the screw holes are marked. Also fitted inside the case is a mother board (81 model only) which allows 16K, 32K and 64K to be fitted in the case. All connectors are at the rear of the case i.e. Power, Mic, Ear, T.V. and the expansion part. The case is large enough for other add-ons also to be fitted inside. One of these could be the power supply then you could very quickly fit a mains switch or a switch on the 9V line. This means you have a very smart contained unit.This case does not stop you from using any other add-ons that you may have eg Printer etc. We are convinced that this is the best keyboard available at present. It offers more keys and features than any other keyboard in it's price range.

NOTE ooo

The case can be purchased separately with the keyboard aperture uncut, therefore if you possess one of our early uncased keyboards, or in fact, any other suppliers' keyboards these could be fitted. The keyboard is connected to your computer by a ribbon cable and this has connectors fitted which simply push into the Sinclair connectors. It is a simple two minute task and requires no electronic skills. This keyboard does not need any soldering. Please specify on order whether you require the ZX81 or Spectrum case.

SPECTRUM MODEL

This is supplied with Spectrum legends, and a slightly different base for fitting the Spectrum inside, again, all the connectors are at the rear of the case and there is plenty of room for the power supply (and other add-ons). Should you wish to change, we can supply both the Spectrum legends and details of updating your case which will enable modification from the ZX81 to Spectrum. PLEASE specify on your order whether you require the ZX81 or Spectrum inside.

£45

MEMORY FOR ZX 81

16K Memory £22.95
64K Memory £52.95
16K (Uncased) £19.95
64K (Uncased) £49.95

SPECTRUM MEMORY

MKI £30
MKII £30

FLEXIBLE RIBBON CONNECTOR

If you have ever had white outs or system crashes this could be the answer. It stops the movement between the computer and the RAM expansion, it is supplied with a ribbon 6 inches long, with a male connector at one end and a female at the other.

ZX 80/81 SPECTRUM HARDWARE

SPECTRUM/81 TOOLKIT BOTH AT ONLY £6.95

This is the toolkit which won acclaim in the feature in the August 1982 issue of Sinclair User. "It is the most impressive programm, fast in execution with clear and full instructions . . . . it stands out from the rest of the field". The ZXED is a powerful editor for use on the expanded ZX81. It is intended for use by the serious BASIC programmer and offers several useful and time saving features most helpful during all stages of program development. The facilities provided are as follows: ALTER, BYTES, COPY, DELETE, FIND, HELP, INSERT, KEEP, MOVE, RENUMBER, AND VERIFY.

The Spectrum Toolkit contains most of the features above plus autoline numberer and append, and will run in the 16K and 48K Spectrum.

4K GRAPHICS ROM £24.95

This module unlike most other accessories fits neatly inside your computer under the keyboard. The module come ready built fully tested and complete with a 4K graphic ROM.This will give you an unbelieveable number of extra pre-programmed graphics. This now turns the 81 into a very powerful computer with a graphic set rarely found on larger more expensive machines. In the ROM are lower case letters, bombs, bullets, rockets, tanks, a complete set of invaders, graphics and that only accounts for about 50 of them, there are still approximately 400 left (that may give you an idea as to the scope of the new ROM). However, the module does not finish there, it also has a spare holder on the board which will accept a further 4K of ROM/RAM. This holder can be fitted with a 1K/2K/RAM and can be used for user definable graphics so you can create your own custom character sets.

SPECTRA-SOUND

The so called speaker in your Spectrum is really only a 'buzzer'. With the DK Tronics "SPECTRA SOUND" you can generate fully amplified sound through the speaker on your T.V. set. SPECTRA-SOUND is a very simple but highly effective add-on. This means that you no longer have a faint beep but a highly amplified sound, which can be adjusted with the TV volume control.

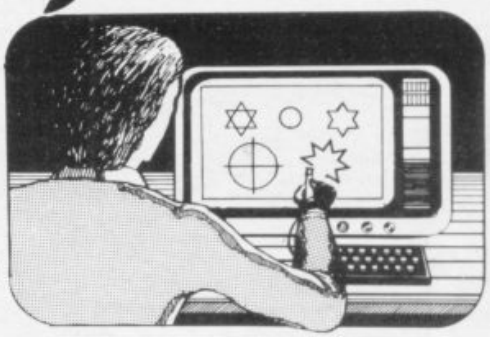
The SPECTRA SOUND fits compactly and neatly inside the Spectrum case and is connected by three small crocodile clips.

NEW AT ONLY £9.95

£19.95 Light Pen

LIGHT PEN

The pen enables you to produce high resolution drawings on your own T.V. screen. The controlling software supplied with the light pen has 16 pre-defined instructions. These are chosen from a menu positioned at the bottom of the screen next to the pen.



You can utilise the menu for changing colour (Border, Paper, Ink). Drawing circles, arcs, boxes, lines. You are also able to fill any object with any colour, and insert text onto the screen at any chosen place. Of course you can also draw freehand. There is a feature to retain the screens and animate. On the 48K Spectrum you can retain 5 screens.

You can also use the machine code on it's own in your own programs, for selecting out of a menu etc. The software provided will return with the X,Y, cords for it's position on the screen.

The light pen is supplied with a control interface in order to adjust the sensitivity/pen alignment.

This simply plugs into the ear socket on your spectrum.

Should you require further details please send a S.A.E.

"IT LOOKS NICE BUT WHAT THE HELL CAN I DO WITH IT?"

Every ZX SPECTRUM Print'n'Plotter Jotter has 100 pages of finely printed screen grids.

50 for the high resolution screen. 50 for the normal character screen.

With these at your disposal you can plan practically any graphics print-out to program into your computer.

The high-resolution PLOT grid shows every one of the 45,060 pixels! Every one printed. Every one with its co-ordinate numbers. This gives you enormous graphics power to DRAW, PLOT, CIRCLE, PLOT OVER and so on in any position or screen building up graphic drawings, charts, maps . . . in fact anything without the complications of guesswork, integer out of range, or wrongly positioned pixel colours which change PRINTed INK characters!

The normal character PRINT grids on the other hand will allow you to be specific about PRINT AT, TAB, PRINT OVER, SCREEN$ and INK/PAPER in direct co-ordination with PLOT . . . you see every page is printed on **high quality tracing paper** . . . ideal to overlay on to illustrations and 'copy' or co-ordinate.

And there's another bonus, because each page contains 24 User-definable grids — **2400 per pad!**

With 50 pages of PLOT grids, 50 pages of PRINT grids 2400 user-definable grids, a set of colour pens, a printed PIXEL RULER and our Special Offer of demo programs, IT'S THE BEST VALUE IN ZX GRAPHICS PROGRAMMING.

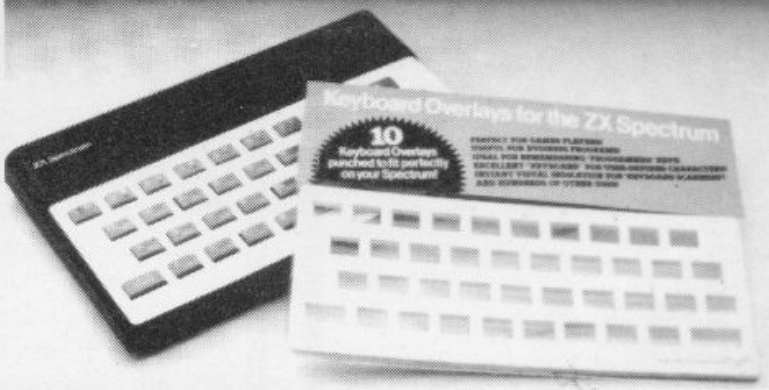
"NOW WHICH KEY DO I PRESS TO SHOOT DOWN THE THING FROM MARS?"

Ever forgotten which key to press when playing a game?
Do you suffer from a mind-boggling mass of programmed keys?
Do you write programs that use different keys to perform various functions? If so, we have just the thing for your ZX SPECTRUM.

A pack of Print'n'Plotter Keyboard Overlays.

Just write the function or functions under each key you program and keep the overlay for the next time you play the game.
Of course there's lots of more uses you will find for our OVERLAYS, user defined characters, keyboard scanners, mathematical programs, business uses — to name just a few.

There's TEN OVERLAYS to a pack — so you can program with impunity! And they fit perfectly onto your standard ZX SPECTRUM KEYBOARD. Each OVERLAY is printed with the cursor movement key directions and there's room for program name etc.



A SPECTRUM CONSOLE THAT EVERYONE CAN AFFORD!

For the cost of a 'games' cassette you can have a truly professional console for your SPECTRUM!

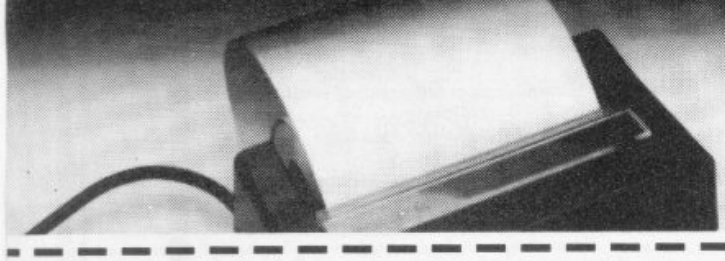
We've cut costs (not cut quality) by designing a self-assembly method using relatively inexpensive materials like strong corrugated board.

The result is a console that's tough, light, highly finished and capable of giving years of useful service.

Facilities include ergonomic keyboard angle, access to rear of machine, choice of P.S.U. internal or external, and alternative of Printer on-board or cassette storage area. Fully illustrated instructions are included.

"PRINTER PAPER THAT WORKS? I DON'T BELIEVE IT!"

Five rolls of our PRINTER PAPER will only cost you £12.50 including postage, packing and VAT! And you'll gain a great deal more!
It prints beautifully. It's not too thick. It's not too shiny. Print is black — not grey. It actually feeds through the machine!
See for yourself only £12.50 including everything. It's a bargain!



Post today to Print 'n' Plotter Products, 19 Borough High Street, London SE1 9SE or phone: 01-403 6644 (General) or 660 7231 (Credit Card Sales).

Hestacrest is giving a discount on account

BOTH SINCLAIR machines are being used for business applications by small companies and individuals who want to keep their finances in order. There are many good programs on the market which take care of small company finances and as a result we are offering some of the best business software for both machines.

There are two types of accounts preparation programs for both machines. The **Sole Trader/Partnership** program deals with the accounts of a company which has up to four partners. The second program deals with a limited company's accounts. For all games enthusiasts we are offering new games from Mikro-Gen and Saturn Developments.

The offers are open only to members, although members enrolling this month can take advantage of the offers by including orders with registration forms. Existing members should send cheques to: **Hestacrest Ltd,** PO Box 19, Leighton Buzzard, Beds LU7 0DG.

Saturn Developments, Dept PK, 37 Heol Durlais, Birchgrove, Swansea, SA7 9LT.

Mikro-Gen, 24 Agar Crescent, Bracknell, Berkshire. RG12 2BK.

Special fee for former National ZX User members

Welcome offer to Nationals

FOLLOWING the ending of the National ZX Users' Club, the Sinclair User Club is now the largest club for users of Sinclair computers. It began less than 10 months ago and now has more than 1,100 members.

We would like to welcome former members of the national club who still wish to take advantage of all the benefits of belonging to a large organisation. As a special offer to them we are willing to offer for a limited period a special membership fee.

For only £11 they can have the benefits of joining the Sinclair User Club and joining the many others who have already seen what we have to offer.

The benefits include special exclusive discounts on most of the leading items of software and hardware. This month's offer can be seen on this page. Examples from recent months include the full range of software from Quicksilva and the Digital tracer from RD Laboratories.

To keep members in touch with what is happening in the club, two pages in *Sinclair User* are devoted to club news and there is a special cassette news-letter which is published every two months.

It includes news of the club, programming hints, programs and the number of the telephone advice service. That service has proved very popular and is available to members at most times for immediate help with any of their problems.

The club now has members throughout the world, including most parts of Europe, many in Africa, and one in Papua New Guinea.

Unfortunately we have to place a time limit on this special offer, the final date being August 31. We shall also need some proof of membership of the National ZX Club. The title page of a recent issue of *Interface,* complete with the date would be sufficient.

Sinclair User Club

Britain

Aylesbury ZX Computer Club: Ken Knight, 22 Mount Street, Aylesbury (5181 or 630867). Meetings: first Wednesday and third Thursday of the month.

Basildon Microcomputer Club: Roger Sims, Wickford 63032, after 6.30pm. Meetings every other week on Tuesdays from 7.30 to 10pm at Healey Management Services, The Hemmels, Laindon, Essex.

Bristol Yate and Sodbury Computer Club: 99 Woodchester Yate, Bristol, BS17 4TX.

Colchester Sinclair User Group: Richard Lown, 102 Prettygate Road, Colchester CO3 4EE.

Doncaster and District Micro Club: John Woods, 60 Dundas Road, Wheatley, Doncaster DN2 4DR; (0302) 29357. Meetings held on second and fourth Wednesday of each month.

Eastwood Town Microcomputer Club: E N Ryan, 15 Queens Square, Eastwood, Nottingham NG16 3BJ.

Edinburgh ZX Users' Club: J Palmer (031 661 3183) or Ken Mitchell (031 334 8483). Meetings: second Wednesday of the month at Claremont Hotel.

EZUG-Educational ZX-80–81 Users' Group: Eric Deeson, Highgate School, Birmingham B12 9DS.

Furness Computer Club: R J C Wade, 67 Sands Road, Ulverston, Cumbria (Ulverton 55068). Meets every other week on Wednesday evenings.

Glasgow ZX-80–81 Users' Club: Ian Watt, 107 Greenwood Road, Clarkston, Glasgow G76 7LW (041 638 1241). Meetings: second and fourth Monday of each month.

Gravesend Computer Club: c/o The Extra Tuition Centre, 39 The Terrace, Gravesend, Kent DA12 2BA. Bi-monthly magazine and membership card.

Hassocks ZX Micro User Club, Sussex: Paul King (Hassocks 4530).

Inverclyde ZX-81 Users' Club: Robert Watt, 9 St. John's Road, Gourock, Renfrewshire PA19 1PL (Gourock 39967). Meetings: Every other week on Monday at Greenock Society of the Deaf, Kelly Street, Greenock.

Keighley Computer Club: Colin Price, Redholt, Ingrow, Keighley (603133).

Lambeth Computer Club: Robert Barker, 54 Brixton Road, London SW9 6BS.

Liverpool ZX-Computer Centre: Keith Archer, 17 Sweeting Street, Liverpool 2.

Merseyside Co-op ZX Users' Group: Keith Driscoll, 53 Melville Road, Bootle, Merseyside L20 6NE; 051-922 3163.

Micro Users' Group: 316 Kingston Road, Ewell, Epsom, Surrey KT19 0SY.

National ZX-80 and ZX-81 Users' Club: 44-46 Earls Court Road, London W8 6EJ.

Newcastle (Staffs) Computer Club: Meetings at Newcastle Youth and Adult Centre, Thursday, 7.30 to 10 pm. Further information from R G Martin (0782 62065).

North Hertfordshire Home Computer Club: R Crutchfield, 2 Durham Road, Stevenage; Meetings: first Friday of the month at the Settlement, Nevells Road, Letchworth.

Northern Ireland Sinclair Users' Club: P Gibson, 11 Fitzjames Park, Newtownards, Co Down BT23 4BU.

North London Hobby Computer Club: ZX users' group meets at North London Polytechnic, Holloway Road, London N7 each Monday, 6pm.

Nottingham Microcomputer Club: ZX-80–81 users' group, G E Basford, 9 Holme Close, The Pastures, Woodborough, Nottingham.

Orpington Computer Club: Roger Pyatt, 23 Arundel Drive, Orpington, Kent (Orpington 20281).

Perth and District Amateur Computer Society: Alastair MacPherson, 154 Oakbank Road, Perth PH1 1HA (29633). Meetings: third Tuesday of each month at Hunters Lodge Motel, Bankfoot.

Regis Amateur Microcomputer Society: R H Wallis, 22 Mallard Crescent, Pagham, Bognor Regis, West Sussex PO21 4UU.

Scunthorpe ZX Club: C P Hazleton, 26 Rilestone Place, Bottesford, Scunthorpe; (0724 63466).

Sheffield ZX Users' Club: A W Moore, 1 Ketton Avenue, Sheffield S8 8PA, Yorkshire. Annual subscription 10, monthly newsletter and cassette.

Sittingbourne: Anurag Vidyarth (0795 73149). Would be interested to hear from anyone who wants to start a club near the Medway towns.

Stratford-on-Avon ZX Users' Group: Chris Parry, 16 Sackville Close, Stratford-on-Avon, Warwickshire.

Swansea Computer Club: B J Candy, Jr Gorlau, Killay, Swansea (203811).

Swindon ZX Computer Club: Andrew Bartlett, 47 Grosvenor Road, Swindon, Wilts SN1 4LT; (0793) 3077. Monthly meetings and library.

Sutton: Sutton Library Computer Club, D Wilkins, 22 Chestnut Court, Mulgrave Road, Sutton, Surrey SM2 6LR.

Worle Computer Club: S W Rabone, 18 Castle Road, Worle, Weston-super-Mare BS22 9JW (Weston-super-Mare 513068). Meetings: Woodsprings Inn, Worle, on alternate Mondays.

ZX-Aid: Conrad Roe, 25 Cherry Tree Avenue, Walsall WS5 4LH. Please include sae. Meetings twice monthly.

ZX Guaranteed: G A Bobker, 29 Chadderton Drive, Unsworthy, Bury, Lancashire. Exchanges information and programs throughout the country.

ZX-80/ZX-81 Users' Club: PO Box 159, Kingston-on-Thames. A postal club.

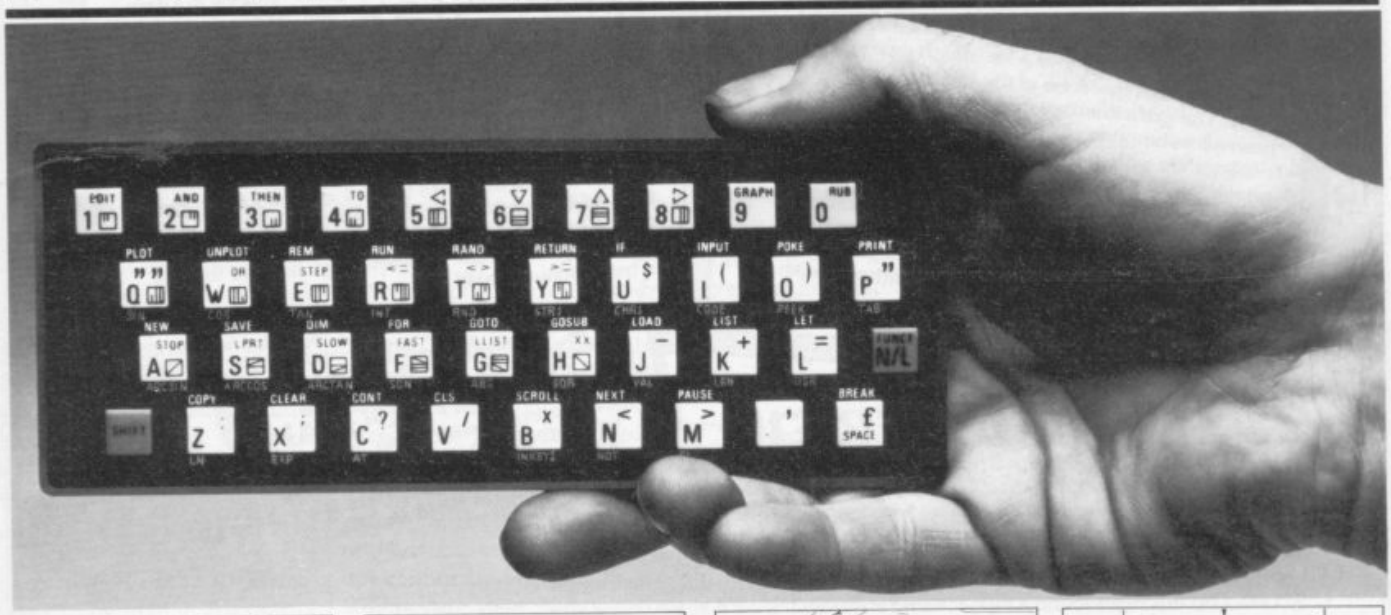
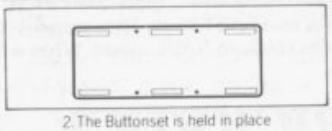
NOW. A ZX81 PUSH-BUTTON KEYBOARD FOR UNDER £10.

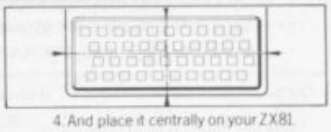


1. Make sure the original keyboard is clean and check that all the keys function.



2. The Buttonset is held in place by self-adhesive pads.

3. So all you do is remove the protective backing.



4. And place it centrally on your ZX81.

At last there's a really cheap but efficient way of ironing out the ZX81's only real bug: its keyboard. The Filesixty Buttonset offers:

■ A full-travel calculator-type moving keyboard for only £9.95. ■ Installed in seconds. The peel-off adhesive backing means you just register into position and press. ■ No messy labels, dismantling or soldering. ■ 3 groups of colour keys to pick out shift, numerals and newline. ■ Precision moulded in ABS to match your ZX81, with contrasting legends for maximum legibility.

Filesixty Ltd., 25 Chippenham Mews, London W9 2AN, England.
Tel: 01-289 3059. Telex: 268 048 EXTLDN G 4087.

Orders to Filesixty Ltd., FREEPOST, London W9 2BR.

Cheques/PO made payable to Filesixty Ltd.

EAST LONDON EXCLUSIVE

ZX81 RAM-PACKS FLAP

and when RAM packs flap, programs crash because of edgy connectors (so children! keep off!).
Now East London Robotics offer a unique product:-

TRADE IN YOUR ZX 81.

Introducing the **MAXIMEM ZX81.** A ZX81 with 32k or 64k RAM fitted INSIDE the case (children come back!)
MAXIMEM ZX81 – the most affordable 32 or 64k micro in the world.

EAST LONDON ROBOTICS

MAXIMEM ZX81

32k-£39 PLUS ONE USED 1k ZX81

64k-£59 PLUS ONE USED 1k ZX81

The MAXIMEM 32 and 64k is a modified ZX81 and not just a RAM pack. We give a six month guarantee on the computer, regardless of the age of your trade-in ZX81. The extra memory uses only a quarter of the power consumption of a 16k plug-in memory, and does not interfere with any standard add-ons, such as printers, RS232 or other interfaces.

Trade in your ZX81 by post or over the counter at our premises. (Phone first to check current delivery). Trade-in ZX81s must be clean and in working order. Send and receive the computer only, without manuals, power supplies etc.

EAST LONDON ROBOTICS

SPECTRUM 48-£23
32k MEMORY EXTENSION

Plug the chip-set (Issue 2) or circuit board (Issue 1 £35) into the sockets provided by Sinclair and you have a standard 48k Spectrum, fully compatible with all Sinclair add-ons and very low in power consumption. No soldering is required. Fitting and removal are easy. The SP48 carries our full warranty and is upgradable on a part-exchange basis to the SP80 for £28.

SPECTRUM 80-£46
PAGED 64k MEMORY EXTENSION

Fitting, power consumption and add-on compatibility are identical to the SP48 (Issue 1 version £50). It can be used as a standard 48k, but software instructions can switch to a second page of 32k. Although not recommended for the complete beginner, the SP80 is of tremendous benefit to the serious user.

Fit and Test Service: At our premises £3
By registered post £7

STOP PRESS
NEW 80K PROGRAMS
For Spectrum with SP80. Enquiries on 01 474 4430. We regret our 48K to 80K part-exchange service is available only to SP48 owners.

ZX SLOWLOADER £10

Loads ZX81 tapes into your Spectrum. A recent letter describes it best.

Dear Sir, Just a line about your excellent Slowloader.
I bought it because I was nearing the completion of a project which uses practically everything in 16k RAM including a string array (DIM 629,7) which took 4 hours hard graft to bash in. I really did not fancy doing it all again.
SLOWLOADER twice found a tape-loading error. So I SAVEd again onto a short, high-quality tape – and this time it went straight in. Two minutes to take out the SLOW and FAST lines, 10 to renumber the PEEKs and POKEs, 20 to add some colour and a few BEEPs, and the thing was ready to SAVE again. What a little masterpiece!

All products on this order form are in stock at the time of going to press.

Same day dispatch for phoned Access and Visa orders.

To East London Robotics Ltd. Please send by return (tick items required).

Knighthood for Clive

SIR CLIVE SINCLAIR received a knighthood in the Queen's birthday honours. He continues to be a leading figure in the world of computing and microelectronics and his company has sold more than one million computers world-wide.

At present his company is developing a flat-screen television and an electric car.

The names for the honours list are submitted to the Queen by the Prime Minister, who selects outstanding figures in industry and the arts. Margaret Thatcher is known to be an admirer of Sir Clive's enterprising ability. She presented the Japanese Premier with a Spectrum on her tour of Japan last year.

Sir Clive is very happy about the award and says: "The award of a knighthood is a truly great honour and one I value very highly. It was completely unexpected and a wonderful surprise. More than ever I feel committed to achieving success, in and for Britain."

SIR CLIVE SINCLAIR
'Truly great honour'

Electric car is now closer

TWO MAJOR STEPS have been taken by Sir Clive Sinclair towards fulfilling his ambition of manufacturing the first mass-produced electric car. He has negotiated an option on the De Lorean car plant at Dunmurry, Ulster and has created a new company, Sinclair Vehicles Project.

Sinclair Research is quick to point out that this is Sir Clive's venture and has nothing to do with it. The new company has taken complete control of the car manufacturing idea.

The team which runs the company says that De Lorean's former factory would be ideal for manufacturing. It is one of the most advanced plants in the country and has the proper assembly-line equipment to produce the electric car. It contains equipment for plastic welding, which would be ideal.

Sir Clive has talked to the Industrial Development Board of Northern Ireland about the use of the facilities at Dunmurry.

Ally is pally

THE EIGHTH ZX Microfair is to be held at Alexandra Palace, London on August 20 from 10am to 6pm. The previous show at that venue in June was the most successful to date. It attracted more than 8,500 people, according to organiser Mike Johnston, compared to the show held last August which attracted almost 7,000 visitors.

Johnston expects an even bigger attendance at the next show and hopes that the Microdrives and RS232 will be on display.

Advance tickets can be obtained from Mike Johnston, ZX Microfair, 71 Park Lane, Tottenham, London, N17 0HG.

Telesoftware gets security device

A NEW SECURITY system has been introduced on Micronet 800, the database system to which users of microcomputers can link by telephone.

The system will enable Micronet to select which software can be listed or copied once it has been downloaded on to a user's computer.

It will mean that some programs can be run on a computer, such as the Spectrum, but cannot be SAVEd. Robin Wilkinson, a spokesman for Micronet, says:

"Users will be able to download a game on to a Spectrum by telephone but will not be able to LIST it or COPY it on to tape. It will be like paying 20 pence for an arcade game every time you want to play it. When you switch off the computer the game will be lost."

Several software companies are interested in putting software on to Micronet but will not consider such a move until some form of protection is given.

One such company is Silversoft and Douglas Berne, a spokesman for the company says:

"We would not consider putting software on to Micronet unless we could be given a guarantee that the software would be protected."

Chess prize

INTELLIGENT Software and Sinclair Research are offering a prize of £5,000 to the first person who can write a chess program to beat the Cyrus-IS Chess in a series of games.

Sinclair Research has acquired the game recently for its Spectrum software library. The program is based on Cyrus chess which won the second European Microcomputer Chess Championship.

Its features include cursor movement of pieces, replay and take-back options and the ability to function as a normal two-player game board. A spokesman for Sinclair Research says:

"We have made no plans for matches yet. We are waiting for people to contact us."

National club run ends

THE NATIONAL ZX Users' Club, run by Tim Hartnell, has been disbanded after two years of operation. The reason, according to Liz North, an organiser of the club, was "because of the rising number of computer publications on the market." Another reason was that the club was providing difficulties for the organisers because of its size.

The club used to send a magazine, *Interface,* to its members but because of the number of machine-specific computer publications on the market recently, *Interface* no longer served a useful purpose. North said:

"*Interface* was the first specialist magazine for Sinclair computers. Now *Sinclair User* and *ZX Computing* have started and our magazine is no longer as useful as it was."

The club had a membership of thousands. The members were informed of the closure by a letter in *Interface* and those who still had outstanding subscriptions were offered books from a range of Interface publications.

● Sinclair User Club offer for former ZX Users' Club members, page 9.

JRS finds a winner

THE JRS AWARD for Programming has gone to David Prigmore of Alverston, Derbyshire. The winning entry was a ZX-81 game called **Star Defence** which JRS Software is marketing.

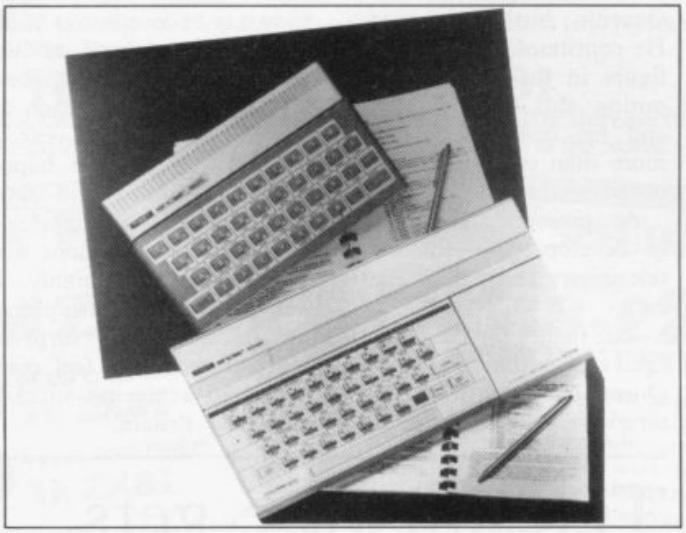
Its author is studying for A levels which include computer science. He hopes to enter the computer industry when he leaves school. John Stubbs of JRS says of the competition: "We were looking for games, utility and business programs. Star Defence was by far the best piece of software submitted."

Home coursing

COMPUTER COURSES with a difference are being held in and around Weston-super-mare. The courses are given by Dr Roger Stenner and can be taken at the home of the student or at a centre.

Group or individual tuition is available and fees range from £4 to £7.50 an hour. For more information, 0934 417606.

Timex reveals upgrade plans



TIMEX has revealed its plans for two new microcomputers, the 1500 and 2048, in the States. The specifications of the new computers were shown for the first time at a computer show in Chicago.

The 1500 will be an upgraded version of the TS-1000, the U.S. version of the ZX-81, which has attracted some criticism in the States. The upgrade will have a keyboard which resembles that of the Spectrum.

Unlike the ZX-81, the 1500 will have 16K RAM as standard and an extra 32K RAM module can be fitted to provide 32K. A software cassette, similar to the Horizons tape which is included with Spectrums, will be supplied with each package.

The TS-2048 is the Timex version of the Spectrum. The specifications show the machine to be slightly superior to the Spectrum, although nobody has yet been able to benchtest it.

There are extra commands on the machine according to the specifications. They include FREE, which usually checks memory size; STICK, to control two joysticks; ON ERR, to cope with errors in a program without making it crash; and SOUND, which is like BEEP in every respect except that the volume can be controlled.

The computer is longer than the Spectrum and seems to incorporate a cartridge port into which ROM cartridges can be slotted. No firm release date has been given for the machines but it is hoped that they will appear by the end of the summer.

Software sold on hard disc

SEVERAL RECORD companies have moved into the software business by including microcomputer programs on their latest record releases.

The move was started by EMI when it produced a single called *Camouflage,* while side B contains the ZX-81 programs. A spokesman for EMI says: "You could say that the state of play at the moment is healthy. We have had a very encouraging response from dealers."

Another computer single has been released by record company Mainframe. It has put programs on side B of the disc. The programs on the record are for the ZX-81, Spectrum, BBC microcomputer and Apple II.

Genetic Records Ltd has put a Spectrum program on to a new album, called *XL1,* by Peter Shelley. The program needed five months to perfect and will work on a 48K Spectrum.

The album was released in June and features 10 musical tracks as well as the program. The graphics displayed on the screen by the computer are synchronised with the music.

One difficulty which has arisen about the use of the records occurs when people try to record the computer tracks on to tape using a stereo system. The reproduction of computer programs using stereo is not good because of phasing problems. It is recommended that only one channel of a stereo is used and the other should be turned down.

EMI says that no complaints have been made about reproduction difficulties, although no information about the use of the computer tracks has been given on record sleeves. The company will, however, be examining the problem closely.

NEW!! SPECTRUM BRIDGE PLAYER
At last you can play Bridge against your Spectrum! Uses the Acol bidding system with Stayman and Blackwood conventions. With scoring and instant/replay facilities. The ideal complement to our Bridge Tutor programs.
48K Spectrum – £8.95

SUPERCHESS II
For Sinclair 48K SPECTRUM
THE BEST AT £7.95
● 7 levels of play ● Plays a variety of openings e.g. French Defense, Sicilian Defense, Ruy Lopez, Queen's Gambit etc. ● Self play mode ● Analyse mode ● Enhanced end-game play ● Recommended move option.

ORIGINAL SUPERCHESS
10 levels of play, plus many features
16k ZX81 £4.95 48k Spectrum £4.95

ZX DRAUGHTS
For 48K Spectrum – £5.95
16K Jupiter Ace – £6.95

16k SUPERCHESS £6.95
The best 16k Spectrum Chess program. 3 levels of play with playing strength similar to the 48k version's first three levels. Analyse mode, plays several openings e.g. Queens Gambit, Ruy Lopez, plus more features. Runs on 16k and 48k Spectrum.

SUPERCHESS II
With most of the features of the Spectrum version now available for
16K Jupiter Ace – £8.95
Lynx – £8.95

SPECTRUM BRIDGE TUTOR
Improve your Bridge with Spectrum Bridge Tutor. Uses the Acol bidding system including Blackwood and Stayman conventions. Each of the 40 hands illustrates a particular aspect(s) of the bidding and play. Following the card play is an explanation of those aspects highlighted in the hand. The correct bid and play must be made in order to progress but a help feature is included.
For 16k and 48k Spectrum –
Beginners (40 hands) £5.95
Advanced (40 hands) £5.95

COLOSSAL CAVES
(Adventure 1 by Abersoft)
Enter the Colossal Cave, discover the treasure left by the wizard. On your travels you will meet dragons, snakes, trolls and other denizons of the underworld. Be warned, this adventure can be addictive. Includes a save facility so that the adventure can be continued from the point reached when saved.
48K Spectrum £6.95

BACKGAMMON
Very popular.
48k Spectrum £5.95

SNAIL LOGO
An advanced implementation to the Logo turtle type graphics. Uses the original style Logo instructions to control the movements of a graphical Snail around the screen instead of a mechanical turtle. Includes the following features: ● Full operating system and Editor ● Comprehensive user guide with sample programs ● Multi-level Hierarchic Procedures ● Procedures with Parameters ● Recursive Procedures ● Nestable repeat loops ● Variables ● Colour and wall bouncing controls ● 25 Language Instructions, over 20 warning and error messages ● Commands to control the optional ZEAKER turtle.
48K Spectrum £9.95

ZEAKER TURTLE with Pen and obstruction sensors. Can be used with our Spectrum Snail Logo. The ZEAKER can be used with both the Spectrum and ZX81 or other micros with suitable parts.
ZEAKER in Kit Form – £52
ZEAKER Ready Assembled – £69.50
ZX81 Interface if required £13
Spectrum Interface £18.50
add £3 for P&P and 15% VAT

FLOATING POINT FORTH
Supports all Forth structures, the Zx printer and access to I/O ports. Has all the Spectrum hi-res. colour graphics, plot and draw and beeper facilities. Allows direct entry of machine code. Comprehensive user guide
48K Spectrum – £10.95

ORIGINAL SPECTRUM FORTH
Similar facilities to the floating point version but has only integer arithmetic.
16K and 48K Spectrum – £7.95

SUPERCODE
The ultimate Machine Code Tool Kit for the Spectrum with 60 plus routines. Both 16K and 48K versions on each cassette.
16K and 48K Spectrum – £6.95

Speech from the Spectrum 48k
SOFTALK I 'Multiwords' 70 plus words £5.95
SOFTALK II 'Spacegames' 80 plus words £5.95

BEEPER AMPLIFIER
Plugs directly to the Spectrum's EAR or MIC socket. Battery powered (not supplied)
£5.95
or SAVE £1 when ordered with any program
Please add 35p for p&p.

UK Prices include post & packing. Despatch within 48 hours of receipt of order. Send SAE for catalogue
(For orders outside UK add 80p for postage).

The Cheapest Rampacks In The World

Available Now

ZX SPECTRUM 32K RAMPACK

Simply plugs into user port at rear of computer and increases your 16K Computer instantly to 48K

£39.95

- Fully Compatible with all accessories.
- No need to open computer and invalidate guarantee.
- Why send your computer away and wait weeks for upgrade,
- Fully cased, tested and guaranteed.

ZX81 16K RAMPACK £19.75

ZX81 64K RAMPACK £44.75

Now make your Spectrum talk!

The Cheetah **"Sweet Talker"** just plugs into the back of the computer using the existing power supply. Fully cased. Easy to program any word, sentence or phrase. Simply incredible at **£34.95**

All Units: Fully Cased and Guaranteed. Secure No Wobble Design. Fully Compatible with all accessories.

PRICES INCLUDE VAT and P&P. *Delivery normally 14 days.* Export orders at no extra cost.

Send cheque/P.O. Payable to:—

Picking out variables

THE FOLLOWING tip may be useful. I at any rate had not realised the particular capacity of Sinclair Basic in question until recently. The ZX-81 is able to read a variable name out of a string and then evaluate the variable; and that may enable instructions to be passed to subroutines more compactly.

For example:

```
100 LET A$="DGH"
110 GOSUB AS 900
.....
100 LET A$="XHY"
320 GOSUB AS 900
.....
900 LET T=VAL
  A$(1)**VAL A$(2)+VAL
  A$(3)
910 RETURN
```

This saves several lines, each time the subroutine is called, over the alternative

```
100 LET A=D
110 LET B=G
120 LET C=H
130 GOSUB 900
.....
300 LET A=X
310 LET B=H
320 LET C=Y
330 GOSUB 900
.....
900 LET T=A**B+C
910 RETURN
```

R W Sharples, London NW7.

The bug search goes on and on

I READ with some interest the letter in the June issue about the bug in Hungry Horace — one which we discovered in January. I thought you may be interested in a bug in the Psion Planetoids which enables one to amass a limitless score without losing any ships.

Shoot all the asteroids except one and then manoeuvre the ship into the top right corner of the screen. With care, it is possible to position the ship so that a small piece appears in each corner. That, coupled with the fact that the ship seems mysteriously to turn yellow in that area, makes one immune to destruction. It is possible to fire from all corners of the screen.

Our high score using the technique stands at slightly more than 224,000. Also the game does strange things when pressing thrust and hyperspace simultaneously; try it. Surely it is possible to test games thoroughly for severe bugs like this?

James Randall, Surrey.

I WRITE with reference to Ben Beavell's letter in the June issue. I own a 16K Spectrum and have the Hungry Horace cassette. To get out of the third maze, you go straight to the right, waiting for the park-keeper, then go round that section until it is safe to escape to the top. My best score is 1,000,030. It took more than an hour. I also have the Space Raiders cassette and my best score is 10,070.

Nigel Power (15 years), Oswestry, Shropshire.

Drawing-in more critics

I AM WRITING to give my support to J Johnson, whose letter in the June issue criticised the illustrations which accompany the program listings.

It is easier to assimilate information if it is in a pleasant format, you say, but I am afraid that, like Johnson, I find nothing attractive about this particular format; it simply irritates me as it serves no useful purpose, adds nothing to the program listing, and wastes space which could be put to better use.

Also, I fail to see how a program listing without the comic characters and silly remarks would be impossible to enter. All that is really required is an interesting, well-written program printed with clarity and accuracy.

The present style of presentation may appeal to a minority of readers, perhaps to some of those in the under-16 age group. You should, however, bear in mind the results of the survey in your March issue which showed that only 29 percent of your readers are in that particular age-group, so please have some consideration for the rest of your readers.

Incidentally, why not conduct another survey asking readers what they like and dislike about *Sinclair User*? I think I have already made it clear what I dislike most. As for my favourite part of the magazine, that is undoubtedly the Andrew Hewson column, for which two pages are not sufficient. If all the space saved from the comic bits were given to Hewson, then *Sinclair User* would be worth twice the price.

J A Burgess, Knutsford, Cheshire.

J JOHNSON'S letter in the June issue concerning the "space-wasting stupid illustrations" is something with which I disagree. I and probably many others think the illustrations are a very good idea, although they could be smaller.

The user-defined graphics program in the same issue is probably a very good program but it wastes a whole page. The illustration takes 50 percent of the page and the program the other half. The page is wasted because everyone who has a Spectrum has the Horizons tape by Psion and on that tape is exactly the same program.

Please make illustrations smaller and think about whether programs are worth inclusion or whether everybody has them.

Philip Stanton, London NW11.

Quarts into pint pots

I OWN A 1K ZX-81 and look forward to your publication every month. I have noticed in the last few months that some of the programs for the 16K ZX-81 will work on the 1K. That is mainly because, when compiling the programs, various byte-saving techniques have not been used, e.g., SGN PI to equal 1 or not PI to equal 0 and so on.

So much so that the following programs, from your June issue, will in fact run on the 1K — Heavens Above, Codes, Space Supplies and Paranoid. Users of 1K should not give up because of a small memory. Check the listings of the 16K programs and re-write them slightly, maintaining all the important information.

David Hambly, Ilford, Essex.

Tight fit is better

I WISH to reply to Chris Powell's letter in the May edition. I do not know what he means by 'the misuse of the Basic language'. First, any use other than as an introduction to computing is strictly a misuse and, second, misuse or otherwise, I found it very useful.

It has improved my programs because I can fit in much more. His saying the tips are bad habits is ridiculous, because anything which improves programs can only be good and so long as the inexperienced programmer knows what he is doing, nothing can go wrong.

I do not agree that the ZX-81 is 'cheap and easy' to expand to 16K. I had enough trouble getting the ZX-81. You have only to look at *Sinclair Programs* and the program pages in *Sinclair User* to see how many 1K ZX-81 owners there are.

Simon Brunning,
London SW17.

Programming blind

READERS may be interested to learn that there is a way of programming the Spectrum without showing the listing.

The blanking-out of the listing can be achieved by having as the line in one's program:

1 inverse video PRINT true video " " ENTER (Then Edit)

When the line has come back for EDITING

1 true video CAP/SHIFT 8 once inverse video PRINT " " ENTER

One will notice that on the edited version, when using inverse video just before the PRINT statement, a beep can be heard, which means it is operative.

D S J Crompton,
Bristol.

Tape pirates kill market

HAVING OWNED a Spectrum for several months, I feel that I must write on the topic of illegal tape copying. Since buying a Spectrum, I have encountered only a few fellow-users and more than several of them have offered to copy any tapes I would like for my own use.

If that small cross-section of users is typical of users nation-wide, I feel that something should be done to suppress the illegal activity.

The video industry has already experienced pirate videos and it seems that the software industry has a similar fate in store. The video industry has already taken steps against illegal copiers — heavy fines and imprisonment — and I hope those actions will not be necessary in the software industry.

Copiers must realise that what they are doing is not only illegal, contravening copyright, but also is killing the industry from which they are feeding. They are stealing from software houses and from the original writer, who will have spent many hours perfecting a program and will expect to profit from such work.

In most cases, only about £5 is saved on each tape in the short run and, compared to the prices of some tapes for games computers, such as Atari, which often cost £30, it seems a small price to pay for games which are often excellent and offer such enjoyment.

So I appeal that next time you see a game which appeals to you, instead of breaking the law by obtaining a copy, often of very poor quality anyway, spend a small sum and buy from a legal source.

J H Fletcher,
Wirral,
Merseyside.

Random expansion is not repeated

I AM SURE many readers will have found Andrew Hewson's solution to Stephen Maltby's problem — April issue — useful and educational. Unfortunately Hewson stuck to the strict terms of Weltby's problem of picking five random whole numbers between 1 and 10 without repetition and so restricted the elegance of what might have been a much more comprehensive routine.

Anyone who tried Hewson's routine would have found it impossible to use for more than 50 percent of solutions. I would be pleased if you would publish my solution which will randomise all whole random numbers from 1 to N without repetition.

The principle is to make a selection initially from N possibilities. This value, a (r) is put to the "back" of the array, in place of a (n) which is stored temporarily as S; a (r) can then be replaced by what was A (n) on the second pass through the loop contained in lines 50 to 90, a selection is made from n=r possibilities which is exchanged with A (n-r) and so on. The important difference from Hewson's solution is the progressive restriction of choice, as previous selections are 'stacked' from back to front of the array "a". Hewson attempts to make all elements of the array interchangeable which can obviously only be 50 percent successful.

Tony Rickwood,
Ilford, Essex.

Problems not exceptional

T LAYCOCK, of Fleet — letters June, — is not one-in-a-million. I have just returned my Spectrum, which failed to work with 48K programs despite spending a month at W H Smith's service department. My neighbour had three machines, all failing, and in disgust bought a BBC micro which works perfectly. I shall try once more but if that one fails — goodbye Sir Clive.

J Grabinar,
Bromley, Kent.

Signals from space

HAVING JUST become a 16K Spectrum owner and being a licensed radio amateur I would like to know if any of your readers has any idea or suggestion of how to achieve programming of computer-enhanced signals from deep space? I am thinking the easiest might be to enhance CW Morse signals.

On another front, having just obtained a printer, it strikes me that it must surely be usable as an ordinary recorder, such as for temperature, and a host of other applications where a record has to be kept of voltage or resistance changes — ECG, EEG. observations in plant physiology spring to mind.

An instrumentation amplifier would be required and the motor would have to be speed-controlled. I wonder has anybody done any work on this, such as doctoring the O/P or the Spectrum.

H H C Graepel,
Kinsale, Co. Cork,
Ireland.

"BY FAR AND AWAY THE BEST MAIL ORDER FIRM FOR SOFTWARE"

(M. Pankhurst Cranleigh)

SOFTWARE SUPERMARKET

All we do at Software Supermarket is play every Spectrum/ZX81 program we can find, pick out the very best and offer only those to our customers - in our ads and our catalogues.

From over 30 countries you write, praising our free selection service (it's impartial, too: we produce no programs ourselves). You say we save you plenty - in postage and mistakes.

And we're quick. *We usually send your order out on the same day we get it.* Faulty tapes, if any, replaced at once.

OUR NEW CATALOGUE IS OUT NOW. Here's a few - the best of the new, the all-time greats. Free catalogue with every order. You've got a great computer: we've got the great programs.

Mail order only, please. If we had to run a shop, we wouldn't have time to run all the programs.

48K SPECTRUM ONLY

TRANSYLVANIAN TOWER *"Enthralling and addictive" (PCW). An excellent game at a reasonable price" (PCN).* Stunning 3D graphic adventure. Fight (and shoot) your way through the 500 3D rooms in Count Creepie's castle. Combines adventure and arcade games with great skill. We can't give it up! (R. Shepherd) £6.50.

TEST MATCH Amazing 3D animated graphics. Watch 'em bowl, hear and see them bat, watch the fielders run! Choose your own teams; or use the England/Australian teams in the computer. Clear on-screen instructions. And ONE DAY CRICKET on the 'B' side, too. (CRL) £5.95.

BLACK CRYSTAL *"An excellent graphics adventure" (S. User).* The massive 180K of program, 'loads' from 2 cassettes in 6 chapters. You must solve each of the 6 stages to defeat the Lords of Chaos. Real-time monster battles, 16 command keys. Instruction manual. (Carnell) £7.50

THE HOBBIT *"Takes first place for quality and value for money" (S. User) "A marvellous game...should set the standard" (ZX Comp).* Free 285 p illustrated book contains clues to help you. 30 beautiful full-screen pictures; 500 word vocabulary; 16 page instruction manual: it took 4 people 18 months to write! (Melbourne House) £14.95

RESCUE *"Excellent...the best adventure game I have ever played" (PCN)* 20 page clearly written on-screen manual leads you to very ingenious 3 stage adventure. Four skill levels. Full information on screen plus a map when you need it! Great fun. (CRL) £5.95.

TRADER *"Great fun...much more entertaining than the usual adventure" (Your Computer).* Great spaceships, pretty maps, animated graphics - a big adventure that loads in 3 parts. *"Outstanding" (P.C.T.).* (Quicksilva) £9.95

PIMANIA *"Amusing and brilliant...the graphics are excellent" (S. User).* A wonderfully witty adventure, great graphics and music and you could win the £6,000 Golden Sundial of Pi. (Automata) £10.00

ANY SPECTRUM

LET 'E.T.X.' TALK TO YOU The clearest speech we've ever heard. *"Must be at the limit of the Spectrum's capabilities" (HCW).* Enchanting graphic adventure: 16 landscapes: 1400 power zones: 4 levels: 16-page on-screen manual: up to 9 players. ETX will run in 16K, but without speech. Use keyboard or Kempston/AGF joystick. (Abbex) £5.95

FROGGY The best frog there is, we reckon. This game uses so much memory, you even have to unplug your printer. Loads in 2 parts. As you get better, the game gets harder. Just great. (DJL) £5.95

JUNGLE FEVER Escape down the pigmy death-run. Smashing full-screen animated graphics as you leap raging waterfalls, swing on a rope across deep pits, dodge spiders and poisoned blow darts. Good sound, too. On-screen lives, score, hi-score with name, time left. Some of the best graphics we've seen. (A&F) £6.90.

MONSTERS IN HELL Can you dig fast enough to escape from the Mad Monk's monsters? Vampires, followed by ghouls, clones, demons and more chase you successively up and down above the very realistic flames of Hell. Very exciting game. (Softek) £5.95.

JET-PAC *"Good graphics, with many small touches that put this program well ahead of the pack" (HCW).* Control your test pilot spaceman with his jet-pack as you build your spaceship, fuel it up and take off for a new planet. All the time avoiding the nasties and collecting treasure! Wonderful! 1 or 2 players. Keyboard or Kempston joystick (Ultimate) £5.50.

HEATHROW Air Traffic Control. If you've outgrown your flight simulator, get in charge at Heathrow. Land your planes safely using your radar and stack displays. Watch out for rogues. 7 skill levels, including demo. (Hewson) £7.95

WINGED AVENGER *"Hard to beat" (CVG). "One of the best Sinclair games so far" (PCW).* Very fast 'PHOENIX', 7 play levels, 3 attack waves, laser shield: mothership with smart bombs. A best-seller. (Work Force) £4.50

3D TANX Shoot the enemy tanks from your moving 3D turret. 3 play levels: accurate ballistics: 1 or 2 players: pause: demo game: training program: even plays God Save The Queen. (DK'tronics) £4.95

FAUST'S FOLLY The first adventure we've seen that's worth playing in 16K. It's great and it's graphic! Loads in 2 parts: clear instructions: then a smashing adventure with directions, inventory, look, score, save. (Abbex) £5.95

ZX81 OWNERS

Special 16K ZX81 versions of 5 of these programs are available. Use the coupon to order. Free 12-page ZX81 only catalogue with order or phone for catalogue only.

Meet the

with Artic

Software

1. INCA CURSE
(Adventure B)
In a jungle clearing you come across an ancient Inca temple. Your mission to enter, collect the treasure and escape alive! But beware!
£5.95 for 16K ZX81 and £6.95 for 48K Spec.

2. SHIP OF DOOM
(Adventure C)
You are unavoidably drawn to an alien cruiser. Can you reach the control room and free yourself? Or will they get you first?
Cassette £5.95 for 16K ZX81 and £6.95 for 48K Spec.

3. PLANET OF DEATH
(Adventure A)
You find yourself stranded on an inhabited alien planet. Can you reach your ship and escape?
£5.95 for 16K ZX81 and £6.95 for 16K/48K Spec.

4. ESPIONAGE ISLAND
(Adventure D)
While on a reconnaissance mission your plane loses control and you are forced to land. Can you survive and escape with the island's hidden secret?
£5.95 for 16K ZX81 and £6.95 for 48K Spec.

5. INVASION FORCE
A popular arcade game for the 16K/48K Spectrum. Fires through the force field to destroy the menacing alien ship. Sounds easy? Two levels of play normal or suicidal. Full colour. Sound and hi-res graphics.
£4.95 for 16K/48K Spec.
£3.95 for 16K ZX81.

6. NAMTIR RAIDERS
High speed, quick action invaders-type game with four separate groups of attackers.
£3.95 for 16K ZX81.

7. INVADERS
Planet earth is once more being invaded. You must fight to the death to protect your planet. Thirty-six levels of play.
£4.95 for 16K/48K Spec.

8. GALAXIANS
Swooping attackers, explosions, excellent graphics and personalised scoring.
£3.95 for 16K ZX81 and £4.95 for 16K/48K Spec.

9. COSMIC DEBRIS
You find yourself in an alien asteroid belt. To survive you must blast the asteroids to powder . . . before they get you!
£4.95 for 48K Spec.

10. ZOMBIES/ SWORD OF PEACE
Prove you are worthy of becoming the Monarch of Oz, by finding four objects of state against tremendous odds. As the only survivor on a desert island you have to escape from man-eating Zombies.
£5.95 16K ZX81.

11. GOBBLE MAN
Escape from munching ghosts to eat power dots and then gobble up the ghosts. High speed classic game with hi-res graphics and sound.
£4.95 for 16K/48K Spec. and £3.95 for 16K ZX81.

12. GALAXY WARRIOR/ STAR TREK
Galaxy Warrior – Destroy all the Klingons in the Galaxy and exit through a black hole into a new Galaxy. Star Trek – You have 15 star- dates and your mission is to destroy 7 Klingons.
£5.95 16K ZX81.

Artic for all your Sinclair ZX81

challenge

7 8 9 10 11 12

PUSH YOUR SINCLAIR TO THE LIMIT

Artic supply the best selection of adventure, arcade and educational games available for the Sinclair home computers. Artic also offer a wide range of utilities that will enable you to utilize your ZX81/Spectrum to its full potential. These include:

16K ZX81 Assembler	£9.95
48K Spectrum Assembler	£9.95
Toolkit	£5.95
Spec Bug	£6.95
ZX Bug	£6.95
SYS 64	£6.95

13. 3D COMBAT ZONE
Drive your tank through a 3D landscape destroying enemy super tanks, flying saucers and avoiding the pyramids.
£5.95 for 48K Spec.

14. 1K GAMES PACK
A superb selection of 11 games to stimulate your mind for the 1K ZX81. Only £4.95.

15. 3D-QUADRACUBE
Can you outwit the computer with this original version of 3D noughts and crosses?
£4.95 16K/48K Spec.

16. 1K ZX CHESS
An incredible 1K chess game ideal for someone who wants a quick game without waiting for loading.
Only £2.95 for ZX81.

17. SPECTRUM MICRO CHESS
The first chess program for 16K/48K Spec. Allows all legal moves, castelling, en-passant and pawn promotion. Full colour and graphics display.
£6.95.

18. ZX CHESS II
A great game of chess for your 16K ZX81 or 48K Spec. Seven levels of play, analysis and recommended move options.
£9.95 for 16K ZX81. £8.45 48K Spec. Voice Chess 48K Spec. £8.95.

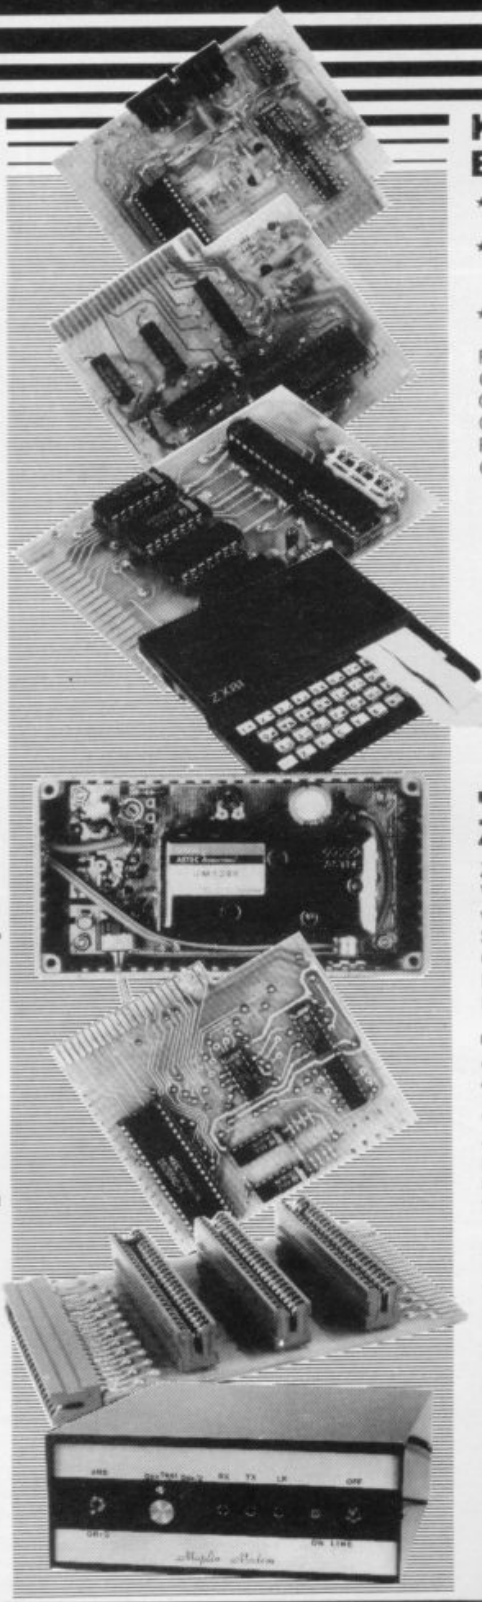
EXCITING ADDITIONS FOR YOUR HOME COMPUTER



THE MAPLIN TALK-BACK for ZX81 and VIC20

Now your computer can talk

- ★ Allophone (extended phoneme) system gives unlimited vocabulary.
- ★ Can be used with unexpanded VIC20 or ZX81 — does not require large areas of memory.
- ★ In VIC20 version, speech output is direct to TV speaker with no additional amplification needed.
- ★ Allows speech to be easily included in programs.

Complete kits. Order As:
LK00A (VIC20 Talk-Back). Price £24.95.
LK01B (ZX81 Talk-Back). Price £19.95.
Full construction details in Maplin Projects Book 6. Price 70p. Order As XA06G.

SOUNDS GENERATOR FOR ZX81

3-Programmable tone generators with programmable attenuators turns your ZX81 into a mini-synthesiser.
Noise generator with 3 pitch levels enables the creation of most special effect sounds.
Single address access via BASIC with PEEK and POKE. Connects directly to expansion port socket or motherboard.
Complete kit. Order As LW96E. Price £10.95.
Full construction details in Maplin Projects Book 5. Order As XA05F. Price 70p.

ZX81 INPUT/OUTPUT PORT

Two bi-directional ports for a total of 16 input or 16 output lines.
Includes one buffered output which can interface directly to CMOS.
On board address selection allows for expansion to 6 ports with two boards.
Complete kit. Order As LW76H. Price £9.25.
Full construction details in Maplin Projects Book 4. Order As XA04E. Price 70p.

MODEM

A CCITT standard modem that connects directly to your telephone line via a B.T. approved transformer. Transmits and receives simultaneously on European standard frequencies at 300 baud. May be used to talk to any other 300 baud European standard modem including the Maplin Computer Shopping modem on 0702 552941 and any British Telecom Datel 200/300 Service modem. The modem's computer interface is RS232 compatible.
A complete kit excluding case is available. Order As LW99H. Price £39.95.
Full construction details in Maplin Projects Book 5. Order As XA05F. Price 70p.

KEYBOARD with ELECTRONICS for ZX81

- ★ Full size, full travel keyboard that's simple to add to your ZX81 (no soldering in ZX81).
- ★ Complete with electronics to make "Shift Lock", "Function" and "Graphics 2" single key selections.
- ★ Powered (with adaptor supplied) from ZX81's own standard power supply.

Full details in Project Book 3 (XA03D). Price 70p
Complete kit (excl. case) £21.90.
Order As LW72P.
Case £4.95. Order As XG17T.
Ready built-in case £29.95.
Order As XG22Y.

ZX81 TV SOUND

ZX81 sound on your TV set.
Video reversing switch for normal or inverse video display. Can be used with the Talk-Back or Sounds Generator kits.
Complete kit. Order As LK02C. Price £19.95.
Full construction details in Maplin Projects Book 6. Order As XA06G. Price 70p.

ZX81 EXTENSION BOARD

Our ZX81 Extendiboard plugs directly into the ZX81 expansion port and will accept a 16K RAM pack and three other plug-in modules simultaneously. Parts are sold separately as follows:
PCB Order As GB08J. Price £2.32.
Edge Connectors (4 needed) Order As RK35Q. Price £2.39 each.
Track pins (1 pack needed). Order As FL82D. Price 85p per pack of 50.

INTERFACES for MODEM

Interfaces for most popular home computers which do not have RS232 ports will be available shortly. An interface for the ZX81 that includes a complete Machine Code Communications Program is available. Order As LK08J (ZX81 Modem Interface Kit). Price £24.95.
Full construction details in Maplin Projects Book 7. Order As XA07H. Price 70p.

MAPLIN

Maplin Electronic Supplies Ltd., Mail Order: P.O. Box 3, Rayleigh, Essex SS6 8LR.
Tel. Southend (0702) 552911 (Sales).

159-161 King St., Hammersmith, W6. Tel. 01-748 0926. 284, London Road, Westcliff-on-Sea, Essex. Tel. (0702) 554000. Lynton Square, Perry Barr, Birmingham. Tel. (021) 356 7292.
All prices include VAT & carriage. Please add a 50p handling charge to orders under £5 total value.

Spectre has good electronic drawing power

good Electronics drawing program for the 48K Spectrum. It contains all the symbols to allow you to design a digital or analogue circuit and COPY it on the printer. There are 62 symbols and each covers the area of one print square.

The program or circuit on its own may be SAVEd to tape to allow you to resume at any time where you left off. An interesting feature is that the program can activate the circuit. That checks and indicates the path of the 0V and the power supply round the circuit. It does not give voltages but checks for continuity, using the symbols as gates through which the current will or will not flow.

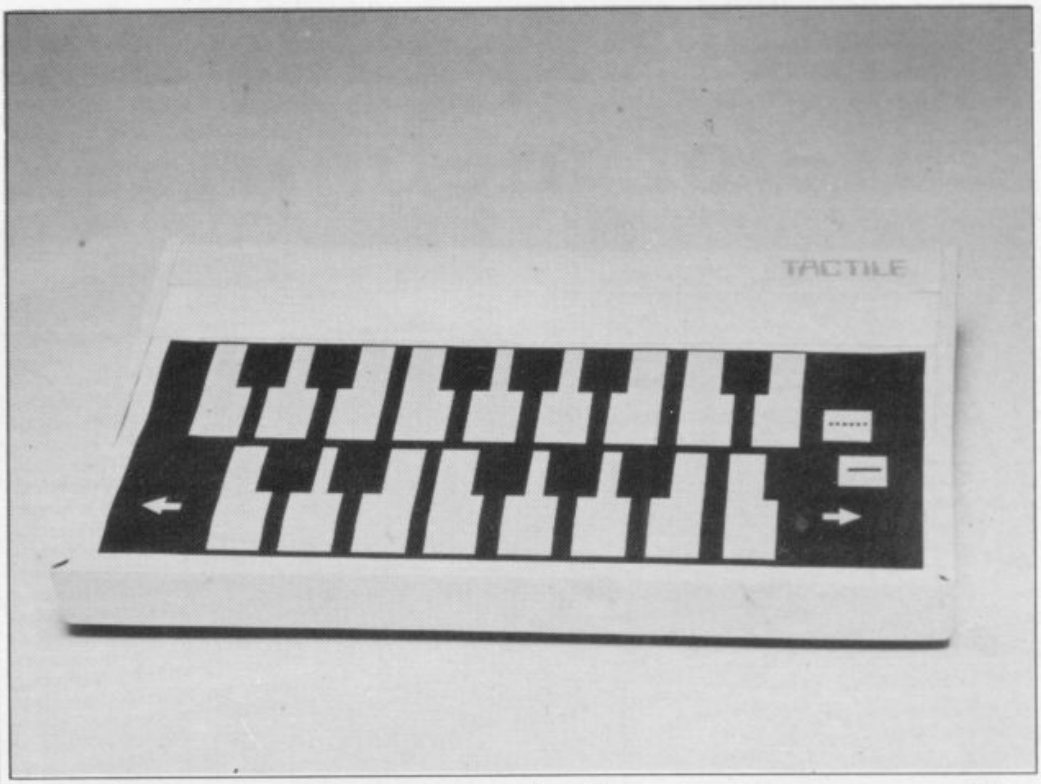
The supply current flow is shown in red and the 0V connections in green PRINT squares.

It is very slow — five to 10 minutes — but it can give a good indication if you have omitted some part. All the character set is re-programmed so if you BREAK the program you might find the listing a little difficult to follow.

It is a very useful program which could be enhanced with machine code to improve its abilities.

Electronics is the name of the program and the Spectre agent is at 2 Mull Close, Oakley, Basingstoke, Hampshire. The Spectre head office is in Hongkong.

Electronics will be sent anywhere in the world airmail at a cost of £6.95 and includes a money-back guarantee and technical advice.



Educational keyboard eases understanding

A VERY USEFUL device for young children is a Tactile keyboard which fits over the Spectrum keyboard. A plastic cover with a flexible top, the Tactile keyboard allows you to design a layout to fit a program.

Being a flat sheet, pictures or numbers can be placed over certain sections of the keyboard, so that children can be asked to "press the PEAR" and the like. The keys pressed can then be checked to see if the correct response has been given.

A piano keyboard is supplied already fixed to the keyboard and children find it fascinating as well as educational.

Programming tips are included so that a range of keys may be checked using Basic or machine code. Designs are made easier by the fact that a clear film can be used with overhead projector pens to trace pictures of objects direct from books and magazines. Early Learning Opportunities is producing software using the keyboard and a tape with a piano and a typewriter program is available from Tactile at £92.95. It is an important device for teaching children to use a computer. The keyboard costs £99.95 from Tactile, Wraith, 32 Elmfield, Kingswood, Bristol BS15 2SS.

Monitored tape copying made easy by Jiles

JILES ELECTRONICS has produced a tape copier which allows you to make back-up copies of software. It does not require a computer to use it but allows the computer to check what is happening by LOADing the program at the time it is being recorded.

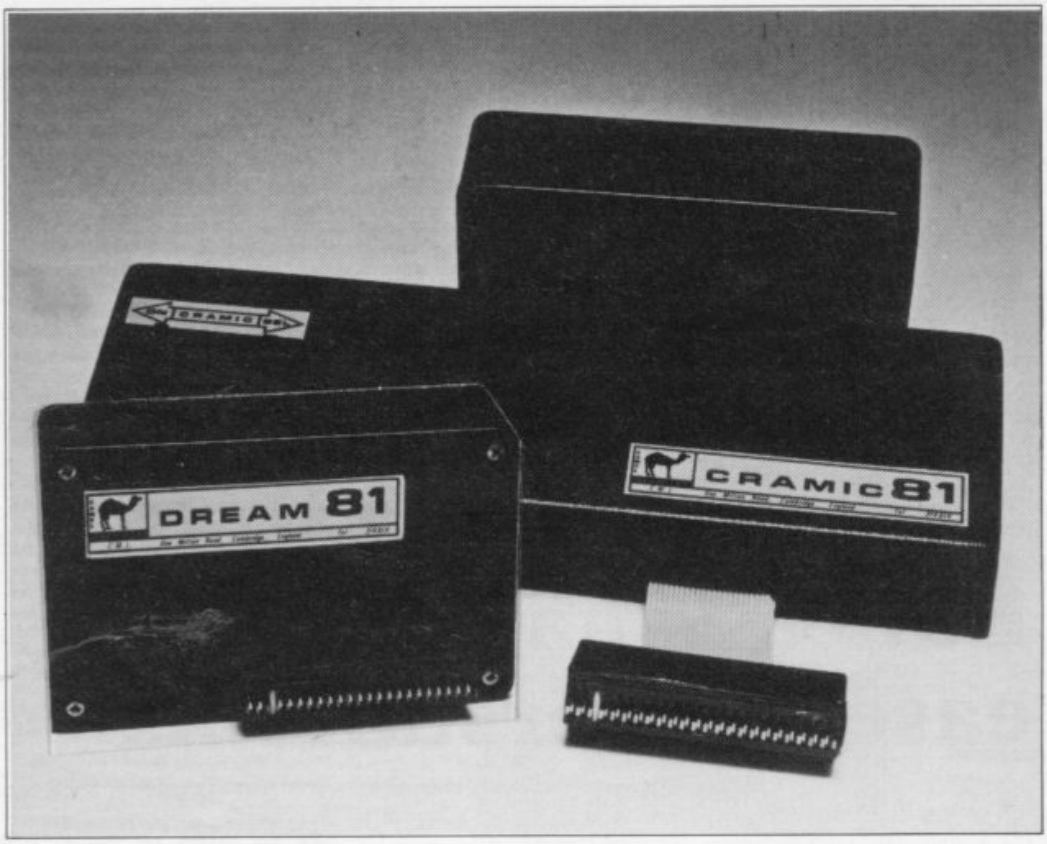
The device consists of a black plastic box with three sockets containing an amplifier and a battery.

The input socket is connected to the ear socket of the tape recorder and the output socket to the MIC of the second tape recorder. The LOAD socket is connected to the computer if required.

The volume is set at half on the tape recorder with the program in it and normal on the recorder. The recording process is then started with the computer monitoring the signal.

The tapes tested on the Spectrum and ZX-81 versions worked very well. Advice is given on how to align your tape recorder head and there are helpful hints if it does not work. The device is called the CO-DER and costs £99.95 from Jiles Electronics, 48 Parkway, Chellaston, Derby DE7 1QA. Tel: 0332 703892.

Camel expands its store of memories



THE CAMEL range by Cambridge Microelectronics has been expanded by three new ROM-type packs for the ZX-81. ROM-81 allows you to plug-in up to 8K of EPROMs into the two sockets provided — 2716 or 2732 types.

The memory area covered is selected by soldered straps inside the black plastic box.

The Dream 81 has 64K of RAM plus an EPROM socket which will take up to 16K of EPROM — 27128. The EPROM replaces the RAM between 8K and 16K on the memory map and permits the use of the slower 450ns EPROMs.

The 16K of the 27128 is split into two 8K areas switched in and out by a switch inside the pack, which makes it a little awkward as it is under the cover and not removable when using the machine.

The Cramic is a bigger version of the Memic (16K) which resides in parallel with the 16K RAM on a ZX-81. It can be used to capture and retain any 16K program. Used in conjunction with a 16K RAM pack it allows you to restore a program in seconds. The Cramic is bank-switched by a software I/O output instruction to ports 16 to 31.

The control of switching and copying of memory to the Cramic is done by a small machine code program in a REM statement at the beginning of each program and must be typed-in or run in from TAPE before using the pack.

The Passport program allows you to use the Cramic as a second program, switching between that and the original. Spare memory in another location will be required to swap variables between programs. The Cramic is housed in an $8\frac{3}{4}$in. × 1in. × 3in. black box which is attached to the ZX-81 by a flexible ribbon cable. An expansion connector is also provided at the back for the RAM pack.

The RAM consists of 6116-type memories backed-up by a lithium battery. The cover has two switches; SEL brings in the Cramic during a program and ON allows the Cramic to be put in parallel with the existing 16K RAM so that any program typed-in may be 'captured' by just deselecting the Cramic. Unfortunately that crashes the program in RAM but re-inserting the machine code will bring it back as good as new.

The Cramic costs £91.95, ROM-81 £17.20 and the Dream-81 £80.45 from Cambridge Microelectronics Ltd, 1 Milton Road, Cambridge CB4 1UY. Tel: 0223-314814.

Processing the words

HILDERBAY has produced for the Spectrum a printer interface as well as software to run it, including a mini word processor. The black box has 23-way printer plug on the front and a ribbon cable of up to one metre ending in the usual Centronics-style plug. The box has no extender PCB, so any add-ons such as Microdrives must go between that and the printer interface.

The software is a Basic program and a small piece of machine code. The Basic program allows you to set up a series of options which are then incorporated into the machine code.

TASWORD can have the printer software inserted so that it uses another printer instead of the ZX printer.

The options on most printers are different but they can offer underline, emboldened or enlarged text using the graphics characters re-programmed to give control characters.

A COPY software routine is also included but not using the COPY command. All other commands are by the use of LLIST or LPRINT. There should be no need to go inside the printer to set up the CR/LF options as they can be set from the software.

It is a very good combination of hardware and software at £45. Hilderbay Ltd, 8-10 Parkway, London NW1 7AA. Tel: 01-485 1059.

Audio action

COMPUSOUND, which produces the audio modulator for the ZX-81, Spectrum and other computers is taking action against Kayde for allegedly copying its Telesound 84 which has a patent pending. The Kayde module first appeared at the Midlands Computer Show in April.

Modem allows ZX-81s to speak to each other

MAPLINS has two kits of interest to the ZX-81 user and both can be used to provide an on-line 300-baud modem. The first, which is the modem, was issued as a kit in February, but until now the RS232 and the software was not available to use it.

The important thing about 300-baud working against Prestel is that it is used commercially to obtain information from databases for which you have to pay a fee and also you can communicate with other computer users who do not have ZX-81s. Free databases or bulletin boards are also available; a list of them can be obtained from the Association of Computer Clubs.

The modem is not the easiest of kits to build as it uses a five-band resistor colour code but if you follow the instructions to the letter the kit can be assembled without too much difficulty. The problem is in setting-up the modem and connecting it to a telephone line.

To set up the modem an oscilloscope is essential, except that it is difficult to set up accurately. Most of the controls can be set up using a sensitive voltmeter but to check the mark space ratio the modem is best looped back to itself and, using the RS232, sending Us until Us return on the screen.

Having set up the modem, a plug and socket must be ordered from British Telecom to connect it to the line. Once connected to the telephone line, you can telephone Maplins and order components, check your item is in stock and if you are using a credit card, pay for it.

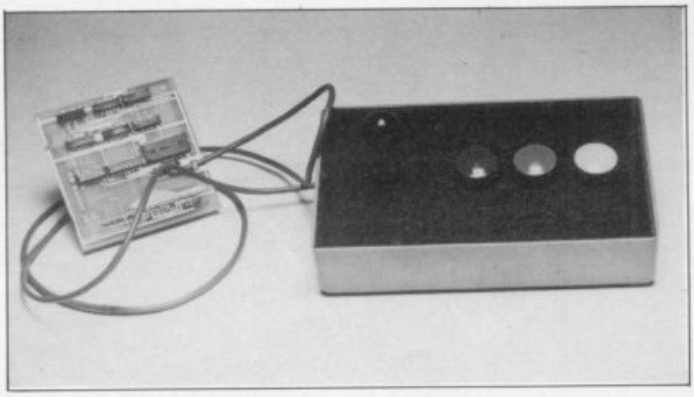
The RS232 kit is much easier to build but you will require a motherboard and at least 2K of RAM to run the terminal program — the program to talk to the modem. The software is stored on tape and conversion is made to ASCII characters by using an EPROM. The RS232 can also be used to run a printer or to talk to another computer which has an RS232.

The RS232 interface cannot produce negative voltages, so full implementation of the standard is not possible.

The modem costs £40.45, RS232 interface kit £25.45, motherboard £8.45, modem case £7.85. Maplins is at PO Box 3, Rayleigh, Essex SS6 8LR. Tel: 0702-552911.

Programming a joystick

ELECTROTECH has produced a large box containing a programmable joystick and three large push-buttons. In appearance it looks very similar to the large games machine controls. A printed circuit board which contains a 2K RAM plugs into the back of the Spectrum. It is used to store the information on what keys to operate when the joystick switches are operated.



There are eight positions on the joystick as the corners also operate both switches. Whether that will be useful or confusing will depend on the game. All the microswitches are large professional types which should last a long time. That also explains the cost of the joystick, expensive at £43.70 for the standard model.

A tape which accompanies the joystick is a Basic program which allows you to program the joystick and SAVE the results on to tapes as a machine code file.

It allows you to re-load the key combinations for a game without the slow process of the Basic program.

The keyboard is not affected and can be used as well as the joystick for entering the score. Seven functions can be programmed — three switches and a four position joystick.

The cost might suit some shops which wear out joysticks very quickly but there seem to be cheaper alternatives for the average user.

Electrotech is at 2 Heath Close, Winston Hill, Luton, Beds. Tel: 0582-429809.

Tidying spectrums

THE PRINT 'n' Plotter console is a cardboard stand for the Spectrum, printer and power supply. The console arrives packed flat and can be constructed easily into a solid, vinyl-covered box in about half an hour. The instructions are clear and simple and there is an alternative of housing four tapes instead of the printer. Cutouts are provided at the back for tape and TV power supply and a ventilation slot under the Spectrum heatsink. It is necessary to tidy-up with a black felt-tip pen on the corners where the vinyl has been cut. Those edges could also be covered with adhesive tape to prevent them wearing.

The only disadvantage seems to be that no peripherals will fit directly into the Spectrum except the printer because of the ¼in. distance between the computer and edge of the console. Modifications, however, can be made with a sharp knife.

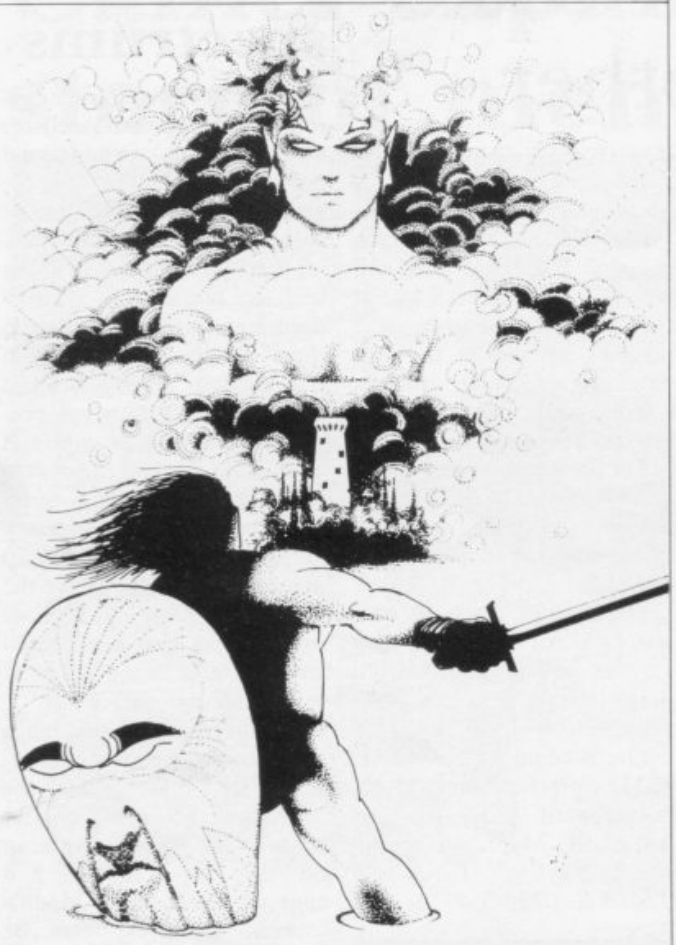
It is an inexpensive box into which you can put your Spectrum; it tilts it to the correct angle for typing and allows the power pack to be stored inside. By raising the height a slim tape recorder can also be put inside the box.

Print 'n' Plotter consoles cost £8.25 from Print 'n' Plotter Products, 49 Borough High Street, London SE1 9SE.

Controller

KEMPSTON Microelectronics has produced a conversion tape for six of the most popular games which allows you to convert the game for use with its joysticks. It has also included a machine code version of COPY in the latest release of software for the printer interface, called by a USR command.

SPECTRUM 48K : ZX81 16K
SIX PART ADVENTURE



BLACK CRYSTAL
THE QUEST IS ABOUT TO BEGIN

The ultimate role-playing adventure for the SPECTRUM/ZX-81. You can become a warrior, elf or wizard on a quest to find and use the rings of creation: to destroy the Black Crystal and defeat the Lords of Chaos. Held within six programs lies a land of fabulous treasures and mythical monsters. Journey through the land of Beroth, explore the castle of shadows, descend into the Shaggoths lair, search for diamonds in the sea of sand but beware of sand sharks! Confront the fire demon in his temple, battle against the Lords of Chaos and win your way to the Black Crystal.

By splitting Black Crystal into six programs we can provide more variety and detail than any other adventure for the Sinclair computers.

Real time monster battles. Superb graphics. Save game feature. All six parts are supplied together on cassette, boxed with instruction booklet.

SPECTRUM 48K: 180K OF PROGRAM IN SIX PARTS – ONLY £7.50
ZX81 16K: OVER 100K OF PROGRAM IN SEVEN PARTS – ONLY £7.50
WHY PAY MORE FOR LESS OF AN ADVENTURE

To: **CARNELL SOFTWARE, DEPT 2, 4 STAUNTON RD, SLOUGH, SL2 1NT.**
Please send me: Black Crystal for my:

Spectrum 48K	£7.50

EVOLUTION (48K Spectrum)
Can you trace the course of evolution from the primordial soup to man, keeping a balanced world and surviving the odd disaster as you go ?
Should be easy. . . after all it's been done before!
Only **£6.95**

OMNICALC (48k Spectrum)
The best Spectrum spreadsheet you can buy. Written in machine code to be faster, to give you more space for data, and to allow more features to be included, it is guaranteed uncrashable.

"If more programs shared the quality of OMNICALC, then we might see more Spectrums in offices." Home Computing Weekly 3/5/83

"It is ideal for someone who has just found the spreadsheet concept, but it is also a very powerful tool for anyone who has used one previously."
Sinclair User June 1983
Complete with comprehensive manual **£9.95**

ZX-SIDEPRINT (Spectrum & ZX81 versions)
Use ZX-Sideprint to print sideways, giving you 80/132 etc. characters per line.
(State version reqd) **£4.95**

CREVASSE & HOTFOOT (any Spectrum)
Can you make it across the ice-cap whilst chasms open and close all around? Or, help the rabbit get to fields full of carrots – but remember! the plumper the rabbit, the greater the danger.
2 original games for only **£4.95**

NEW! **THE TRAIN GAME** (any Spectrum) **NEW!**
First there were model railways, then there were computers. Now Microsphere gives you both in one.
Featuring passenger, goods & express trains; tunnels; viaducts; points; stations; turntable bonus games; collisions; derailments; irate passengers; and everything else you expect from a major railway!
Two track layouts on each cassette. Superb value for money.
Only **£5.95**

SOFTWARE LIBRARY
FOR
SPECTRUM

Low cost weekly hire of the best arcade games, adventures, utilities, languages and business programs.

- Membership only £6.00 for 12 months.
- Program hiring from only 80p (plus 25p p&p).
- Free fully descriptive catalogue for members.
- New titles constantly being added.
- Purchase new programs at discount prices.
- Return of post service.
- All tapes despatched using first class post.
- We have full permission and licences from the leading software publishers, to whom royalties are paid.

Compare these features with our competitors and you will see why more Spectrum owners are joining the Kernow Software Library. Join today by clipping the coupon below or send a S.A.E. for further details.

A new and exciting range of Arcade Action and Adventures for Sinclair Computers

COSMIC GUERILLA
ZX SPECTRUM
16K OR 48K
£5.50

Bring your Spectrum to life with the fastest, meaniest and most colourful arcade action around. Your task is to zap the relentless waves of alien attackers as they obliterate the force field protecting your supply of ion laser cannons.
KEMPSTON JOYSTICK COMPATIBLE

HALLS OF THE THINGS
ZX SPECTRUM
48K
£6.50

The first TOTALLY ANIMATED graphics adventure ever! Trapped within a gargantuan tower your task is to meticulously explore its many levels in search of the seven Spectral Rings, the possession of which allows access to the dungeon level wherein lies the key and your escape! But beware . . . doomed for all eternity to wander the labyrinthine halls and corridors are your terrifying humanoid adversaries—The Things—creatures of incredible speed and magical power ready to stretch your mental and physical agility to the limit! After Halls, your life will never quite be the same again . . .

THE DUNGEON MASTER
ZX SPECTRUM
48K
£7.50

The first adventure to enter into the true spirit of traditional role-playing games.
"I have been a dungeons and dragons fan for several years . . . The package provides excellent entertainment for all fans of the cult and should prove a good introduction to the game".
Sinclair User

MERCHANT OF VENUS
ZX81 16K

ZX MICROFAIR

Where else can you see so much for Sinclair Computers?

ONCE AGAIN AT ALLY PALLY
THE BIGGEST SHOW OF ITS KIND ANYWHERE IN THE GALAXY!

What Computer Exhibition gives you the opportunity of finding everything (and we mean *everything)* for ZX Computers?

Where can you find more than 150 exhibitors dedicated to Sinclair enthusiasts?

Where on Earth can you discover new and original products — hardware, software, books peripherals, programs, add-ons — many additions launched at the show?

Where can you find plenty of space to move, eat, drink, relax and,of course, buy?

Where will you discover that special 'show offer' on the equipment you have been promising yourself?

Where will you find an exhibition hall with so much parking space — and in parkland too?

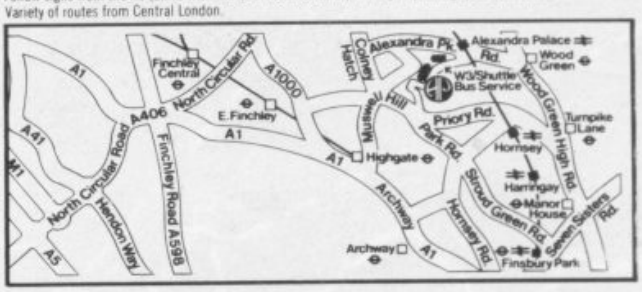
And what other exhibition offers you all this for only £1 entrance fee (50p for kids under 14)?

There's only one answer:
THE 8th ZX MICROFAIR AT ALEXANDRA PAVILION SATURDAY 20th AUGUST 1983.
Make a note of it now. . . and come along for a good day out!

The big show for a quid (or less)!

CUT OUT AND KEEP

By Road
Follow signs from the A1 (Links with M1 and North Circular). Plenty of parking space available!
Variety of routes from Central London.



By British Rail
From London (Kings Cross or Moorgate) — about every 10 minutes to Alexandra Palace station — free shuttle bus or short walk from there!
From any part of the U.K. enquire from Kings Cross Travel Centre, London N1 9AP (phone 01-278 2477) about special day trips to the ZX MICROFAIR!

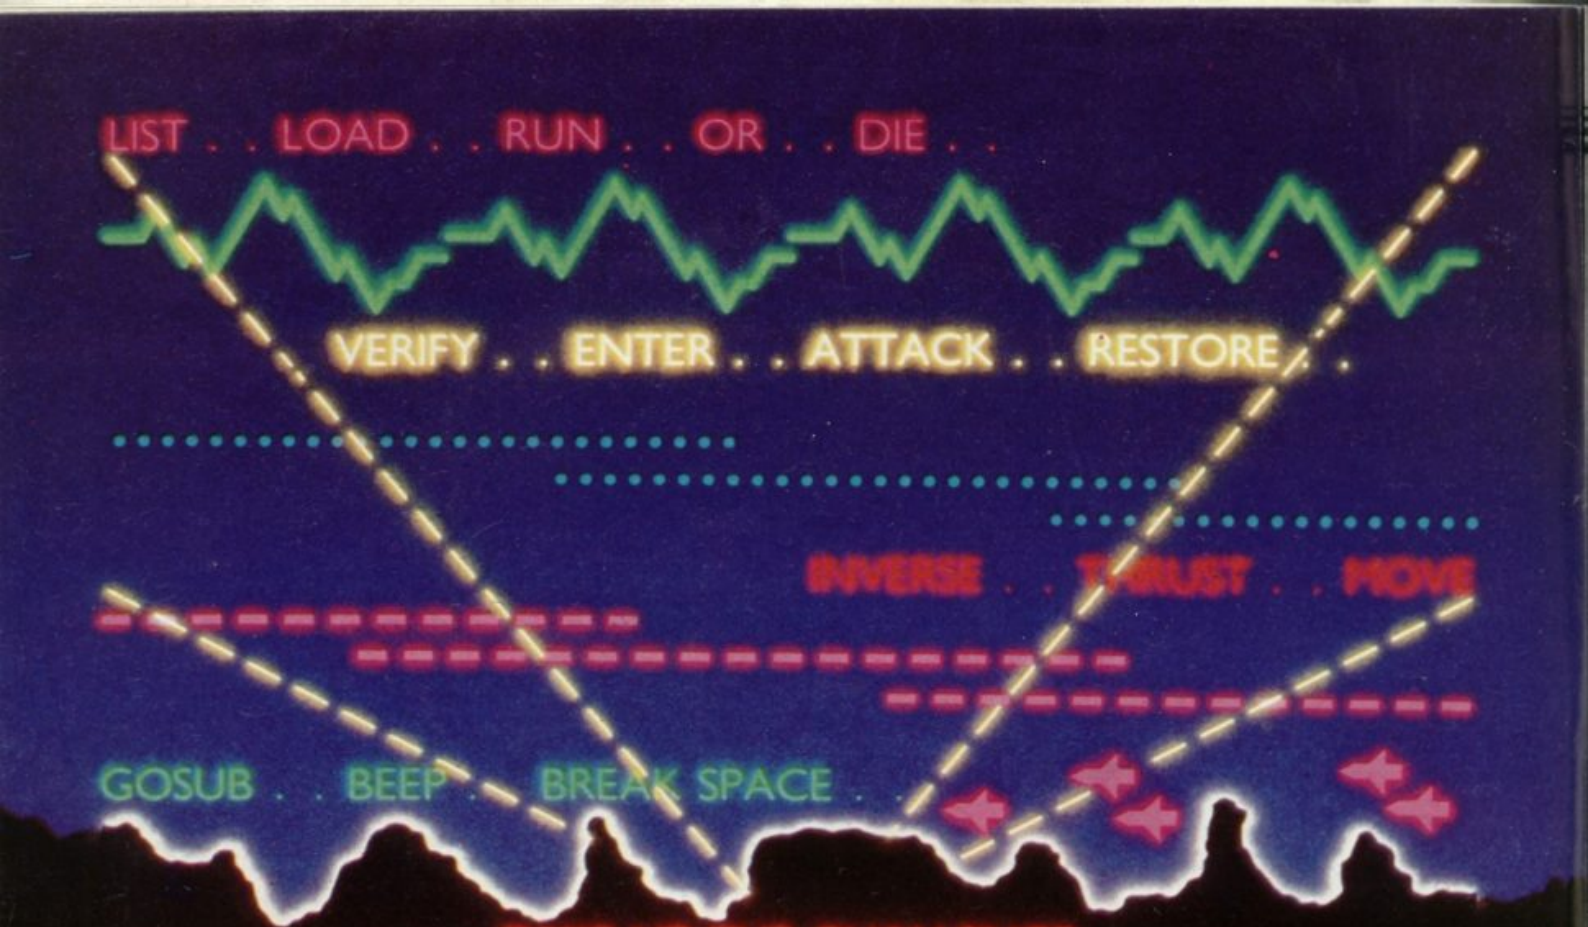
By London Transport
Underground: Victoria Line from Victoria (also Oxford Circus, Kings Cross/St Pancras) to Highbury and Islington — change (cross platform) to BR Suburban Service to Alexandra Palace — free shuttle bus or 5 minute walk from there!

Alternative: Piccadilly Line (from Heathrow etc) to Finsbury Park or Wood Green — Link with W3 bus service to the fair.

8th ZX MICROFAIR
ALEXANDRA PALACE,
SATURDAY 20th AUGUST 1983

SATURDAY 20th AUGUST 1983 AT ALEXANDRA PAVILION, ALEXANDRA PALACE, WOOD GREEN, LONDON N22. FROM 10am TO 6pm. Advance tickets available from: Mike Johnston, (SU) 71 Park Lane, Tottenham, London N17 0HG. Adults £1.00. Kids (under 14) 50p. Parties of 10 or more at 20% discount!
Please make cheques/P.O.s payable to ZX MICROFAIR and enclose S.A.E.

EXHIBITORS! Call Mike Johnston now on 01-801 9172 for details of space at this and future shows!



TAKE UP THE CHALLENGE

SILVERSOFT

Design by Tim Epps ©

ARMAGEDDON(S)*
The cities are crumbling under the continual attack waves. As defence controller you will be obliterated with them. Unless...

MISSION IMPOSSIBLE(S)*
Space mines, force fields, meteor storms and lethal enemy ships conspire to stop you reaching the astronauts stranded below, but . . you have to return them to the mother ship in one piece!

MUNCHER(S)
Maze, race and chase game. Munching gets harder as you progress. Arcade pills, random mazes, blue ghosts and smooth arcade action.

GROUND ATTACK(S)
In the labyrinth the flesh eating aliens have been located. penetrate their defences, destroy fuel supplies and missile silos. 9 skill levels, many effects.

GROUND ATTACK* (ZX)
Finally . . a version of the Spectrum best seller for ZX81 owners, true to the original.

SLIPPERY SID(S)*
Take Sid on a sneaky trip, eating frogs and magic mushrooms, but watch out, if he hits the garden wall he'll be sick. Hi-scoring, 5 skill levels.

CYBER RATS(S)*
The meanest metallic menaces to march across the screen, moving so fast they're almost a blur. Hi-res movement. Hi-score bonus.

BRAIN DAMAGE(S)*
The master computer detects you patrolling its circuits in your proton-panzer. Defend youself against 3 types of electron panzers or escape through the hyper gate to another circuit. 3 skill levels.

STARSHIP ENTERPRISE(S)*
Starship simulation, save the galaxy, intrigueing adventure with arcade action. 3D Hyper-warp, real time Alien attacks, over 30K of machine code and BASIC (48K only).

EXTERMINATOR(S)*
Robot intelligence has surpassed humans', using homing missiles, move and fire in eight directions, avoiding indestructible robots with homing missiles, to save the last of the human race.

*Joystick option available.

Teaching aid is impressive

THE NUMBER of educational programs for the 16K ZX-81 is growing but there is still room on the market for good-quality programs such as **Spelling Bee.**

When the program is run the ZX-81 displays a very detailed picture of a bush, a hive and a hyperactive bee which flies between them. The student is then asked to select the spelling.

The first level is the easiest. You are asked to name objects which appear on the screen. The computer starts with a bee and continues by displaying pigs, trees and even a gate.

The second level is slightly more difficult. The computer asks you to spell five-letter names. If you have most of them correct the computer displays a birthday cake with candles glowing on the top.

The difficulty level increases although the same pictures are shown but the computer highlights a part of the picture and asks you to name that part. It could be the arm of a chair or the wing of a bee.

Spelling Bee uses very impressive graphics and is ideal for a young child learning to spell. The package is produced by Image Software, 185 Elm Road, New Malden, Surrey KT3 3HX. It costs £5.

Spaced-out collection

ALIEN RAIN and **Outraider** are two games on one cassette for the 16K ZX-81. In **Alien Rain** you control a little man at the bottom of the screen. Home is at the left of the screen and the object of your quest lies at the right, in a cave.

The little man must run from the left to the right, rescue an alien, and return home. Points are gained for the number of aliens rescued.

The only obstacles endangering the little man's mercy mission are thousands of evil invaders which rain from the heavens. If you are hit by one a life is deducted from the three lives allowed at the beginning of the game.

At first you are protected by three shields which the invaders destroy slowly. Those defences will give you time to rush backwards and forwards, rescuing as many aliens as possible.

The game runs at nine levels; the ninth is fairly slow but the first is very fast.

The graphics are impressive and even the title pages have been designed for the best effects.

The second game on the cassette is **Outraider.** It is your job to protect the grey area in the middle of the screen. To do so you are given a spaceship which can be rotated to face the assaults of enemy craft which are out to destroy the grey area.

When the main hull of the mothership has been penetrated and an enemy ship has sent a missile into the grey area the game is over.

The concept of Alien Rain is original and the game is fast. It is something which can be played again and again. Outraider is interesting as you need to use only one key control to play. The games have a quality about them which would attract even a Spectrum owner.

The cassette is available from Computer Rentals Ltd., 140 Whitechapel Road, London, E1. It costs £3.50.

Good but may perhaps be late

IT IS UNFORTUNATE that **Maze Guzzler** and **Super Breakout** have been released so late, as they are both good games. Putting any traditional game on to the 1K ZX-81 is still an occupation pursued by some software houses but there are so many copies of Breakout and Pacman on the market already that software houses should concentrate on something more original.

Maze Guzzler is the Pacman game on this tape. It includes all the usual features of fairly intelligent ghosts, energy pills and on-screen scoring.

The maze is put up at the beginning of the game but you have to press the RUN key to start the ghosts and your guzzler moving around the maze. You have four chances at clearing the mazes of the life-giving dots. If you manage to stay in the game for long enough you will find that the action becomes faster. The ghosts seem to be dopey at times but they usually get the guzzler in the end. The game on the other side of the cassette is called Super Breakout. It consists of bouncing a ball against a brick wall and the bricks fall out as they are hit. If you miss the ball on its return you lose one of your four lives.

Maze Guzzler and Super Breakout will give hours of fun to people who have 1K ZX-81s. The cassette costs £3.50 from Selec Software, 37 Councillor Lane, Cheadle, Cheshire.

New firm crashes in

YOUR SPACESHIP crashes on to a forbidding planet, damaging your propulsion and navigation systems. To obtain the Grittan Stones, necessary to have those systems working again, you must enter the robots' city.

In the city are evil robots which will try to kill you, using large magenta balls to smash you to pieces. The green robots are the King Tobors, indestructible killers which you cannot defeat.

Tobor is a game for the 16K and 48K Spectrum from a new company, Elfin Software. The player moves round a succession of mazes, outwitting and destroying the robots which are in pursuit. You can use your laser gun only when on the move and can fire only in the direction in which you are running. When you die the robots are kind enough to erect a tombstone with RIP on it at the place where you fell.

Elfin certainly is a company to watch as, judging by its first game, it is keen to produce top-quality software. One small reservation we had about the game, however, was that the instructions and title pages were loaded in sections and that took a long time. A player does not want to have to watch two or three minutes of graphics before playing the game every time it is loaded.

Tobor is available from Elfin Software, Hudsons House, Battery Road, Great Yarmouth, NR30 3NN. It costs £5.95.

Halls of Things could be a danger to health

HALLS OF THINGS for the 48K Spectrum is a game which could change the Spectrum games scene overnight.

The program is technically excellent and dangerously addictive, although you can forget about high scores until you become adept.

You play a little man who must rush up and down the stairs to different levels of a maze in which several magic rings can be found. The problem is that some little space invader-type creatures are out to get you with their fireballs and lightning. You can fight them with your fireballs, lightning and sword. You can also heal the wounds which have been inflicted on you by using magic, of which you have a limited amount.

The screen display makes it even more impressive. It looks as if the game is running on an Apple 2E or UK-101, both computers more expensive than the Spectrum. The game is bound to be a hit apart from one criticism. **Halls of Things** has no sound. The fights between Things and the hero could be made even more dramatic with the addition of lightning zaps or explosions.

Cosmic Guerrilla is an arcade game which is also produced by Crystal Computing for the Spectrum.

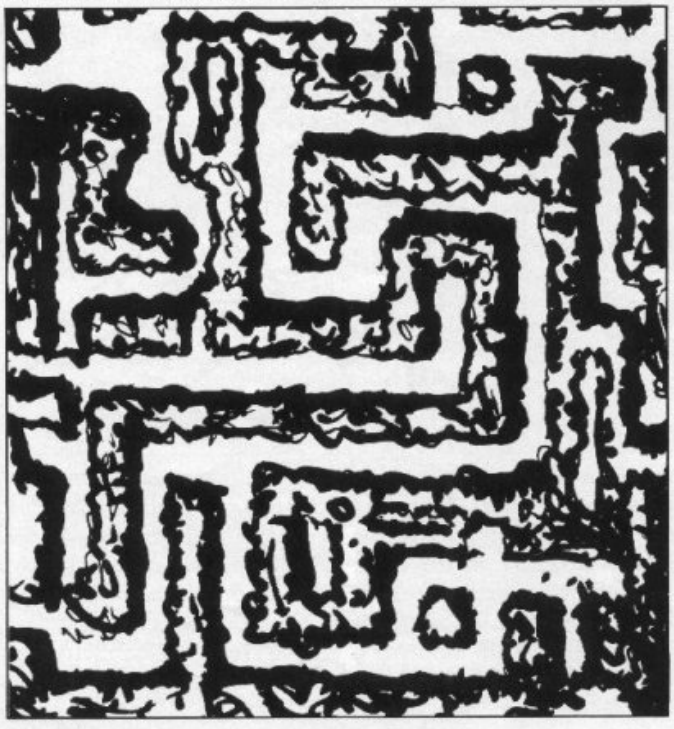
You have three spaceships to save and, depending on how far you proceed in the game, the aliens mutate from ordinary space invaders to cosmic pigs. The sound and graphics combine to make the game good fun and easy to play. Halls of Things costs £6.50 and Cosmic Guerrilla £5.95. Both cassettes can be obtained from Crystal Computing, 2 Ashton Way, East Herrington, Sunderland, SR3 3RX.

The world comes to visit

IF YOU HAVE a Spectrum and you want to know about far-off places you may never have to pick up a gazetteer because of a new database package called **Countries of the World.**

The program, for the 16K and 48K Spectrum, centres on an incredible high-resolution colour drawing of a world map. The countries can be listed and scrolled through backwards and forwards.

Each country has a code number and by referring to that number you can access its statistics, general information and a graphics representation of its position on the globe.



The detail in the program is very fine but some points made about countries are inaccurate. For instance, the program gives the capital of Andorra as Andorra-La-Viella, where it should be Andorra-La-Vella. Little mistakes like that spoil the program.

Another new release is **Maze Chase.** The program is in the Pac-man mould but is very addictive and difficult to play.

The manufacturer says the game has four mazes on the 16K version and 12 on the 48K. We have managed to get through only the first few mazes as the game is so difficult.

The player must eat the energy pills and lemons while staying away from the evil guardians. If a magic strawberry is eaten the guardians will lose their power and you can eat them.

Maze Chase and Countries of the World are available from Hewson Consultants, 7 Graham Close, Blewbury, Oxon. Maze Chase costs £4.95 and Countries of the World £5.95.

Cracking the EGG is no joke

WHEN YOU HEAR that the universe is being threatened by a giant Ectogenetic Galactic Gamate — EGG to all you intelligent people — you may decide to catch the next bus out of the Universe.

In **Spawn of Evil,** however, a new game for the 16K Spectrum, you decide to fight and promptly put your spaceship into attack mode. Your job is not only to destroy the EGG before it becomes indestructible but also to kill all the Pulsoids, Cycloids and Aliens which breed from it.

The software is in two parts and each part can be run independently.

Your spaceship glides through a 3D representation of outer space where waves of spawn dart across the screen. We found it extremely difficult to hit anything.

The controls of the spaceship can be changed to meet your requirements but the speed at which a change of direction is accomplished is so slow that we could not hold many pulsoids in our gun sites long enough to fire a laser blast.

Despite the difficulty of getting used to, Spawn of Evil is a well-presented and graphically-impressive package. It can be obtained for £4.95 from dK'Tronics, Unit 2, Shire Hill Industrial Estate, Saffron Walden, Essex CB11 3AQ.

Picking clubs at Troon

THERE ARE MANY games of golf on the market but none simulates the rolling greens and deep bunkers of **Troon.** The game is for the 48K Spectrum and provides a graphic representation of the 18-hole championship course. You do not have to be an expert golfer to play it but making a shot requires slightly more golfing skill than just guessing the co-ordinates of the hole for which you are aiming.

The graphics in the game are cleverly-used and well-produced. When teeing-off the player will see an aerial view of the next hole, along with trees, lakes, green and rough. As the ball gets nearer the hole a close-up view of the hole, complete with flag, is shown.

The range of clubs you can use seems almost infinite and the game gives a list of those clubs on-screen to help you choose which you want to use.

You can let all your friends or family join the championship game to see who is the best player. The game is relatively user-friendly, so you do not have to have a set of golf clubs stored in the cupboard to be able to play it.

Troon is a very complex game and one of the only games of golf on the market which features club selection. It can be obtained from Hornby Software, 21 Pinfold Hill, Leeds LS15 0PW and costs £6.95.

Oiling the wheels ensures success

IF YOU HATE J R Ewing and would like to take over his corporation you will like **Dallas,** a game for the 48K Spectrum from CCS Software.

You are in charge of a new oil company which must make $200 million in nett assets and $80 million to take-over Euing Associates. There are three levels of difficulty but at each level you must buy a concession of land, put a moving rig on it, start drilling until you find oil, and then go into production.

To make the kind of money needed to take-over Euing you will have to build production plants on at least three concessions to make sufficient profit. If you do not you could be bankrupt. As with any good simulation game there are hazards with which you must deal. Tornados may destroy your rig, drilling accidents may occur and the taxman may call for very large amounts of cash.

Dallas is an engrossing game and needs several hours' play to complete successfully. It is a game which all the family will want to play as it is guaranteed to turn even the youngest youngster into a megalomaniac who needs a regular dose of power and money in the game.

Dallas can be obtained from CCS Software, 14 Langton Way, London SE3 .7TL. It costs £6.

SPECTRUM & ZX81 EDUCATIONAL SOFTWARE

SPECTRUM FAMILY LEARNING SERIES

Use our Computer Assisted Learning PACks to help your children with their school work. The programs in the series use moving colour graphics and sound to make learning more enjoyable. Each pack contains four programs and is suitable for use with the 16K or 48K Spectrum. Program notes are supplied.

CALPAC FL1 (5 to 8 years) **£7.50**
Tens and units addition and subtraction with detailed help facilities; powerful, easy to use drawing program; English comprehension applied to American Indians.

CALPAC FL2 (7 to 10 years) **£7.50**
Roman history; spelling tester with easy entry of your own lists; flexible table-tester; homophones.

CALPAC FL3 (9 to 12 years) **£7.50**
Nouns, verbs, adjectives and adverbs; tenses of verbs; biology of the flower; long division tutor.

The programs are ideal for the ages stated, but could be used by anyone requiring revision of these areas of study.

CALPAC C1 O-LEVEL CHEMISTRY £6.50

Four clearly presented revision/tutorial programs. The subject matter has been carefully structured to cover the most important aspects of:

- ★ Elements, compounds and mixtures.
- ★ Structure, bonding and properties.
- ★ Redox, electrolysis and the activity series.
- ★ Acids, bases and salts.

48K Spectrum and 16K ZX81 versions of the cassette are available. Please specify which you require.

Professional Computer Assisted Learning materials from:
CALPAC COMPUTER SOFTWARE
108 Hermitage Woods Crescent, St Johns, Woking, Surrey GU21 1UF.

Overseas orders £8.50; includes airmail postage.

SIMPLE PLUG-IN CENTRONICS INTERFACE

ONLY £45 inclusive

- Recognises LLIST and LPRINT which allows programs to be listed directly from your Spectrum
- Also allows printout direct from BASIC listings without the need for special user calls
- Completely self contained with 1 metre of ribbon cable and connectors
- Works with any Centronics Interface including all Epsons, Seikosha 100A, OKI Microline 80 etc
- Includes driving software which allows up to 128 characters per line
- Full range of business software available
- Fully tested and guaranteed for 12 months

Trade Enquiries Welcome

SPECTRUM Software

COSMIC RAIDERS (16K) £5,95

You — the only remaining pilot of the "Earth Defence Fleet" — have the daunting task of defending the Earth from attack by alien beings that have already set up a base of their own on earth.

*** Radar Scanner display in hi-res ***
*** Full colour and sound effects ***
*** From the author of Spectrum 'Scramble' ***
*** 100% machine code ***

SPACE ZOMBIES (16K) £5,95

Shooting through space you are ambushed by a fleet of Space Zombies flying at you in formation, swooping and diving at you. Destroy them, if you can: But in destroying them, you attract more to the area, and the game gets progressively harder.

*** Full screen hi-res graphics ***
*** 1 or 2 players * Joystick option ***
***Full sound and colour ***
***Three playing speeds ***

MINES OF SATURN and RETURN TO EARTH £5,95

(16K) Text Adventure

Mines of Saturn While piloting a routine orbit of Saturn, you are caught up in a radiation storm which forces you into the giant planet's rings. Your energy drained, you make a forced landing on the planet's surface. Luckily you crashed near an abandoned mining base and you set off in search of some di-lithium crystals to refuel your stranded space ship. Can you do it?

Return to Earth Having escaped from your previous dilemmas, you reach Earth Station 1, but fail to make radio contact. You effect a safe if harrowing manual docking. On entry you find it deserted, and the control room destroyed. You must explore the station and find some way to alert Earth of your predicament, but beware, many of the rooms are identical, there is extensive damage, and signs of alien intruders.

Graphic Adventure (48K)

MAD MARTHA £6,95

Poor little Henry is the hen-pecked hero of this domestic tale. One night he can take no more. He steals his wages from his wife's purse, sneaks out of the house being careful not to wake the baby or trip over the cat, and heads for the bright lights to have some fun. Trouble is he runs out of money. His only way to raise some cash is to gamble his few remaining pounds on the spinning wheel of the roulette table. Just as Henry is getting into his evening his wife — Mad Martha — has noticed his absence. Realising Henry has absconded with the housekeeping she sets out after him with an axe. Guess what part you play in this happy tale? That's right, you're Henry. Watch out for that axe!

Can you face the challenge in the biggest-ever competition for Sinclair users?

Join the fight to be the best Sinclair Programmer. There are thousands of £££s to be won in the contest to find the top software writer of 1983.

CAN YOU FACE the challenge in the biggest-ever competition for Sinclair users? Join the fight to be the best Sinclair programmer. There are thousands of £££s to be won in the contest to find the top software writer of 1983.

In this new competition, the Cambridge Trophy, sponsored jointly by *Sinclair User* and Computer Cases Simulation Ltd, we are searching for the best writers of programs for the Spectrum and ZX-81. We are offering a first prize of £1,000 plus royalties to the person who proves deserving of the title of Winner of the Cambridge Trophy 1983.

The trophy will be awarded annually with a different theme each year. In 1983 the theme is adventure and strategy games. The judges will be looking for a number of factors when making their decision. They include:

Instructions
Program documentation
Graphics and sound
Playability
Lasting appeal
Innovation
Use of machine.

As well as the first prize of £1,000, which can be won by programs for either the Spectrum or the ZX-81, there will be two second prizes of £250, one for the Spectrum and the other for the ZX-81. Similarly there will be two third prizes of £100. In addition there will be 10 runners-up prizes for each machine, consisting of five CCS programs and a free annual subscription to *Sinclair User*.

Fill in the form for your passport to fame and fortune.

- Entries must be on cassette accompanied by a listing, detailed explanation of the program and an entry form. Entrants must warrant that their programs are original.
- Programs only for the Spectrum and ZX-81 will be considered.
- Entries must reach *Sinclair User* at 30-31 Islington Green, London N1 8BJ, by Tuesday, September 20.
- Results will be announced at the Christmas ZX-Microfair in December.
- The entrant assigns CCS the exclusive licence with the right to sublicence, to copy, modify, sell and publish the original or modified program in any form and CCS undertakes to pay a *royalty* fee of 20 percent of the nett invoice price on the sale of such program(s) and further will pay a fee of £10 in respect of each publication of the respective program listing. CCS assigns

ECC Publications the exclusive world-wide rights to publish the listings of all entries.

- The winning programs shall become the property of CCS, which undertakes to market the programs and to pay the winner a royalty and fees as detailed.
- The organisers retain the right to offer any entries for use by Micronet on an agreed royalty basis.
- Entries will not be returned.
- The judges' decision is final.
- No correspondence can be entered into between entrants and the organisers.
- Employees of ECC Publications and CCS and their associated companies may not enter.

The award will be judged by three people well-known in the world of Sinclair computers—Mike Johnston, organiser of the highly-popular ZX Microfairs and consultant editor of *Sinclair User;* Trevor Toms, author of a number of books on the Spectrum and the ZX-81; and John Gilbert, *Sinclair User* software reviewer. The panel will be chaired by Nigel Clark, editor of *Sinclair User,* and Melvin Lloyd-Jones, a director of CCS.

ENTRY FORM

I agree to abide by the rules of the competition.

Send your entries to ECC Publications, 30–31 Islington Green, London N1 8BJ.

HIGH STAKES BIG DOUGH

That's the name of the game with our new range of Strategy Games.

Take Autochef for instance.
You'll have to make every decision possible, from buying food and wines to entering into loan contracts with the ambition of taking over your biggest rival.

How does wheeler dealing in the heart of Texas grab you? In Dallas, you'll need all your wits about you to survive in the oil business and maybe even take over the Euing Empire.
Fly high with Airline and really get the business off the ground – that is if you can handle the costing problems, strikes, cancelled flights, hijacks and aircraft crashes.
If you'd rather keep your feet firmly on the ground, run a wheat farm with Corn Cropper. There are many decisions to be made on machinery and labour costs, when to plant, irrigate, fertilize and harvest.
Print Shop offers you all the problems of a thriving printing business – from staffing to buying stock and making quotations.

Whatever your taste – whatever your skills, we've got a challenge for you!

Autochef, Dallas, Airline, Corn Cropper and Print Shop. ZX81 and Spectrum 16K £5 each
Spectrum 48K £6 each
Available from W H Smith and all good computer shops or
Dept S8 Cases Computer Simulations Ltd,
14 Langton Way, London SE3 7TL.

**Strategy Games.
They're no pushover.**

sinclair special 1

Inside...
Latest prices round-up...
Latest software...
Order form...

Introduction

One thing's certain about the Sinclair world – there's never a dull moment.

Every month sees new software and new hardware, produced by Sinclair enthusiasts, or produced by Sinclair itself.

The magazines do a fantastic job of keeping you up to date with the input of enthusiasts. We want to keep you in touch with Sinclair's own developments.

Every month, there'll be a Sinclair Special in this magazine.

Sometimes, inevitably, there won't be anything new to say – we want to break away from the breathless announcements of hardware and software you just can't buy.

But when something new *is* available, we want you to have accurate information – fast. You'll find it here.

This month, we're giving you the latest information on the recommended retail prices of Sinclair equipment. They're *our* prices, and you may well find things cheaper (or dearer) in the shops. If they're cheaper – terrific! Snap them up. Note, however, that from us the ZX81 is down to £39.95.

We're also announcing six superb new Sinclair cassettes for the Spectrum, and three more which make full use of the ZX81. There's an order form at the back of this Special.

Next month... but there, next month is another story! Watch (as they say) this space.

Nigel Searle

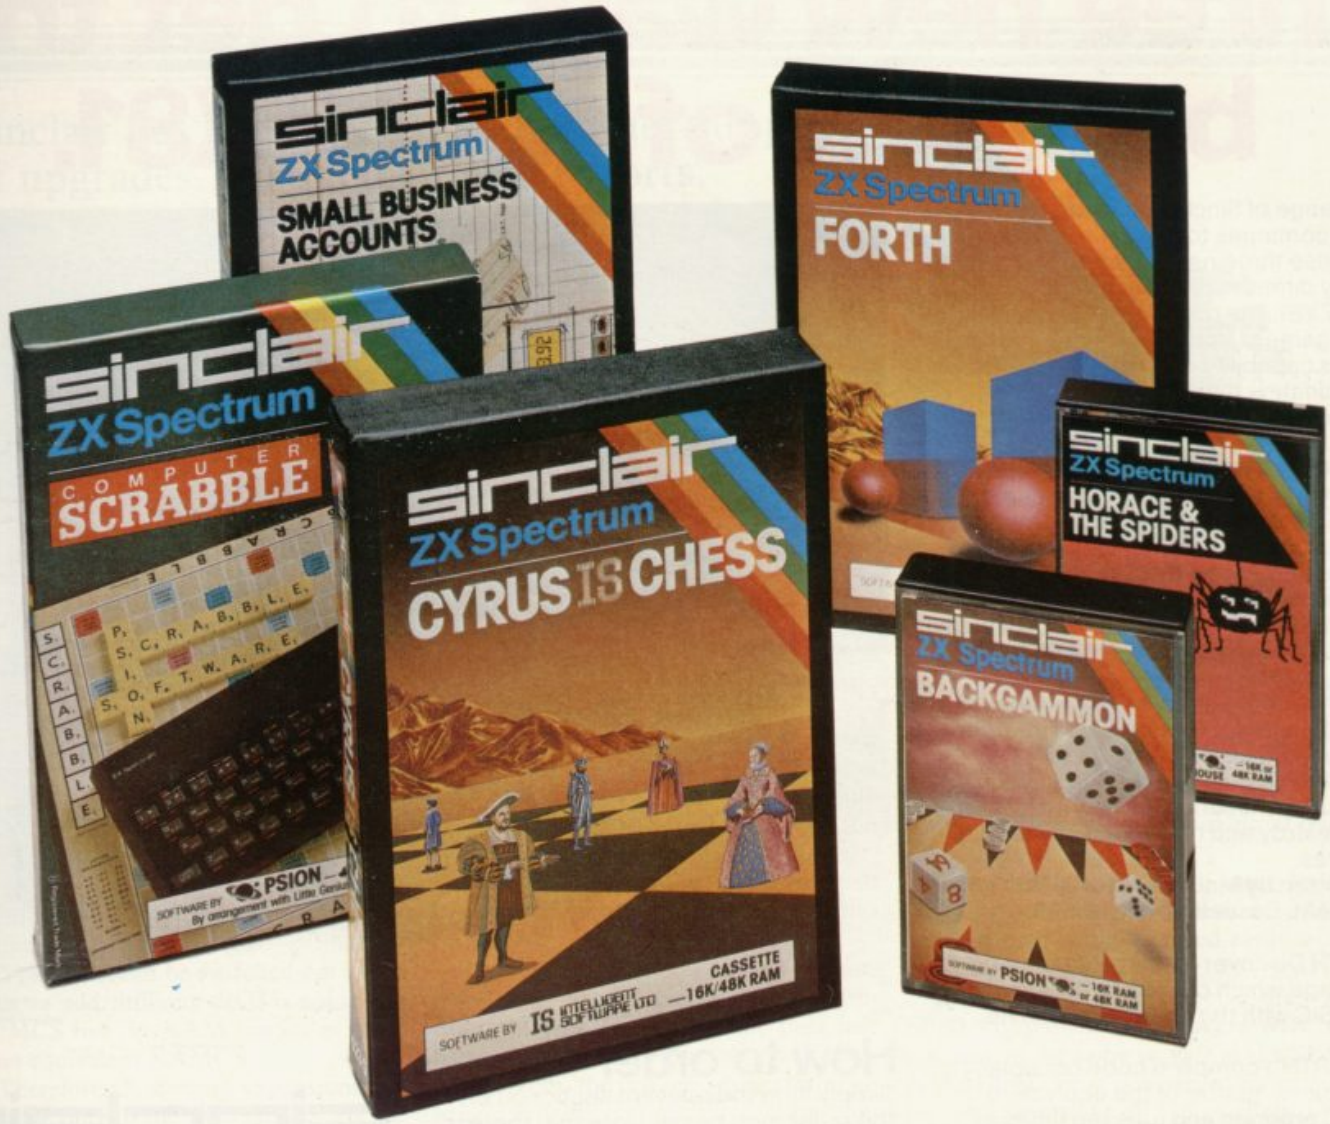
Nigel Searle.
Managing Director,
Sinclair Research Ltd.

Spectrum – latest recommended retail prices.

16K was £125.00
16K now £99.95

48K was £175.00
48K now £129.95

ZX Printer was £59.95 — ZX Printer now £39.95
ZX81 was £49.95 — ZX81 now £39.95



Six new ways to make more of your Spectrum.

Take a look at these brand-new titles. Each is an outstanding new program using the full potential of the Spectrum, for games with stunningly animated graphics, for strategies of fiendish cunning, for masterly applications of computing capability...

Cyrus-IS-Chess Based on the Cyrus Program, which won the 2nd European Microcomputer Chess Championship *and* trounced the previously unbeaten Cray Blitz machine. With 8 playing levels, cursor piece-movement, replay and 'take-back' facilities, plus two-player option. The 48K version has many additional features including an extensive library of chess openings. For 16K or 48K RAM Spectrum.

Horace and the Spiders Make your way with Horace to the House of Spiders, armed only with a limited supply of anti-spider-bite serum. In the house, destroy the webs before the spiders can repair them. Then destroy the spiders, before *they* destroy Horace! Undoubtedly the creepiest Horace program ever produced! For 16K or 48K RAM Spectrum.

Computer Scrabble The famous board game, on-screen – with the whole board on view! A huge vocabulary of over 11,000 words. Full-size letter tiles, four skill levels – the highest of which is virtually unbeatable. For 1 to 4 players. For 48K RAM Spectrum.
(SCRABBLE trademark and copyright licensed by Scrabble Schutzrechte und Handels GmbH – a J.W. Spear and Sons PLC subsidiary.)

Backgammon A fast, exciting program, with traditional board display, rolling dice and doubling cube. Four skill levels. For experts – or beginners. (Rules are included – it's the quickest way to learn the game.) For 16K or 48K RAM Spectrum.

FORTH Learn a new programming language, as simple as BASIC, but with the speed of machine code. Complete with Editor and User manual. For 48K RAM Spectrum.

Small Business Accounts Speeds and simplifies accounting work, produces Balance Sheets, Profit and Loss information *and* VAT returns. Complete with User manual. For 48K RAM Spectrum.

Overleaf – your Sinclair order form.

Three new ways to get the best out of your ZX81.

The range of Sinclair software for the ZX81 continues to grow.

These three new cassettes offer two totally different challenges to you and your ZX81. The games – like so many ZX81 games today – really do use the ZX81's capability. The FORTH program is a fascinating extension of your own computer understanding.

Sabotage Defender or attacker? The choice is yours in this exciting game.

Be the Guard and defend the randomly placed boxes of ammunition inside the compound – or be the Sabateur and attack the ammunition!

Written by Macronics for a ZX81 with 16K RAM. Cassette price: £4.95.

City Patrol You are the Commander of a laser-firing ship. Your task is to intercept and destroy alien suicide ships descending on your city. Judge your rating as Commander by how many aliens you destroy and how much of your city survives.

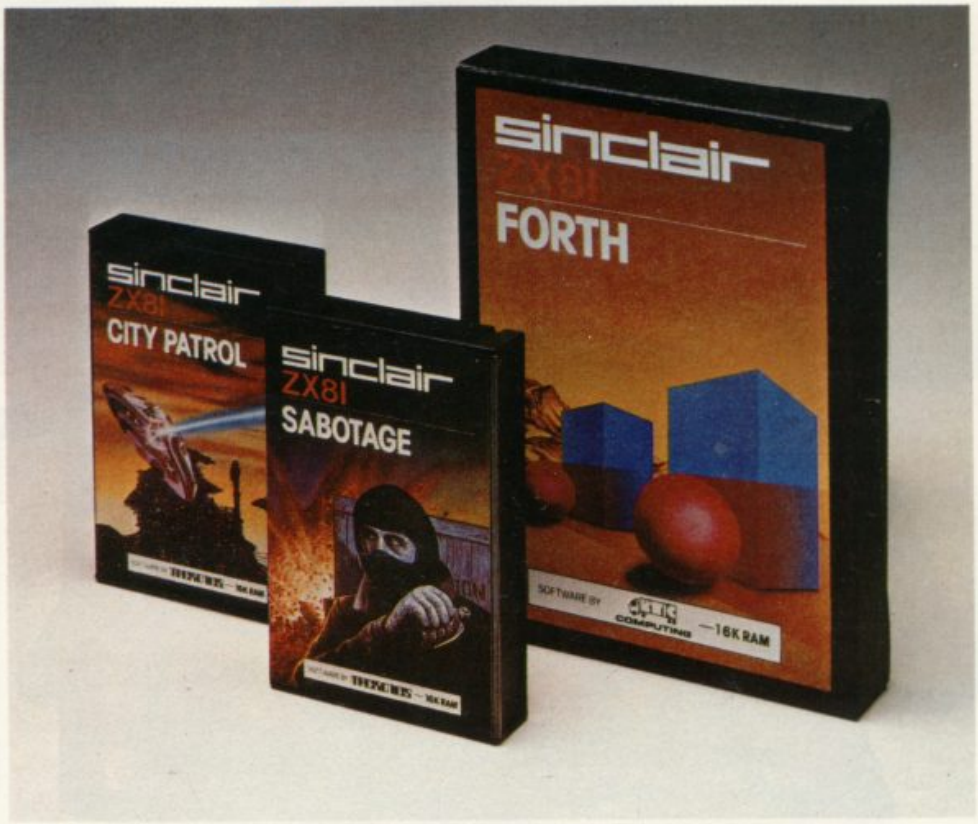
Written by Macronics for a ZX81 with 16K RAM. Cassette price: £4.95.

FORTH Discover a new programming language which combines the simplicity of BASIC with the speed of machine code.

FORTH's compiled code occupies less than a quarter of the equivalent BASIC program and runs ten times as fast. It is fully extendable by the addition of user-defined commands.

Free User-Manual and Editor Manual with each cassette.

Written by Artic for a ZX81 with 16K RAM. Cassette price: £14.95.



How to order

Simply fill in the relevant section(s) on the order form below. Note that there is no postage or packing payable on Section B. Please allow 28 days for delivery. Orders may be sent FREEPOST (no stamp required). Credit-card holders may order by phone, calling 01-200 0200 24 hours a day. 14-day money-back option.

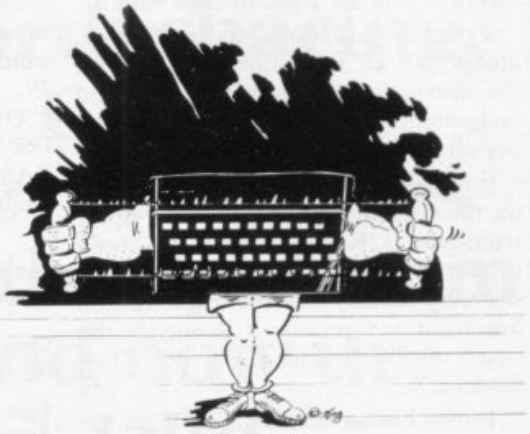
Sinclair has been overtaken by other suppliers of upgrades. Stephen Adams reports.

Spectrum finds itself at full stretch



THE SPECTRUM is in four basic forms. Model 1s which have two IC-type sockets into which a printed circuit board is plugged and model 2s which have all the RAM fitted on to the main printed circuit board. There are, of course, two types in each category, the 48K and the 16K.

The 48K cannot be expanded, as all the existing memory space is covered with either ROM or RAM — all 64K of it. The ROM can be switched-out externally to add different ROMs using the $\overline{\text{ROMCS}}$ but the RAM cannot as there is no equivalent $\overline{\text{RAMCS}}$.

Therefore all memory expansions can be done only to the 16K models. As the computer already contains 16K of RAM, the top 32K of memory area — 32K-64K — is the only space to put it. Most memory expansions fill that space with 32K worth of RAM chips but the East London Robotics 64K add-on — the SP80 — has two sets of 32K RAM which can be switched in and out under a program instruction or from the keyboard.

The kits consist of four memory-decoding chips, except model 1 versions where all the chips are soldered to a PCB, and eight 32K by one-bit chips. Those RAM chips are very sensitive to static electricity and warnings are included in all the instruction sheets. The way to handle them properly is not to remove them from their protective packaging until needed and to keep touching an earthed object such as a radiator or gas pipe occasionally to release the static charge. The static can be caused by nylon or wool in your clothing being rubbed.

Putting-in the chips can be a little difficult and it is recommended that you check that the pins are straight before you insert them. The Fox Electronics kit has the pins already straightened. Also check that none of the pins is bent outside the socket or underneath the chip when you have finished.

The best technique to use is to put all the pins on one side into the socket and then to pull the pins on the other side over the holes in the other side of the socket. Once both sets of pins are resting in the socket holes you can push down gently on the chip to push it into its socket.

The instructions vary from a four-page, step-by-step meticulous description by Delta Research to one page just listing where the chips go by Fuller. Apart from the Fuller instructions all provided sufficient detail to allow you to know where each chip goes and what precautions to take.

As part of its instructions Fox Electronics also includes a sheet showing how to tune the colour on a Spectrum to give better results. It also shows you how to tell whether it is the Spectrum or the TV set causing a problem. Sheets normally cost £1 from Fountain Electronics but are free with its RAM kit, along with a small Basic program to demonstrate the usefulness of 48K.

> 'The 48K cannot be expanded'

The fitting of the Fox kit was the easiest but if you have problems you can send back the kit with the details of the Spectrum at any time in the following 12 months. East London Robotics will fit the chips at an extra cost of £7 by post or £3 by personal visit.

Delta sends a memory test tape which checks all the memory by using a machine code program going through at least all the manufacturer's specifications. The tape can be used to keep an eye on suspect memory faults as it stops with an error which can then be sent back to Delta or Sinclair. The tape normally would cost £3.50 and is a really comprehensive test taking at least eight minutes.

East London Robotics and Delta were the only model 1 boards we could test and both could be fitted easily with less trouble than the model 2.

East London Robotics also does an SP80 kit which can provide 64K of memory in the same sockets as the SP48 (48K) fitted. That is achieved by having two separate banks of 32K, switched by an OUT instruction.

That is possible only because of the 64K RAM chips which are used instead of the 32K RAMs and a massive modification of the decoding chips which plug into the Spectrum. No soldering is required but some care needs to be taken inserting the chips, as three of them are wired together using twisted insulated wire.

A LED is also soldered on to one of the chips to indicate which bank is being used. The only problem is that you can see it only with the top off or looking through the edge-connector hole. The LED lights when it is in bank two and when the machine is turned on the light shows on bank one.

The only problem with the SP80 is that the stack and any program running in it must be in the 16K of memory provided by Sinclair. If it was allowed to go into the top 32K it would be switched-out on the first OUT instruction and the program would have nowhere to go.

Also the machine code stack for return addresses would have to be in the lower 16K area for the same reason. That leaves the user to develop a pro-

gram which will be able to use banks of memory without having the convenience of Sinclair Basic to cope with it.

Prices of the various kits are detailed, along with an indication of how good the instructions were, guarantee period and number of tests performed on memory after fitting.

It is also possible to add a RAM pack on the back of the Spectrum. A Spectrum-type 32K RAM pack has been produced by Cheetah Marketing Ltd. It fits very snugly on the back of the Spectrum and because it is outside the case it does not matter if it is model 1 or model 2.

It also has an extension piece on the back so that you can plug in Microdrives when they arrive. The RAM pack has no known wobble in use and can be fitted very easily by plugging it into the expansion port. It costs £39.95.

The alternative is to use a ZX-81-type RAM pack with an adaptor to give you another 16K or 32K. To use it you will require an adaptor.

EPROM Services and myself both make adaptors for the 16K RAM pack. Mine can also cope with a 64K RAM pack to give a full 32K by changing a soldered strap on the board or ordering a 64K version. I also produce an Adam II which lets you have a 16K RAM pack on the back of the Spectrum but which also allows devices which used to work in the popular 8K-16K region to work in the 56-64K region of the Spectrum. All the adaptors mentioned cost £9.

Of the RAM packs and kits reviewed. Fox Electronics for kits and Cheetah for RAM packs stand out as good value for money.

At last! A joystick that works!

Cambridge Computing bring you the first **intelligent** joystick.

Works on all existing software - regardless of which keys the program uses. No need for specially written software. Features include:

- Compatible with Spectrum, ZX81, Jupiter Ace
- 2 Independent Fire Buttons
- 8 Directional Microswitched action
- Plugs into edge connector
- Interface complete with edge connector
- Atari joystick compatible
- Joystick with Interface £29.90

A good idea worth sharing. Custom Keypanel Kits for the Spectrum and now the ORIC

Put everything you need on the keyboard with a Custom Keypanel Kit.

Precision die-cut panels fit perfectly over your keyboard and create an instant and individual reference to all your software.

Each kit comes in a clear plastic wallet and contains: 10 matt black Keypanels plus sheets containing over 140 self-adhesive command labels, pre-printed with words and symbols – arrows, left, right, FIRE!, POWER!, etc, plus a sheet of blanks for your own designs.

SPECTRUM Keypanels (96 x 224mm)
Self-adhesive label sets are printed in 'Spectrum' bright red. A must for flight simulation and all multi-key games and applications, the first add-on for your Spectrum.

ORIC Keypanels (105 x 275mm)
Self-adhesive label sets are printed in 'ORIC' light blue. Master those CTRL and ESC key combinations and create a reference to all ORIC's keyboard functions.

NOW in super ML PLASTIC.
We despatch to you first class post by return*.

A MUST FOR ANYONE INTERESTED IN ZX MACHINE CODE!

The finest range of utility programs for ZX Computers. Used by professionals. Very useful for beginners

ZX SPECTRUM MACHINE CODE SYSTEM (The key to machine code success)

SPECTRUM EDITOR/ASSEMBLER A powerful and essential machine code programming aid.
16K and 48K on same cassette + full documentation.
Major features: EDITOR with Auto line number and renumber, 40 column screen display, tabulated into fields for easy reading, 5 character label names, easy line editing and cursor control: SAVE/LOAD/VERIFY routines: output to ZX PRINTER. TWO PASS ASSEMBLER accepts all Z80 mnemonics: decimal or hex numbers: simple arithmetic on operands: Assembler Directives — ORG, END, DEFB, DEFW, DEFS, DEFL, EQU, DEFM. **ONLY £8.50**

SPECTRUM MONITOR Machine Code Debug/Disassembler
Enter, Run, Debug M/C programs. Compatible with BASIC. Breakpoints and Registers Display. Disassembler to screen or ZX PRINTER. 16K and 48K on one cassette + 30 page manual. **ONLY £7.50**

ZX81 UTILITIES (For everyone . . . beginner to professional)

ZX81 REMLOAD Machine Code Debug/Monitor
Explore and master machine code. Compatible with BASIC. CREATE A REM line — any length. BREAKPOINTS & REGISTERS DISPLAY. Fully documented 30 page manual and cassette **ONLY £6.95** 16K to 64K

ZX81 ZX-MC Machine Code Debug/Monitor
The professional one! ENTER/RUN/DEBUG M/C programs. SAVE/LOAD/VERIFY at double speed. BREAKPOINTS & REGISTERS DISPLAY. Self-contained machine code — cannot be used with BASIC. 36 page manual and cassette **ONLY £7.50** 4K to 64K

ZX81 SCREEN KIT 1 More screen power in your BASIC programs!
BORDERS — any size anywhere on screen. SCROLL in 4 directions. CLEAR and REVERSE part of the screen. FLASHING CURSOR anywhere on screen — simulates INPUT. DATA FILES SAVE/LOAD BASIC variables — Double speed. 880 Bytes machine code for instant response. Becomes part of your BASIC program. **ONLY £5.70** 4K to 64K

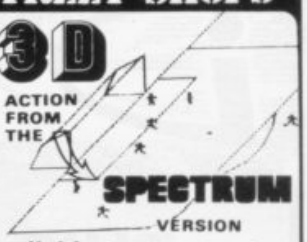
NOW IN YOUR HIGH STREET SHOPS

FOOTBALL MANAGER 3D

by Addictive Games

for **SPECTRUM 48K AND ZX81 16K**

ACTION FROM THE **SPECTRUM** VERSION



This superb game is **now available** from branches of **W.H. SMITH** * and **BOOTS.**

Manage your own team in this exciting game of skill which vividly captures the drama and excitement of real football.

FEATURES INCLUDE:
★ 4 DIVISIONS ★ F.A. CUP ★ PROMOTION & RELEGATION ★
★ TRANSFER MARKET ★ TEAM SELECTION ★
★ SAVE GAME FACILITY ★★★ *AND MUCH MORE!* ★★★

WHAT THE PRESS SAY ABOUT IT:—

IF YOU have always wanted to manage a football team, **FOOTBALL MANAGER,** *from Addictive Games, is for you — The game is ideal for a football fanatic but the most interesting thing for us was the 3-D graphics used to create the goalmouth action — the game is a winner.*
SINCLAIR USER FEBRUARY 1983

Although I'm no great football fan, I really enjoyed playing this game — excellent use is made of colour and user-defined graphics. The game is very logically put together, so that the development of strategy and tactics has a real effect. For example, one of my teams got through to the fourth round of the F.A. Cup where it was beaten by a second division side. This upset morale and meant that our promotion bid failed. Perhaps I should have given up the F.A. Cup run and held some good players back — the possibilities are endless. Brian Clough had better watch out!
* SPECTRUM VERSION ONLY. **ZX COMPUTING FEB/MARCH 1983**

TERROR-DAKTIL 4D

In a place forgotten by time, the beating of wings heralds an incarnation too horrifying to believe – Terror Daktil 4D. A game so terrifyingly real that you'll need all your courage just to remain at your 48K Spectrum screen. As the dreaded prehistoric monsters swoop down, intent on your destruction, a battered pistol and marksmanship are your only defence.
You must fight for your life and as the sun sets, your chances of survival begin to slip away. For at night, you'll only see the gleam of their eyes!
Terror Daktil 4D – a game beyond your wildest dreams; not just 3-dimensional graphics reaching out of your Spectrum to engulf you, but also the 4th dimension of time that turns day into menacing night at an alarming rate.
Unbelievable thrills await those brave enough to enter the lost world of Terror Daktil 4D.

Two more super 48K Spectrum programs:
PENETRATOR "...immensely playable, yet very difficult and horribly addictive." – **Computer & Video Games.**

THE HOBBIT "The Hobbit is far superior to any other adventure game available for the Spectrum" – **Your Computer**
"A game by which future games will be judged." – **P.C.T.**

Following last month's review of assemblers John Gilbert turns his attention to their counterparts the disassemblers.

Making machine code easier to understand

THE TERM disassembler has been used in many ways by professional producers of software to describe their products and some confusion has arisen as to what a disassembler should or should not do. The strict definition of a disassembler calls for a program which will translate the numeric values of machine code into the mnemonics of assembly language. There are other packages which do all kinds of things with machine code but do not fulfil that definition. The correct term for those packages is toolkit.

The mnemonics of assembly language look like shortened versions of Basic keywords. They are used to represent the machine code numbers which computers can understand but which human programmers still find difficult to cope with in great quantities. It is much easier to understand a mnemonic such as RET, which means Return to Basic, than its machine code counterpart, which in this case is 201.

Most disassembler packages include a monitor program which allows the user to change machine code stored in RAM which has been disassembled. The disassembler makes the editing process easier, as mistakes can be spotted quickly if the programmer has a disassembly and not just a list of numbers which have to be sorted.

When computers had just been invented there was little software and languages such as Basic and Pascal did not exist. Programmers had to use programs which consisted of long lists of numbers. You can imagine the trouble if those programs did not work. Every number in the program would have to be checked to see if it was correct.

The invention of assemblers and disassemblers made things easier. You could enter code in mnemonic form using the assembler and check the code using the disassembler.

When microcomputers were invented the disassemblers used on the large mainframe computers had to be altered to work on the smaller systems, as many of the instructions which were used on mainframes could not be used on micros.

The first disassembler to appear commercially for the ZX-81 was ZXDB, from Bug-Byte. The company has built its reputation with that package along with its ZXAS assembler and the reason was because it was cheap and ran on an expensive computer.

The Bug-Byte disassembler was fairly standard in its performance. It allowed you to specify the address, or position in memory, at which you wanted the disassembly to start. The program would disassemble one line at a time and you had to press NEWLINE for the next instruction in memory to be disassembled.

The ZXDB for the ZX-81 used two fields, or areas, on the screen in which to display information. The first showed the address at which an instruction was located and the second showed the disassembly of the machine code instruction.

Other disassemblers, such as the Crystal Computing Monitor and Disassembler for the Spectrum, use three fields. The extra area on the screen is used to display the numeric machine code on which the disassembler is working. It is a good idea as you can check the mnemonics and machine code against each other to see if the disassembler is working correctly.

'The strict definition of a disassembler calls for a program which will translate the numeric values of machine code into the mnemonics of assembly language.'

If a company produces both a disassembler and an assembler it usually makes both programs compatible. That means that both programs can be put into the computer to work together and dispenses with the need to load one program to enter code and then load the next to check that the code is correct.

Having both programs in RAM at the same time will make programming in machine code quicker and easier but the amount of memory left for machine code programs will be reduced drastically. The advantages outweigh the disadvantages, though, so it is a good idea to buy a disassembler which can be used together with an assembler.

Two problems occur when a disassembler starts to produce question marks because it has not been programmed to recognise a machine code instruction. One disassembler which does not follow the Z-80 instruction set is ZXDB from Bug-Byte. The program uses 8080 code instead of Z-80. Instructions which are common on the Z-80 are named differently on 8080. For instance, LD in Z-80 is called M in 8080 code. Those two names mean different things. The LD instruction means load a register with a value, whereas M means move.

Trying to use a disassembler which does not understand the full Z-80 instruction set is like trying to use BBC Basic on a Spectrum or ZX-81. As BBC Basic is not the same as Sinclair Basic, the machine would not recognise the extra commands of the other language. As a result, when buying a disassembler, make sure that the program understands the complete Z-80 instruction set and not just a subset.

Disassemblers can serve two purposes. They can be used to view code which you have stored in RAM or they could be used to look at the ROM of the machine

With a good disassembler you could obtain a listing of the complete Sinclair ROM for either the ZX-81 or Spectrum. If you knew sufficient about machine code you might also be able to tell

how the ROM works. To investigate the ROM, or go bug-hunting in it, you need the proper kind of disassembler. Picturesque produces a monitor and disassembler package which suits the purpose. The disassembler has to provide facilities for output to a printer, as the Basic interpreter and operating system within the ROM are very lengthy.

A true analysis would have you jumping to different parts of the ROM when JP, or JumP, instructions are indicated. JumP is similar to the Basic GOTO instruction but there are many options available with that command and the disassembler will help you to spot them.

Your disassembler should be capable of handling the RST instruction as it is used many times in the ROM. It means ReStarT and the instruction provides a quick entry point into the ROM for programmers using ROM routines in their machine code programs.

The RST 10 instruction, for instance, would send the computer control to the part of the ROM which deals with the printing process. The routine sets up the machine to display one character on the screen.

Most disassembler packages on the market for both Sinclair machines are being sold mainly as an afterthought to assembler packages. The disassembler has a very important role in computing and the second-class sticker with which it has been labelled is unfair.

> 'Many programs on the market could be streamlined.'

A disassembler should be a necessity when you are writing machine code programs.

If you are to buy one, take as much time about choosing it as you would when buying an assembler. In many cases it will be the disassembler which will disappoint you with its performance and not the assembler.

For instance, the Bug-Byte ZXDB was a breakthrough when it was launched but with hindsight it is somewhat mediocre. The standard of the documentation with ZXDB was far from satisfactory; as a result, the program was difficult to use.

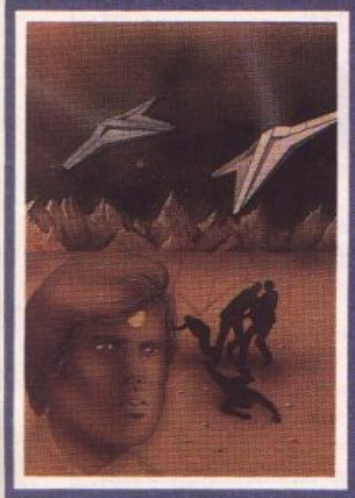
Disassemblers are becoming more complex all the time and there is not much which can be done to improve them. Many of the programs on the market, however, could be streamlined to fit into less RAM than is now the case.

dK'tronics, Unit 2, Shire Hill Industrial Estate, Saffron Walden, Essex, CB11 3AQ.

Crystal Computing, 2 Ashton Way, East Herrington, Sunderland, SR3 3RX.

Picturesque, 6 Corkscrew Hill, West Wickham, Kent, BR4 9BB.

P.S.S. THE FUTURE MAKERS
FANTASIES FOR ZX81 AND SPECTRUM



TAI

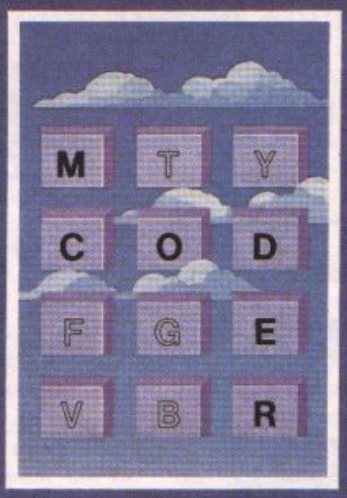
In any other time or galaxy, the dust ball world called TAI would have been quite unimportant. TIMES CHANGE.... Now it is the last remaining out-post between the advancing Imperial Fleet and the main planets of the Dorfian System. Unless the Imperial Forces can be held off untill the Republican battle fleet arrives, an entire civilization will be betrayed.... You have been chosen to defend TAI. The Galactic future depends on you.

ZX81 16K 4·95

HOPPER

Can you help Fergy and his friends get across the 4 lane highway and back to the lilly pond?
Includes Crocodiles, Logs, varying traffic speed etc.

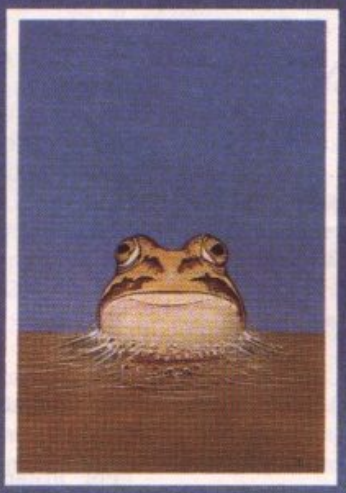
ZX81 16K 3·95

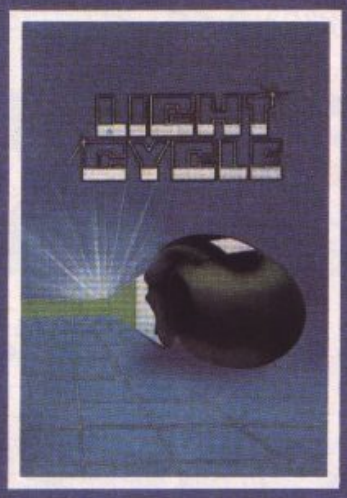


M CODER

Quite simply the most flexible integer compiler available today for either the 16K ZX81 or the Spectrum16K/48K.

ZX81 16K 7·95
SPECTRUM 48K 8·95

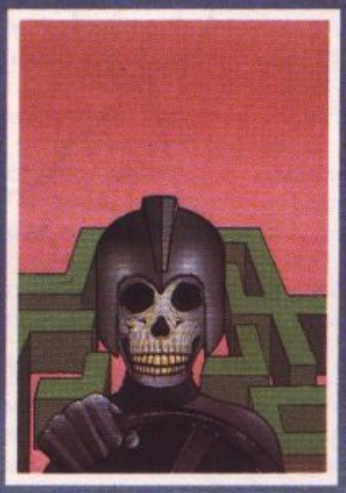


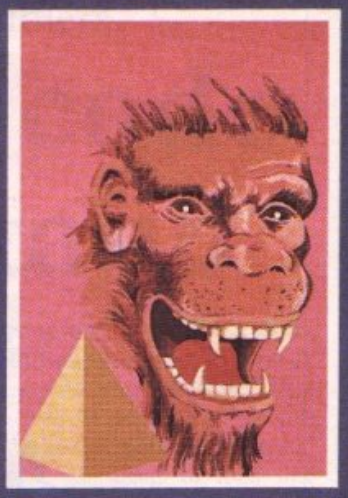


LIGHT CYCLE

All the speed and excitement you could want, very addictive. Race and block the computer or another player.

SPECTRUM 16K 48K 4·95





KRAZY KONG

All machine code version of the popular arcade game.
This program has all the features of the original and is every bit as fast.
3 different screens make it difficult to beat.

ZX81 16K 3·95

MAZE DEATH RACE

Drive through a giant maze. 9 times the size of the screen picking up points as you go – but watch out for other cars rocks, oil and ice.
Superb machine code game. Highly recomended.

for

sinclair ZX Spec 81

TOTAL SOFTWAR COMPATIBILITY!

ABOUT OUR PROGRAMMABLE INTERFACE

Surpassing the outstanding specification of our Interface Module II which still offers the best software support at its price, a Joystick Interface that is compatible with ALL SOFTWARE through its unique hardware programmable design.

The Interface plugs on to the rear connector of your ZX81 or ZX Spectrum.

Quick clip-on connections, which are configured from a reference card supplied, allow you to define which of the forty keys are simulated by which action of the Joystick. A pack of ten Quick Reference Programming Cards makes setting for your favourite games even easier. These can be filled in to show at a glance the configuration required and stored in the cassette case of the particular game. When you change to a game using different keys the module is re-programmed in a few seconds.

As with our Interface Module II the Programmable Interface accepts all standard switch Joysticks that are Atari-compatible. Two sockets are available which are connected together for two player games which use the same keys for both players.

The Interface resides in the keyboard address space and does not affect its operation or interfere with any other add-ons. A rear extension edge connector will accommodate expansion of your system.

The unique AGF key simulation principle makes it extremely easy to incorporate Joystick action in your own programs. All eight directions and fire are read by simple BASIC.

With every order comes a free demonstration program called 'Video Graffiti' plus a full set of instructions.

PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module as illustrated, complete with clip-on programming leads.
- Self adhesive programming chart detailing how to define which key is simulated by UP, DOWN, LEFT, RIGHT, and FIRE. This can be fixed on to the case of your computer or if preferred the protective backing can be left on. The chart is made of a very durable reverse printed plastic and is extremely easy to read.
- One pack of ten Quick Reference Programming Cards for at-a-glance setting to your games requirements. The card allows you to mark the configuration in an easy to read fashion with space to record the software title and company name.
- Video Graffiti demonstration program which is written totally in BASIC to illustrate how all eight directions and fire can be read. This is also a useful high resolution drawing program.
- 12 months guarantee and full written instructions.

- Rear connector for any other add-ons
- Use will not affect Sinclair guarantee
- Full instructions & 12 month guarantee

JOYSTICK INTERFACE II

for

sinclair ZX Spectrum 81

KEY FEATURES

- ★ Proven cursor key simulation for maximum software support
- ★ Accepts Atari, Competition Pro, Wico, Starfighter, Quick Shot, Le Stick, etc.
- ★ Second Joystick facility
- ★ Eight directions programmed in simple BASIC
- ★ Rear extension connector for all other add-ons
- ★ Free demo program, 'Video Graffiti' + full instructions

JOYSTICKS
ATARI CONTROLLERS
FOR USE WITH OUR INTERFACE Module II or VIC 20, Commodore 64, Atari VCS, Atari 400, Atari 800
If you require extra Joysticks for our original interface module mark order 'OLD' Joysticks
ONLY £7.54 inc VAT + P&P

** State "AGF version"*

"PLUS 21 ZX81 Titles"

We are pleased to say that future software support commitment for the AGF Interface II has been negotiated from many of the companies listed above.

For example all new titles from Imagine, commencing with Zzoom, will be compatible and carry the compatibility logo, shown below, on their packaging. This new logo scheme will help you select software that is guaranteed compatible and is also being adopted by many of the supporting suppliers.

At the time of printing it is hoped that pending releases from Bug-Byte will enjoy AGF compatibility.

RICHARD SHEPHERD SOFTWARE

£1,000 REWARD

For the most exciting adventure game you have ever created.

We are: Richard Shepherd Software. We Offer: The Largest range of top quality, original adventures for the Spectrum.

We are searching: For unusual and original adventure games — but we only want the best — No old-hat, old-style arcade games for us! we want to see great graphics, amazing animation and spectacular sound effects!

If you've got what we're looking for ...

We want to see it!

Exceptional games will be added to our range and the author rewarded with up to £1,000 !!! in cash !!!

We need games for:

Spectrum
Dragon
Oric
BBC
Commodore (VIC20 & 64)

Send samples of your very best games to the address below... don't wait ... act now!

PLEASE NOTE: OUR DECISION WILL BE FINAL — NO CORRESPONDENCE WILL BE ENTERED INTO. PLEASE ENSURE THAT YOUR NAME AND ADDRESS APPEAR ON THE TAPE TO ALLOW US TO CONTACT YOU SHOULD YOUR GAME BE CHOSEN.

RICHARD SHEPHERD SOFTWARE

FREEPOST, MAIDENHEAD, BERKS SL6 5BY.

PROGRAM PRINTOUT

KEN RYLETT of Burnage, Manchester wrote **Solitaire** for the 16K Spectrum to allow people to play the traditional game. Move one spot over the next to an empty space. The peg which has been jumped will then disappear. The aim is to finish with only one spot remaining. Moves should be entered as number, then letter.

Letters to be entered in graphics mode are underlined.

ROLE REVERSAL

ENTHUSIASTIC Sinclair programmers are all familiar with the experience of being chased round the screen by more or less intelligent ghosts.

David Gibbs of Sutton Coldfield, West Midlands has provided an opportunity for 1K ZX-81 owners to reverse their roles and chase the ghost round the screen.

The ghost has an advantage, in that it can walk off one side of the screen and re-appear on the other. Move using the usual cursor keys.

PAUL ASKEW of Worksop, Nottinghamshire embellished a simple mathematics test program for children with some very professional graphics. Cedric is a clown who likes to help children with their arithmetic. He will ask simple sums involving addition and subtraction and will give the correct answer if the incorrect one is input. (16K ZX-81).

Continued next page

MATCH THE FIGURE on the left with that on the right. Advance the figure on the left by pressing "1" and press "0" when the figures are identical. Clear a sheet of 16 figures for an increase in speed and a bonus. Clear eight sheets for another bonus and a slightly more difficult game.

The sooner you match your numbers, the higher your score. Match a space invader to gain an extra 300 points. The game ends when three lives are lost or more than 30 shots are fired in one sheet.

Peter Bernstein of Northwood, Middlesex, who wrote the game for the 16K Spectrum, says his highest score is 25,490.

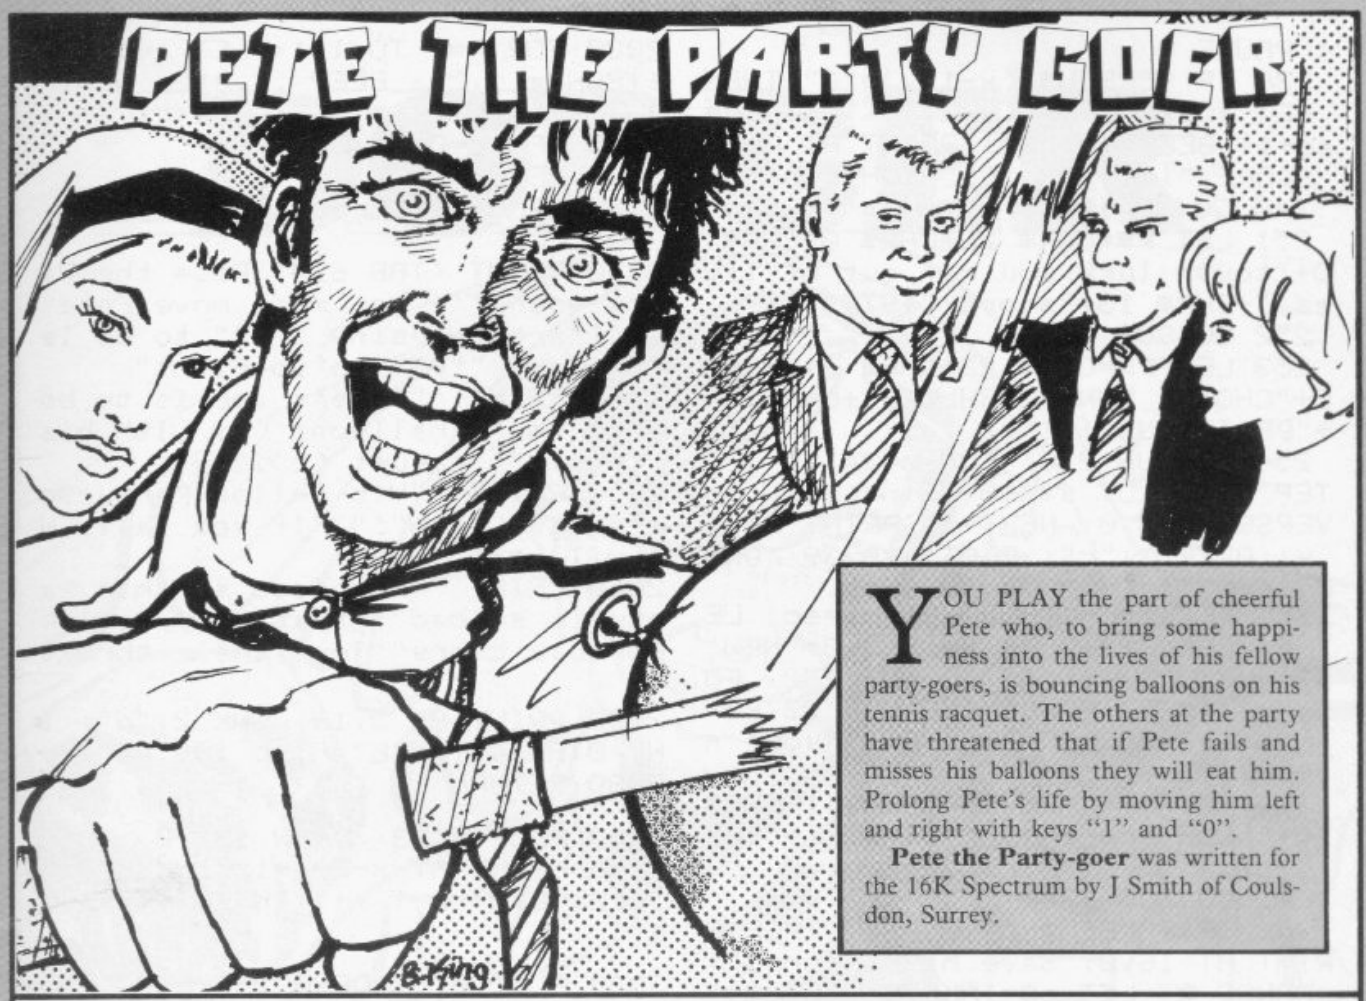
 200 RUN
```

YOU ARE situated at the top of the screen. Avoid the storm of black squares rushing at you by moving left and right with keys "1" and "0". At the start of the game you are asked to enter your speed and difficulty level. Entering "5" for both produces a reasonably fast game.

C Hornby of Hassocks, Sussex speeded the game by writing part of it in machine code. Enter the short initial program. RUN it, then enter the series of numbers two at a time, working from left to right, entering "S" to end the series. RUN the program again, delete all lines except line one, and then enter the main program. (16K ZX-81).

PETE THE PARTY GOER



YOU PLAY the part of cheerful Pete who, to bring some happiness into the lives of his fellow party-goers, is bouncing balloons on his tennis racquet. The others at the party have threatened that if Pete fails and misses his balloons they will eat him. Prolong Pete's life by moving him left and right with keys "1" and "0".

Pete the Party-goer was written for the 16K Spectrum by J Smith of Coulsdon, Surrey.

```

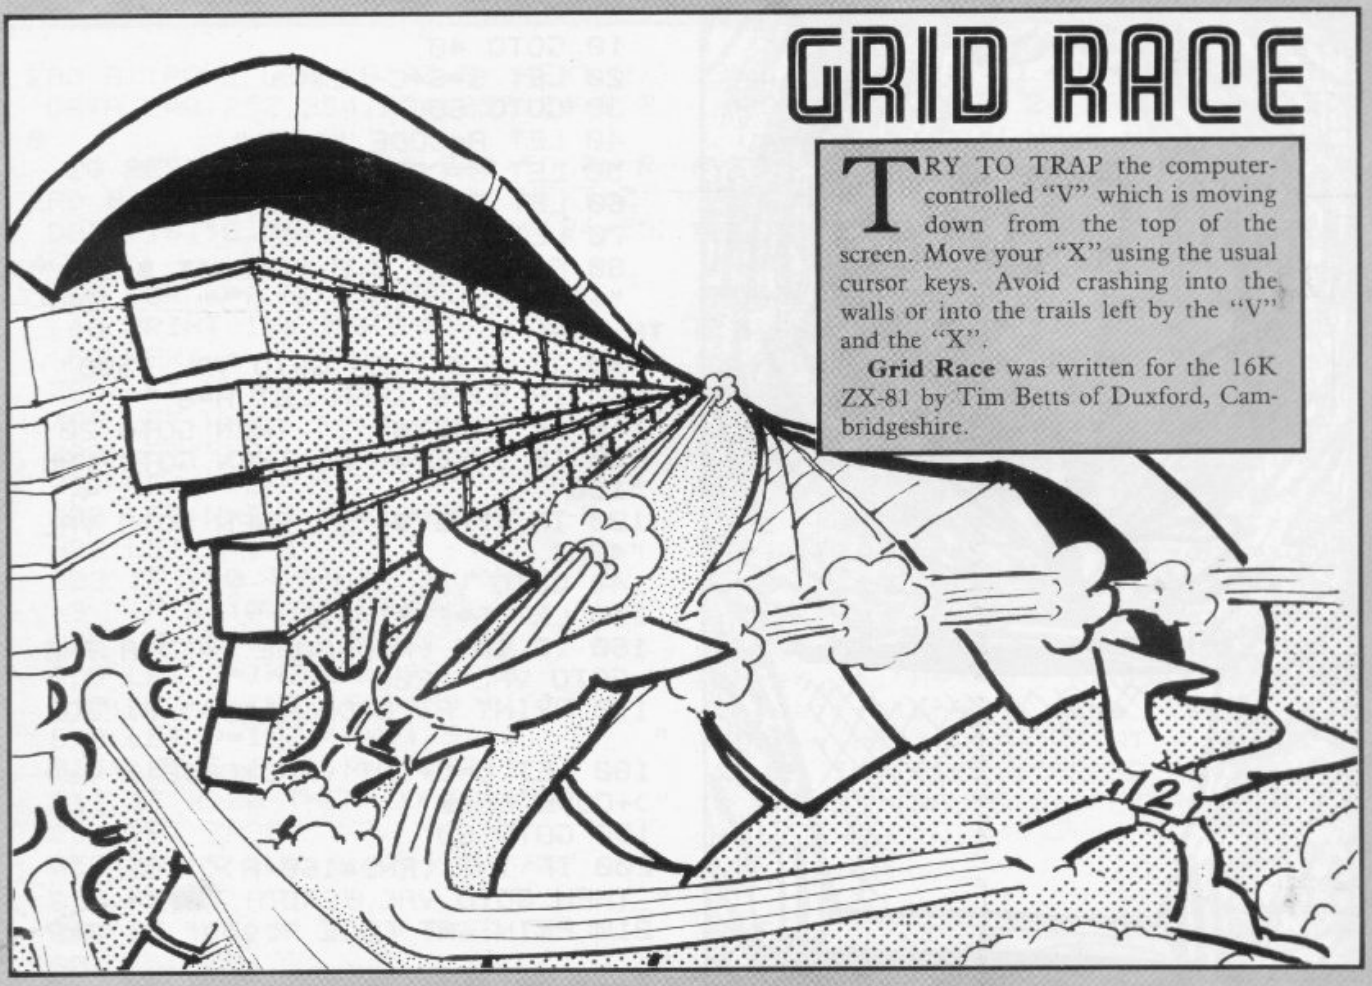
YOU START with $200 in the bank and your aim is to make as much profit as possible from your mine. It costs you $4 to dig one metre and each time you return to the surface your funds are altered to take account of your profit and expenditure.

You may find coal (coa) or gold (gol), or you may be unlucky and be involved in an explosion, which will cost you $200. Key 6 moves you down the mine and key 7 returns you to the surface.

Mark Evans of Welling, Kent wrote **Miner** for the 1K ZX-81.

GRID RACE



TRY TO TRAP the computer-controlled "V" which is moving down from the top of the screen. Move your "X" using the usual cursor keys. Avoid crashing into the walls or into the trails left by the "V" and the "X".

Grid Race was written for the 16K ZX-81 by Tim Betts of Duxford, Cambridgeshire.

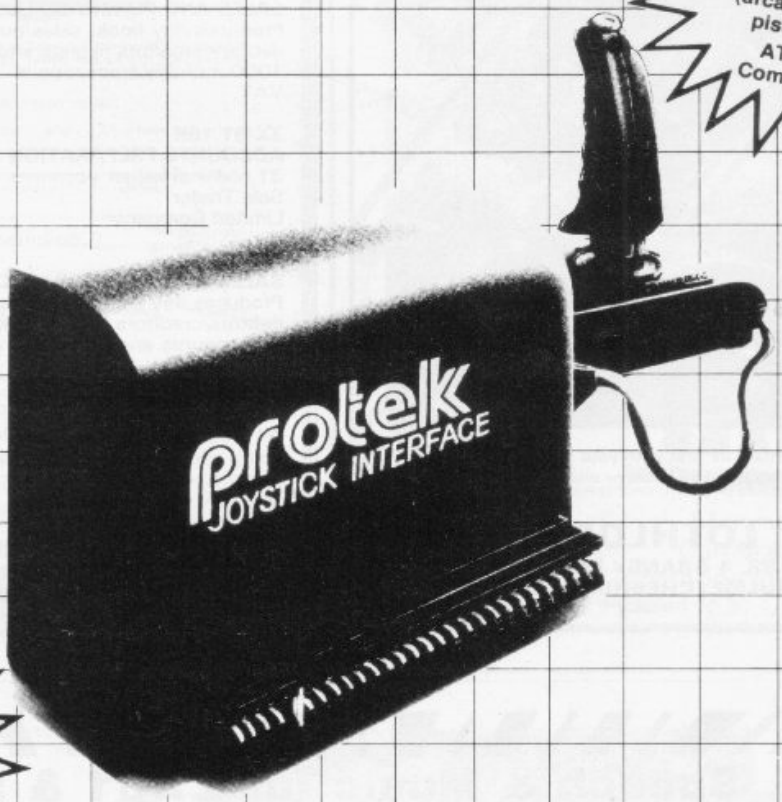
Arcade Action For The ZX Spectrum

SPECTRAVISION JOYSTICK
£9.95
(arcade action, pistol grip, ATARI™ Compatible)



Protek JOYSTICK INTERFACE **£14.95**

If you want Arcade quality control for your Sinclair ZX Spectrum, you'll find the Protek combination hard to beat. The Interface is compatible with some of the best Arcade games from top software publishers including:

Flight Simulation by Psion
Slippery Sid by Silversoft
Spectrapede by Protek

Plus many more.

The Protek Joystick Interface is simple to use. It just plugs in at the back of your Spectrum and is compatible with any "Atari type" Joystick Connector.

We recommend the Spectravision Joystick at only £9.95 for a Pistol Grip Joystick with a top and base fire button plus specially contoured shape and rubber suction cup footing for single hand operation.

Both units are available separately from

TRADE ENQUIRIES WELCOME

Subject to availability. Prices correct at time of going to press.

NEW: Speech & Music for ZX81 & Spectrum!

ZXM SOUND BOX

£29.95

- 3 channel sound chip gives a huge range of possible sound effects. Programmable pitch, level, envelope and noise source.
- For the ZX81 or Spectrum - no adaptor needed.
- Just plug it in. Other peripherals or Ram Pack can be plugged into the ZXM.
- Built in amplifier and loudspeaker.
- Audio in/out socket, can be used to amplify the Spectrum 'beep'.
- 9-pin I/O socket can be used with cheap Atari/ Commodore type joysticks.
- Comprehensive manual includes many example routines.

ZXS SPEECH SYNTHESISER

£32.50

- For the ZX81 or Spectrum - no adaptor needed.
- Let your computer talk back!
- 'Allophone' synthesis gives an unlimited vocabulary.
- Active filtering for improved speech quality.
- Other peripherals or RAM Pack can be plugged into the ZXS.
- Output to normal audio amplifier or to our ZXM Sound Box.
- Manual gives full details on how to use the ZXS, with many examples.

And Don't Forget Our Books;
EXPLORING SPECTRUM BASIC: £4.95 The book of answers. Explains Spectrum BASIC programming techniques in more depth than was possible in the Sinclair manual, illustrated by over 50 full programs. 192 pages.
THE EXPLORERS GUIDE TO THE ZX81: £4.95 The book for the ZX81 enthusiast. Games, application and utility programs plus much useful information on machine code and hardware. "Immediate and lasting value" (PCW).
All prices include U.K. carriage and VAT where applicable. Overseas customers add £1.50 per item for surface mail.
TIMEDATA Ltd. 16 Hemmells, Laindon, Basildon, Essex. SS15 6ED Tel.: (0268) 418121

TIMEDATA

SOUND with SINCLAIR

MAKE AMAZING SOUND EFFECTS WITH YOUR ZX 81, TIMEX Sinclair 1000 or SPECTRUM

THE ZON X

£25.95

incl p&p & VAT

- The ZON X SOUND UNIT is completely self-contained and especially designed for use with the ZX81, TIMEX Sinclair 1000 and Spectrum Computers. It just plugs in — no dismantling or soldering.
- No power pack, batteries, leads or other extras.*
- Manual Volume Control on panel — ample volume from built-in loud-speaker.
- Standard Sinclair — 16K Rampack or printer can be plugged into ZON X Sound Unit without affecting normal computer operation.
- Huge range of possible sounds for Games, Music, Helicopters, Sci-Fi, Space Invaders, Explosions, Gun-shots, Drums, Planes, Lasers, Organs, Bells, Tunes, Chords, etc., or whatever you devise!
- 8 full octaves. Uses 3-Channel sound chip giving programme control of pitch, volume of tones and noise, all with envelope control.
- Easily added to existing games or programmes using a few simple "BASIC" lines or machine code.
- No memory addresses used — I.O. mapped.

FULL instructions with many examples of how to obtain effects and the programmes, supplied. Fully guaranteed. British Made.

*Except with Spectrum you need the Spectrum Extension Board Order No. SE1 — Price £6.80 incl. V.A.T.

Payment may be made by Cheque, PO Giro No. 388 7006, Postal Order or Credit Card.
Export orders: — Bank Cheque, International Money Order, U.S. $ or £ Sterling.

Spectrum compatible printer

- ★ Obeys standard Spectrum commands.
- ★ Printing speed 120 lines per minute maximum.
- ★ Low cost paper supply.
- ★ Price includes power supply and interfacing.

This thermal printer, now available in the U.K., is the standard printer used with the American version of the ZX81. The printer plugs direct into the Spectrum but has a through port allowing the use of additional hardware through the same connector.

The size of the printer is 7¼ x 5¼ x 3½ ins. attractively packaged in a moulded matt black plastic case.

A separate power pack is supplied in a 2½ x 3½ x 2¼ ins. case.

Two switches mounted on the printer allow for on/off switching and also access to the test mode and paper advance commands.

The printing speed in the self test mode is 120 lines per minute.

The paper rolls are 4¼ ins. wide and 25 metres in length.

£99·95 Price includes - Printer, power supply, full interfacing, one roll of paper, VAT and p&p.

Please send me ..... Printer(s) at £99.95 each.
..... boxes of Paper (10 rolls per box) at £12 per box (incl. VAT, p & p).

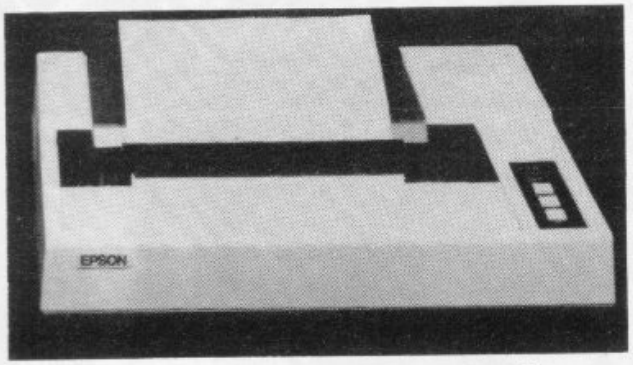
DEALER ENQUIRIES INVITED.

The Choice is Yours!



But do you really know which printer is best for your application?

As with the Computer market it's a difficult job these days knowing which printer is most suitable for your particular needs. Whichever manufacturer you turn to they tell you their's is ideal for the job.

Well, we at Hilderbay have been in computing for over 20 years. 20 years in which time we've gained an awful lot of experience. Experience we are happy to share with you – we are willing to evaluate your circumstances and advise on the best printer for the job at keen prices. We will make sure the printer you buy will be the best for your needs. So at the end of the day you won't be wasting money on facilities you won't use, nor will you have a printer which, though cheap, won't do what you need it to.

We also have a range of software for the Apple – i.e. Payroll £60, Bookkeeper £49, SSP £70 etc + VAT.

Another First from Hilderbay . . .
Word Processor Systems for ZX Spectrum

At last – sensible, functional systems that give your Spectrum a word processor facility.

System 1 A package that utilizes the Spectrum and an Olivetti daisywheel typewriter to give you a stand-alone word processor. The typewriter doubles as printer and keyboard but can be used as a typewriter while still connected to the Spectrum – expected availability Mid-July.

System 2 A package that can be 'tailor made' to suit your needs, comprises a parallel interface, customised Tasword Two software and printer (from our wide range). This system can be supplied for any computer however, we do recommend a typewriter style keyboard for fast professional use with Spectrum.

Spectrum Software: Payroll, Stock Control, SSP etc. Price on application.

JUST ARRIVED

Ideal for our System 2 package – a fast daisywheel printer that gives 20 CPS, 10, 12, 15 CPI and proportional spacing! Including a 1 year guarantee for only £399. VAT & delivery extra.

ALSO AVAILABLE

For Spectrum – Centronics type parallel interface including cable and connectors. Recognises LLIST and LPRINT. Does screen copy. Complete with driving software. Only £39.13 + VAT – please contact us about availability. Simple word processor for Spectrum free on request with printer or interface orders!

EAT, DRINK and be HEALTHY

ALTO-TECH Software makes this easy with their new range of programs for the Sinclair ZX Spectrum (48K only). ***Designed with YOU in mind.***

CALCOUNT: A simple guide to calorie intake. Eat yourself slim — in moderation of course! A complete meal capability with a calorie alarm. Allows you to "Tailor" the meal to your own requirements.

READOUT: CALORIES ONLY

CALFIFAT: Slighty more sophisticated, this program offers the same facilities as Calcount, but in addition, gives you fibre and fat content. Ideal for those on an F. Plan Diet.

READOUT: CALORIES, FIBRE and FAT

NUTRITION: For the serious food student, or the vitamin conscious. All the features of the Calcount program, *plus* comprehensive information on meal vitamins and other consituents.

READOUT: CALORIES, FIBRE, FAT, CARBOHYDRATES, PROTEIN, VITAMINS A, B1, B2, B6, B12, C and E

MINCOUNT: Complementary to Nutrition, this program gives you details of your meal nutrients and minerals. The programs, used together, help you maintain a balanced nutritional intake, so essential to health and fitness.

READOUT: CHOLESTEROL, BIOTIN, FOLIC ACID, NIACIN, PANTOTHENIC ACID, SODIUM, PHOSPHOROUS, POTASSIUM, CALCIUM, IRON, MAGNESIUM, MANGANESE, SELENIUM, ZINC and COPPER

SHORTLY AVAILABLE FOR BBC AND DRAGON COMPUTERS

BRIDGE MASTER

Bridge is more than just a card game. It is a compulsive hobby and a means of making friends wherever you go.

For the beginner the problem is how to learn the game. Where do you find a good teacher? Where do you find the patient partners you need while you learn?

Bridgemaster overcomes these problems. You bid and play the hands in exactly the same manner as you would at the card table. The computer supplies your partners and Terence Reese, a world expert, coaches you through all stages of the game.

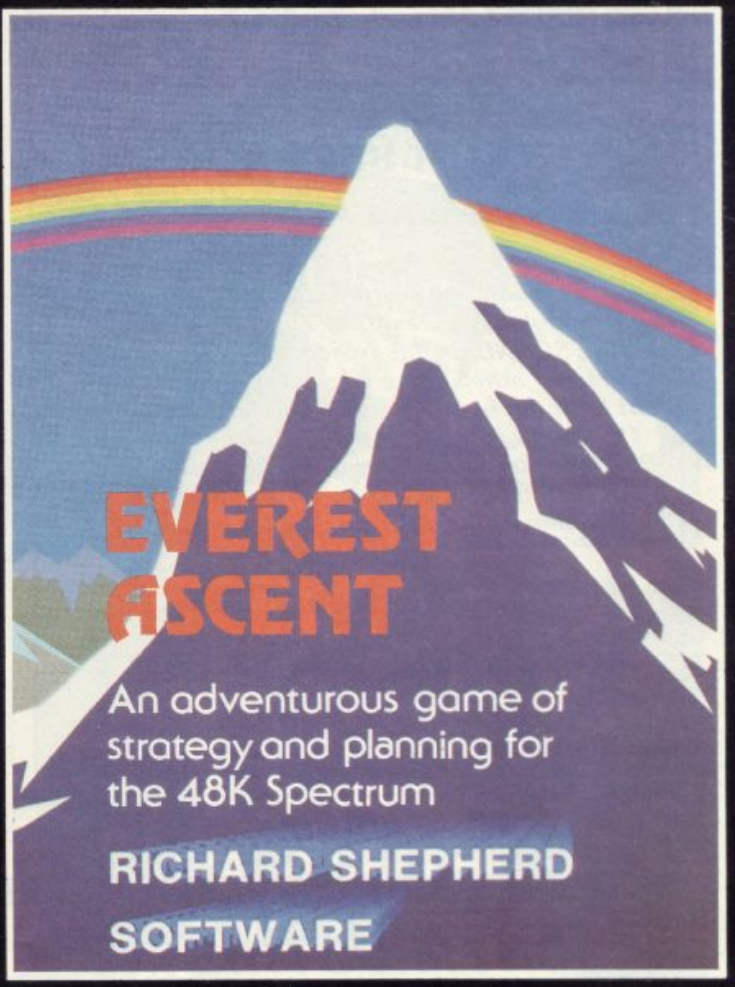
The package contains commentary tapes, computer tapes and a useful reference book – everything you need to learn bridge.

For the Sinclair ZX Spectrum 16/48K – **£24.95.** For the ZX81 16K – **£19.95,** ZX81 1K – **£19.95.***

Available from Boots, W.H. Smith and other leading computer stores or direct from Bridgemaster, Dept. S1, FREEPOST, PO Box 163, Slough SL2 3YY.

*Prices include VAT, post and packing. Cheques & PO's should be made payable to Bridgemaster.

NOW AVAILABLE FROM W. H. SMITH & SON AND JOHN MENZIES



TRANSYLVANIAN TOWER

A spine chilling adventure ... enter via the dungeons ... navigate your way through 500 3-D rooms ... survive the swooping vampire bats ... reach the terrifying top ... and rid the world of the evil Count Kreepie!

Can you survive the top of The Tower?

Full save routine for use during the hours of darkness!

48K Spectrum. **£6.50.**

SPECTRUM BEEP BOOSTER

. . . Puts Sound Through TV . . .

Probably the world's smallest sound modulator, measuring 2½ x 1½ x 1cm, TELESOUND 84 fits inside the ZX Spectrum and most other home computers to enable the BEEP to be heard directly from an unmodified TV. Sound can be controlled by the TV from a whisper to a roar. Fitting takes only minutes with three easy snap-on connections, eliminating soldering. Dealer enquiries welcome.

TELESOUND 84 costs £9.95 inclusive from

University Software

LIBRARY OF ADVANCED MATH/STAT/ECON

TAPE 1: MATRIX OPERATIONS — **SPECTRUM £6.95, ZX81 £5.95**

Side A: Inversion, multiplication, addition, subtraction and scalar multiplication of matrices and vectors within one single program. Any output can in turn be used as the input of the next operation without re-typing. Capacity: 16K ZX81: 25×25, 16K Spectrum: 17×17, 48K Spectrum: 48×48.
Side B: Determinants of square matrices.

TAPE 2: POLYNOMIALS — **SPECTRUM £6.95, ZX81 £5.95**

Side A: Includes quadratic equations (as degree 2 polynomials) and Newton-Raphson and half-interval search methods for higher degree polynomials. Computes the roots with 8 digits of precision.
Side B: You can plot polynomials in any interval and examine their roots, extremum points.

TAPE 3: INTEGRATION — **SPECTRUM £6.95, ZX81 £5.95**

Side A: Integration of functions by Simpson's and trapezoidal rules. Also computes the area enclosed by two functions.
Side B: Plot of integrals. Integration can be visualised on the screen.

TAPE 4: REGRESSION — **SPECTRUM £7.95, ZX81 £6.95**

Side A: A highly developed multivariate regression program featuring Log/Ln option on each variable (thus allowing exponential and geometric regressions), R^2, corrected R^2, standard errors, t-statistics, F-statistics, degrees of freedom, Durbin-Watson statistic, interpolation. Capacity (no of variables × no of observations): 16K ZX81: 2×500, 5×250, 10×140, 16K Spectrum: 2×220, 5×100, 10×50, 48K Spectrum: 2×1800, 5×900, 10×500.
Side B: Plot of bivariate regressions. You can see how your computer draws a best-fitting line on a set of numbered data points.

TAPE 5(a): LINEAR PROGRAMMING — **SPECTRUM £7.95, ZX81 £6.95**

Side A: A user friendly optimisation program capable of handling all sorts of linear programming problems (any combination of $<, =, >$, constraints and $x_i > 0, -\alpha < x_i < \alpha$ sign constraints). Features the cannonical equivalent of the primal, values of slack variables and the dual. Capacity (no of variables × no of constraints): 16K ZX81: 10×23, 15×20, 20×15, 16K Spectrum: 10×10, 48K Spectrum: 10×50, 25×40, 50×30.
Side B: Solutions of simultaneous equations.

TAPE 5(b): PROFESSIONAL LINEAR PROGRAMMING — **£14.95**

Available for 16K ZX81 and 48K Spectrum with above features plus 'save-data' and 'change-data' facilities. Any single data entry can be changed without re-typing the whole data.

HIGH SPEED MACHINE CODED

GAMES FOR THE ZX SPECTRUM

We now have a selection of new and original games. Because this advert has to be written well in advance, we cannot give more details here. Why not write to us for a full sheet, which will give full details of all our products.

COMPILER

We still market our highly successful compiler for the ZX Spectrum (either memory size). This will compile 99% of all integral, non-string Spectrum BASIC. It converts your slow BASIC program into a high speed version in machine code (up to several hundred times faster). No knowledge of machine code is needed. As well as handling normal basic, our compiler boasts a range of commands designed especially for writing games, these include mini sprite graphics (hi-res plotting of characters) and an explosion noise generator. All of this for £7.99 which includes an instruction booklet and both 16K and 48K versions. A recent review in *Personal Computer World* stated "It would certainly be a good investment for the Spectrum owner, who wants some of the benefits of machine code without having to learn its idiosyncrasies".

Part of a reply from a satisfied customer "I have just received your Spectrum compiler and I must congratulate you, it is an excellent program.

Make PO/Cheque payable to:

Wye Valley Software, Parton House, Kinnersley, Herefordshire. Overseas orders please add £1.50.

THE WIZARD'S WARRIORS: A fast moving game that matches developments in your skill as a player by becoming increasingly more devious. By offering to you the full range of options you can choose how to control your warrior throught the maze. A full implementation of this program enables such features as a continuous series of sound effects, arcade quality graphics, double-point scoring, and-for the very artful-bonus lives	**Spectrum £4.95**
FORTH: A full implementation. Ideal for writing fast moving arcade type games. Allows the full colour and sound facilities of the Spectrum to be used. Future Microdrive enhancements will be made available.	**Spectrum £14.95**
ADVENTURE ONE: Features a save game routine as the game can take months to complete. 'A remarkably good version . . . well worth the money.' *...Sinclair User...*	**ZX81 £5.95**

Taking the strain out of calculating the wages

Starting with the ZX-80 Ronald Sims has always found serious uses for his machines. Claudia Cooke talks to him about how they help.

NO-ONE was more pleased than Vera Sims when her husband Ronald invested in his first computer, a ZX-80. For the first time in almost 20 years, her workload was reduced from a day-and-a-half each week to only four hours. Mrs Sims has the job of calculating and paying the weekly wages for the 35 employees of the family automation business.

"I used to do it all in my head, with the help of a ready reckoner and it took me a day and a half. Now my husband has written a program which does it all for me and it takes a few hours. It has been marvellous".

Her husband has since changed to a ZX-81 with a 64K Memopack and the program covers job costing for up to 10 jobs, tax deductions, a variety of individual allowances and more than 30 subtotals and totals.

Mrs Sims, 69, says: "It was a bit strange at first because I didn't know the first thing about computers but I soon got the hang of it and now I'm really pretty quick".

Husband Ronald, 70, interrupts to reveal that the early days were not that simple. "She just wouldn't believe it at first. When the computer produced the figures she used to take them down quickly and work it out herself to make sure. I must say her calculations were as quick as those of the computer.

> 'The computer just cannot make the kind of human errors everyone makes'

"Now she realises that the computer just cannot make the kind of human errors which every person is bound to make at some time or another".

Although the Sinclair is his first computer, Sims is no newcomer to the processes of logic involved. He had worked in the radio industry since 1929 and had become fascinated by 'wirelesses' even before he left school at the age of 17.

"At school we had a physics master who was very keen on the wireless, as it was known in those days. I was charged with his enthusiasm and by the time I left I was one of few people who knew how they worked."

His first job was with a firm selling do-it-yourself wireless kits. People would buy the kits on Friday, he says, and return on Monday to find what they were doing wrong. His job was to advise customers exactly how to assemble them.

"In the early 1930s I realised my technical education was not keeping pace with the changes so I got a job with Siemens in telephone exchange development work. The logic then was the same as the logic of computers today and I was given a good training".

When the second world war broke

out, the company had just begun work on the development of radar and Sims became chief of test gear.

"There was such urgency because of the war that we had to start manufacturing in quantity products which had not been made previously. Being responsible for testing, it was the first time I really became interested in automation and automatic testing."

After the war, Sims left to join Michael Sobell, first as technical assistant to the buyer and then as chief buyer. He stayed with the company for 12 years and says that without Sobell's commercial guidance he could never have started his own business.

Start it he did, 25 years ago, when he detected a gap in the industry for automation. Today his company, Lectromec Controls, is still flourishing in south London, run by his three grown-up sons and his ZX-81.

He is working on a cashflow program for the firm, although he is doubtful whether his Memopack can cope with a sufficient number of invoices.

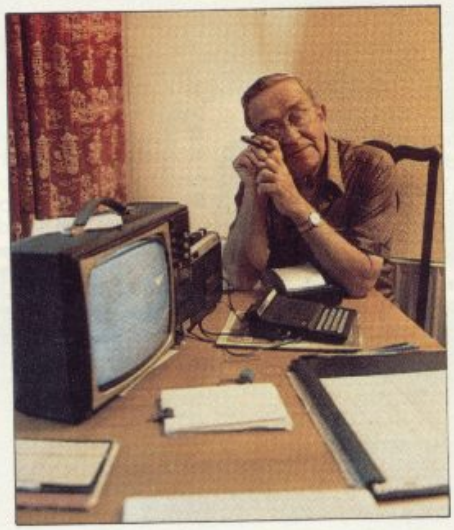
His wages program took many months to compile but the result has been worthwhile. Not only does it do the job much faster, it rules out the necessity for Mrs Sims to have her cash sheets checked by someone else before handing-out the pay.

"If you make a mistake you just look at the picture and know if it's right or wrong", says Mrs Sims. "The only thing is that you lose your brain, because you just look at the picture and copy it all down. I used to have to make so many calculations in my head but now I almost think you could become brainless within a few years."

Sims has one criticism of Sinclair, levelled at the printer. "I think it was very ambitious to produce this printer but I think it leaves a lot to be desired. It prints so badly; I think it's the thermal paper. If you leave it switched on all day, which we might need to do often, the whole thing gets warm and the print blurs".

On the whole, though, he sees his computer as a great boon and not only for work purposes. "We have four grandsons and you should have seen them with all those computer games at Christmas. We couldn't drag them away from the set. We all enjoyed it".

The eldest grandson, aged 12, has already had the ZX-80 bequeathed to him, together with the 16K memory.



He is at least as enthusiastic as his grandfather.

Now Sims is working on a conversation program to use with his grandsons at this year's Christmas gathering. It is a marvellous program so far, tailored individually to each of the four boys so that if one gives the computer his name, it is liable to answer back with the name of his brother.

A selection of 10 answers to each response from the boys appears at random, resulting in some highly-entertaining *non sequiturs*, as well as some startlingly accurate replies.

When asked how I was feeling by the computer, I replied "very hot", only to be told rather cheekily: "You look all right to me". When I agreed with the computer's suggestion, "I hear they call you Podge", it replied curtly. "Stop mucking me about".

Sims hopes to develop the program to around 10 or 15 minutes by Christmas and is gaining evident enjoyment from the work involved.

> 'I think it was very ambitious to produce the printer but it leaves a lot to be desired; it prints so badly. If you leave it switched on all day the thing gets warm and the print blurs.'

Aside from the computer, he and his wife are kept busy at their home in Ewell, Surrey. Mrs Sims is a regular bowls player, although sadly out of action during my visit due to a back injury. Her husband likes nothing better than to sit down for an hour or so and play the organ. He is from a musical family and as a child learned to play a variety of instruments, including the piano, violin, flute and piccolo, but his favourite remains the organ. "I particularly love playing classical music. I have always found it relaxing. To return home and get lost in the music for a time is a wonderful way of recovering from work".

The Sims also have a narrow boat, moored on the Thames, to which they retreat whenever possible during the summer months to enjoy the sun and the fresh air.

"Mostly we take it on the Thames these days, rather than the canals, but it is a wonderful way of relaxing. You don't have to arrange it all in advance; you just decide to go and that's it. It's a kind of freedom which is very valuable in business because, contrary to popular opinion, you cannot just take-off on holiday overseas whenever it suits you. You never know what will happen until the last moment".

Both are now semi-retired and the father figure wisely attempts to keep his nose out of the family business to a great extent, leaving his sons to run it the way they wish to do.

"I never pushed them into it, or expected too much of them. They all worked for other firms for a few years before joining me but I must admit it is pleasant that they all wanted to join. Now one is the managing director, one is sales director and the third is really installation manager".

One of his sons has also become a highly-proficient organist, playing in a dance band. His father pours generous praise on his talent.

Married for 43 years, the Sims are a contented couple, although not content to sit back and do nothing. Theirs is an active life, made more so by the advent in their home of the computer.

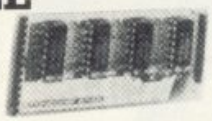
They certainly defy any theory that computers are for the young. It was Mrs Sims who, having read *Sinclair User*, became the first person to nominate someone for the title of User of the Month — her husband.

She nominated him not only for his wages program but also for the fact that he derives so much enjoyment and relaxation from compiling the programs. His enjoyment of making the programs, she says, is almost greater than his enjoyment of operating them in his computer and although she steers clear of programming, she has learned a new skill at an age when few women expect to do so.

SPECTRUM AND ZX81 HARDWARE

The famous Panda Expandable Ram Pack. Massive 16K add-on memory which can easily be expanded to 32K with an optional plug-in module. Supplied in rugged no-wobble design, rugged, injection moulded case, contoured to fit the ZX81 snuggly. Compatible with other add-ons (printer etc). LED on/off indicator. No additional power needed just plug in an go. British designed and made from top quality components throughout, guaranteed 12 months. **£19 · 95**

EXPANSION MODULE



The 16K 'Panda' is easily expanded from 16K to 32K by adding this expansion module as and when you need it. **£14 · 50**

GIANT PANDA

Giant Panda the two together. Buy the Panda and the Expansion Module at the same time for a gigantic 32K bytes and save.
Complete at a special price of **£34 · 00**

PROFESSIONAL CASED KEYBOARD TYPE FD42

FOR ZX81 OR SPECTRUM

This famous, best selling product immediately converts your ZX Computer into a sturdy, attractive and professional unit, with full size typewriter keyboard. A tough plastic case encloses the keyboard, PCB and power supply. It has 42 keys including all the ZX81/Spectrum graphic characters printed on them. The full travel key switches have gold plated contacts and guaranteed life of 10^6 operations. It's so easy to install! You simply unscrew the ZX PCB from its case, screw it to the FD case, and plug in the keyboard. No soldering. Access to user port is unobstructed for memory upgrade etc. Full instructions supplied. **£29 · 95**

Fitting service **£4 · 00**

RAM Adaptor Board—enables you to fit 16K Expansion (all types) inside Fuller-case— **£9 · 75**

TYPE FDS FOR ZX81 OR SPECTRUM

Our new advanced keyboard has the same, fine specifications as the FD42 system, but with a new re-designed case, space bar and double-sized shift and enter keys. A must for the discerning ZX81 or Spectrum user. **£39 · 95**

ZX KLIK—KEYBOARD

If, like many ZX81 users, you are fed up with the dead feel of the touch sensitive keypad then consider the well tried 'Klik-Keyboard'. This is a simply fitted genuine push button keyboard which has been designed as an exact replacement for, and is no larger than, the existing keypad. ■ Fits on to the ZX81. ■ Full 40 keys plus one spare for any purpose. ■ No soldering—just plug in. ■ No trailing wires. ■ Clear permanent two colour legends. ■ Positive feel and sound as data is entered. ■ Speeds up programming enormously and reduces errors. ■ Fitting service offered £2.00 extra (remember to send your ZX81). **£24 · 50**

SPECTRUM JOYSTICK

NOW AVAILABLE FROM **AFDEC**

Outstanding Features

- Self centring stick.
- Super strong nylon and steel construction, built to last.
- A total of 8 directions plus 2 large fire buttons.
- Arcade proven moulded leaf switches ensure incredible reliability.

For **ZX Spectrum** Complete with self contained box interface which simply plugs into the Spectrum expansion port (with or without printer) **£25 · 00**

THE SOUND EXPANDER

A superb economical addition to your ZX Spectrum. Clear, dynamic sound effects will really enhance your enjoyment of the new exciting programs available for the Spectrum. Our new sound amplifier comes with lead, pre-setable volume and built-in loudspeaker. Simply plug into the mic input, it fits neatly behind the Spectrum. **£7 · 50**

STOP PRESS!

REDUCED due to volume sales
16K Spectrum owners—upgrade to 48K with a Spectrum Upgrade Pack complete with full instructions.
No Soldering.
Issue II and III. **£26 · 00**

The lowest cost 16K RAM pack known to us!

■ Boxed ■ Tested ■ Guaranteed
■ Thousands in use. **£18 · 50**

MiCROL©

SERIOUS SPECTRUM SOFTWARE only £9.95 each!

USE AND LEARN

Your perfect Spectrum starter Kit. 25 original BASIC programs you can use immediately, PLUS 118 page manual to help you get the most from your 16 or 48K Spectrum. 25 programs include: Music Composer, World Atlas, Computer Term Glossary, Screen Designer, Star Maps – PLUS games and powerful routines to use in your own programs: graph-drawing, text-editing, sorting, searching and much more. 118 page manual includes detailed description of programming techniques, full listings of all programs, and articles to develop your own program-writing skills.

"Excellent" A.R. West, Surrey. "First-time loading, user-friendly, superb documentation" J.E. Mann, Leeds.

THE DATABASE

Whether you want to update mailing lists, manage customer accounts, or simply produce an index of your record collection, THE DATABASE makes it easy and enjoyable. A breakthrough in power *and* practicality, THE DATABASE allows you to store information on any subject in the way *you* want, and gives you a full range of commands to display, update, sort, search and print – even perform calculations. Massive storage capacity: 1,000 lines in memory at a time, over 7,000 names and addresses on a single C90 cassette. See for yourself why THE DATABASE is the most advanced 48K Spectrum database available – far more powerful *and* practical than Sinclair's VU-FILE and all other "competitors".

THE SPREADSHEET

Based closely on Visicalc, the world's best-selling program, THE SPREADSHEET turns your 48K Spectrum into a "super-Calculator" that helps you solve all kinds of number-based problems quickly and easily. Hundreds of applications in business, engineering and science – and just as versatile for home finance management. Invaluable in education too, helping develop maths ability and confidence. In power, flexibility and ease of use, THE SPREADSHEET outperforms all other Spectrum spreadsheets – including Sinclair's VU-CALC. See for yourself, with the security of MiCROL'S 14 day money-back Guarantee.

THE WORD PROCESSOR

The only full feature, professionally-written word processor for 48K Spectrums. Use it to produce memos, letters, reports – THE WORD PROCESSOR has the features you need, including flexible editing, justification, centering, and automatic "word wrap". Simplicity itself to use, THE WORD PROCESSOR uses the same "what you see is what you get" principle as word processors costing hundreds of pounds more. 30,000 character storage capability for real-work applications, and it's easily adapted to work with full size printers. Once again, MiCROL sets the standard in serious Spectrum software.

AVAILABLE NOW

and every fortnight . . . order your copy **TODAY.**

QUEST

FOR ANY SPECTRUM

SIMPLY THE BEST

THE BLACK HOLE

THE SCENE: Alien spacecraft are using hyperspace drive to enter our universe through a black hole. Their intent is destruction.
YOUR MISSION: To uphold the defence of your universe as long as possible while inflicting the maximum damage on alien forces.
YOUR WEAPONS: Positive and Negative Ion Guns are deadly at any range but the ion stream is bent by the massive gravitational field of the black hole. The Neutron Blaster is equally deadly but has only limited range.
YOUR BATTLE: You are under constant attack from the alien force which pits fiendish offence craft against you in ever increasing intensity, in deadlier and deadlier form.
How long can your fleet of ships survive? How many enemy craft can you destroy? 100% super efficient machine code allows all this action to be packed in to run on the 16K (or 48K) Spectrum. Superb animation, high resolution graphics, incredible explosive and full sound effects combine to make "Black Hole" set a new standard in Spectrum software. Also features a special learning mode to help develop your skills.
Embedded in the software is our unique score validifier which enables us to introduce a new dimension to computer games. The top ten scorers in each calendar month from April through September will receive a "I'm a Black Hole addict" T-shirt and the chance to compete for prizes to the value of £500 in a championship to be held at the end of the year. We will then publish a list of the top 1000 scorers so you can find out just how good you are.

HOW GOOD ARE YOU? Take up the "BLACK HOLE" challenge NOW and find out. Send £5.50 to QUEST, 119 THE PROMENADE, CHELTENHAM, GLOS GL50 1NW to receive your copy of "BLACK HOLE" by return first class post together with a membership number entitling you to discount on our forthcoming blockbusting software.

Trade enquiries welcome excellent terms available

A NEW DIMENSION IN SPECTRUM SOFTWARE

Nick Goldman and Jerry Seabridge show how to merge programs without much difficulty

Two into one will now go on the ZX-81

ONE PROBLEM until now with the ZX-81 has been that when a program is loaded from tape any previous program in the computer is NEWed and lost. That means that two programs, each saved separately on tape, could not be merged into one program. That would clearly be useful for, say, writing subroutines which could be written and tested separately and then merged with a main program on a different tape. The merge feature has been included on the Spectrum and the routine we developed means that now two programs can quickly be combined into one, with few restrictions on the programs so merged, on the ZX-81.

The procedure used is outlined and explanations of the important steps are given. The basic theory is to reserve space in the 16K memory by putting RAMTOP, the address of the first byte, above the Basic system area, to a value below the normal 16K value of 32768, and then transfering the first program, byte by byte, into the reserved space.

The second program is then entered, along with a routine which will retrieve the first program, add it to the second program, and correct the values of line lengths — the third and fourth bytes in each program line, see page 171 of the ZX-81 manual — and so on, so that the program will not crash or behave abnormally. Here is the procedure:

First, the user's first program is entered from cassette tape. Restrictions on the program are that the line numbers must all be lower than 9899 but greater than the greatest line number of the user's second program, yet to be loaded. That is so that when the two programs are merged eventually, the line numbers will be in the correct order and the computer will not crash. To this program must then be added the final line:

XXXX REM END

where XXXX is the line number, which must be big enough to make it the last line of the first program but must still be less than 99. When the program is entered, the following direct commands must be entered, in the correct order:

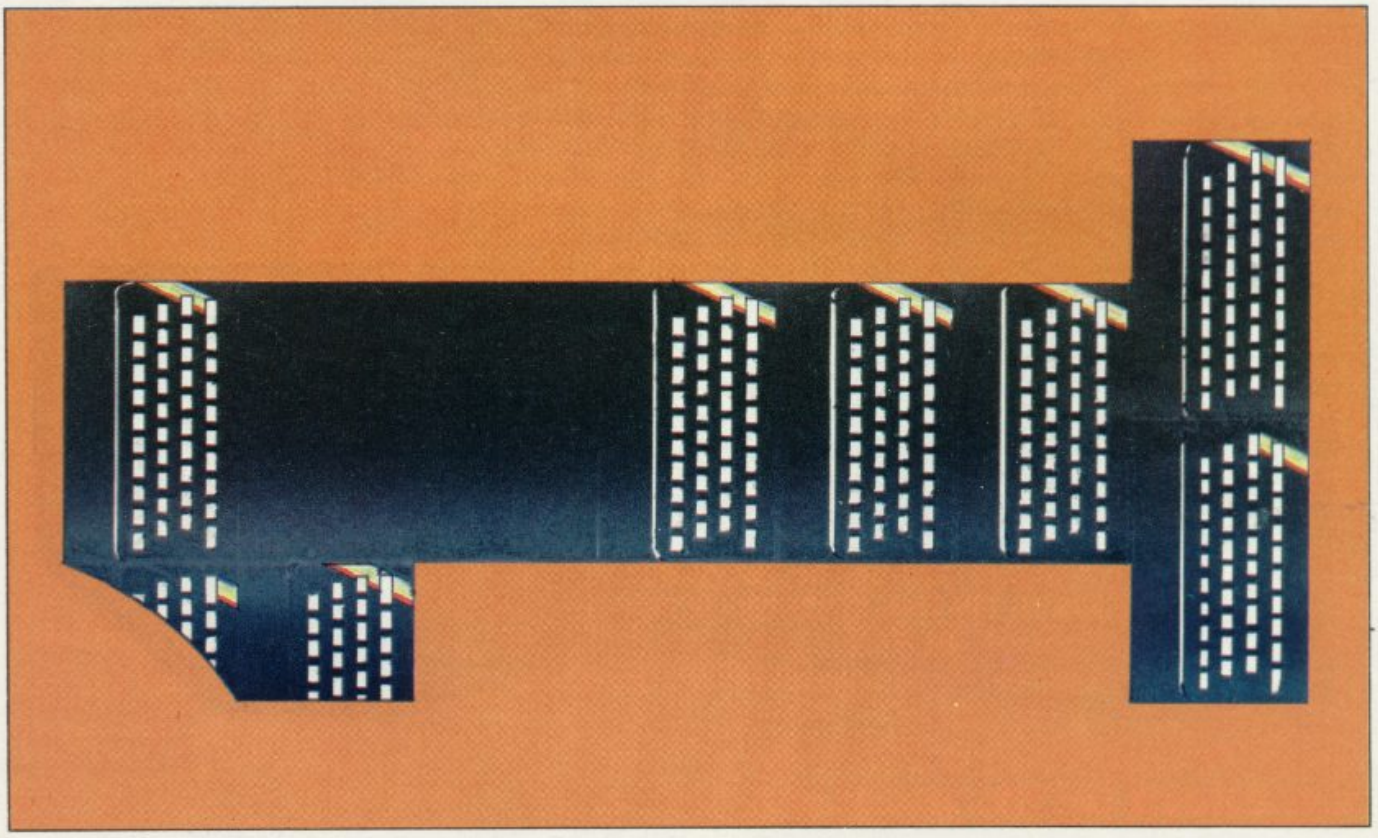
```
LET X = PEEK 16396 + 256*PEEK 16397 — 1
LET Y = 49230 — X
PRINT Y
```

and the value of Y should be written or remembered. Then:

```
POKE 16388, Y — 256*INT(Y/256)
POKE 16389, INT(Y/256).
```

X, the value of D FILE — see chapter 27 of the ZX-81 manual — minus one, is the last byte of the program and is thus the last byte which must be transferred. Y is the location where the first byte of the program will be stored — 49230 was chosen as it leaves a little spare room before the end of the computer's 16K; and RAMTOP is poked to that value — the two POKE commands — so that when NEW is executed the transferred bytes will not be erased. That can be verified by typing:

PRINT PEEK 16388 + 256*PEEK



16389 which should give the value of Y which was written.

Next the routine given in listing one, lines 9900 to 9920, is added to the first program. Then type:
GOTO 9900 followed by:

NEW as soon as the computer has finished the loop starting in line 9900.

That routine copies the bytes of the first program into the memory, starting at the location given by the variable Y. NEW is executed to clear everything except those stored bytes. To verify that the first program is still stored above RAMTOP, type:
PRINT PEEK (your value of Y)*256 + PEEK (your value of Y + 1).

That should return with the first line number of your first program.

The next stage is to load your second program from tape. The program should have all of its line numbers greater than 13 but smaller than the smallest line number in the first program, so that, again, the eventual lines when merged will be in the correct order.

Once that is done the routine given in listing two — lines 1 to 13 only — should be typed-in, and then the following direct commands:
LET Y = (your previous value of Y)
LET K = PEEK 16396 + 256*PEEK 16397
and after those, REM statements must be typed-in, as lines 9900 and 9901 in listing two. Each REM statement should include 100 Xs and there should be 10 such REM statements for each 1K of the first program which has already been copied above RAMTOP.

After one REM statement has been typed-in, the other can be duplicated quickly by using the EDIT facility and adding 1 to the line number each time the line is copied. In that manner the correct number of REM statements can be produced quickly.

Listing 1.

```
9900 FOR F=16509 TO X
9910 POKE Y-16509+F,PEEK F
9920 NEXT F
```

As soon as the REM lines have been typed-in, the command GOTO 1 should be entered. The routine — lines 1 to 13 — will then transfer the first program back from above RAMTOP back to the main program, and when the report code 9/13 — STOP executed in line 13 — is seen, the final. The merged program can be tidied by deleting lines 1 to 13 and any left-over REM lines after line 9900 may also be removed.

This is how the final 13-line routine works:

The first two lines POKE RAMTOP to its usual (16K) value of 32768. That is so that as the routine progresses, the space where the first lines were stored can be over-written once those lines have been re-transferred, and that enables longer programs to be merged.

Lines 3 to 4 check for the location of the REM command in the line:
XXXX REM END
at the end of the first program, that being the marker used to indicate the end of the first program, and the loop passes to line 5 with the variable F being the location of this REM command.

The variable K which was defined previously by direct command is the location of the first byte in the first REM line — line 9900 — and is the location into which the first byte of the first program is POKEd. The REM statements are used to reserve space below the Display File — we spent some time trying to POKE the system variable D FILE but with no success — and the first program is simply POKE into the locations occupied by the REM lines. Thus lines 5 to 8 POKE the first program into the space reserved by the REM lines, except for the CHR$ 118 which indicates the last character in the line:
XXXX REM END
Lines 7 and 9 are to clear the space which was occupied by the first program.

Finally, lines 10 and 11 count the extra Xs left over from the last REM line POKEd into and line 12 POKEs the new length of the last line into the appropriate location. That means that the line
XXXX REM END
will finally become:
XXXX REM END (+ left-over Xs from the REM line)
e.g., XXXX REM END XXXXXXXXXXXXX
and the appearance of this is an indication that the merging is successful. Of course, if the final REM line had exactly the correct number of Xs, the line will remain
XXXX REM END

Using this routine we believe that any two Basic programs can be merged into one. Of course, that does not extend the limit of 16K imposed by having only a 16K RAM pack and it should be noted that any variables stored will be lost as the procedure is followed.

A large number of direct commands have been used where they could have been included in the two routines we have given — listing one and two — since if the procedure is to be worthwhile it should be as short as possible.

For long programs it is obviously superior to run the two routines in FAST mode but that is not very informative if for any reason the computer should crash. Therefore until you are confident that you have the procedure correct, we suggest that you take the extra time to run the routines in SLOW mode and keep an eye on the computer, even if that takes a long time.

> 'Until you are confident that you have the procedure correct we suggest that you take the extra time to run the routines in slow mode and keep an eye on the computer'

Listing 2.

```

ORWIN SOFTWARE: ZX81 CASSETTES

THE BEST SOFTWARE (BY VARIOUS AUTHORS) AT LOW PRICES

"Michael Orwin has built a reputation for value-for-money software and his Cassette 4 offers quantity as well as quality."

Sinclair User, October '82

"If each game was on a separate tape and selling for £5 each I would still recommend them. But all on one for £5 . . . ! This sort of value for money just has not been seen before on any personal computer."

"Without sounding pushy I would like to conclude this review by saying — if you have a ZX-81 and like games, then you should buy Michael Orwin's cassette 4."

2 extracts from *ZX Computing,* Oct/Nov '82

"Eight games, including an excellent version of the Scramble arcade game . . . Easy to operate, graphically impressive and good value for money."

The Times, Saturday 11th December 1982 (about Cassette 4)

CASSETTE 1 **£3.80**
(eleven 1k programs)

Machine code:

React, invaders, Phantom aliens, Maze of death, Planet lander, Bouncing letters, Bug splat.

Basic:

I Ching, Codebreak, Robots, Basic Hangman. PLUS Large screen versions of Invaders and Maze of Death, ready for when you get 16k

CASSETTE 2 **£5**

Ten games in Basic for 16k ZX81

Cassette Two contains Reversi, Awari, Laser Bases, Wordbreak, Rectangles, Crash, Roulette, Pontoon, Penny Shoot and Gun Command.

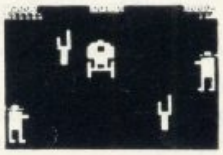
CASSETTE 3 **£5**
8 programs for 16k ZX81
STARSHIP TROJAN

Repair your Starship before disaster strikes. Hazards include asphyxiation, radiation, escaped biological specimens and plunging into a Supernova.
STARTREK This version of the well known space adventure game features variable Klingon mobility, and graphic photon torpedo tracking.
PRINCESS OF KRAAL An adventure game.
BATTLE Strategy game for 1 to 4 players.
KALABRIASZ World's silliest card game, full of pointless complicated rules.
CUBE Rubik Cube simulator, with lots of functions including 'Backstep'.
SECRET MESSAGES This message coding program is very txip qexi jf.
MARTIAN CRICKET A simple but addictive game (totally unlike Earth cricket) in machine code. The speed is variable, and its top speed is very fast.

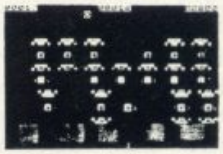
CASSETTE 4 **8 games for 16k ZX81** **£6**

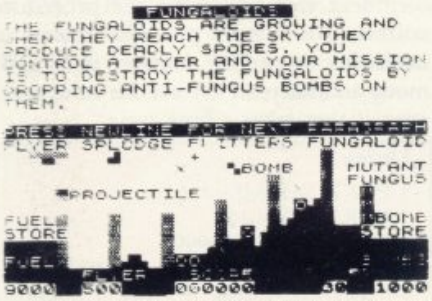
ZX-SCRAMBLE (machine code) with 3 stages.
Bomb and shoot your way through the fortified caves.

GUNFIGHT
(machine code)



INVADERS
(machine code)





GALAXY INVADERS (machine code)
Fleets of swooping and diving alien craft to fight off.

SNAKEBITE (machine code)
Eat the snake before it eats you. Variable speed. (very fast at top speed).

LIFE (machine code)
A ZX81 version of the well known game.

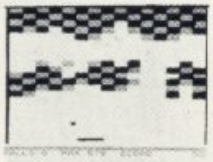
3D TIC-TAC-TOE (Basic)
Played on a 4 × 4 × 4 board, this is a game for the brain. It is very hard to beat the computer at it.

7 of the 8 games are in machine code, because this is much faster than Basic. (Some of these games were previously available form J. Steadman).

CASSETTE 5 **8 games for 16k ZX81** **£6**

BYTE-MAN (machine code)
(previously available from Mindseye)

BREAKOUT (machine code)



SPACE RESCUE (machine code)
(previously available from Mindseye)

BLITZ (machine code)

PLANETOIDS (machine code)
Rotate, move, fire and hyperspace controls. Wide range of choice of speed and difficulty.

DODGEMS (machine code)
Dodge the computer's car while eating the dots.

DRAUGHTS (machine code)
Three skill levels.

MERCHANT (Basic)
Make your fortune on trading voyages in the Mediterranean and beyond.

7 of the 8 games are in machine code because it is much faster than Basic.

Please make cheques payable to ORWIN SOFTWARE.

ZX81 & SPECTRUM SOFTWARE WANTED

The best accessory for your micro

ONLY
£34.49
(P+P £2.50)

The Rotronics Portable Case

Here is the ideal portable work station for home, school or work. Specially made for most home microcomputers, it contains your ZX81, Spectrum, Oric or VIC 20 within a smart executive style case with removable lid for convenience in use.

The individually tailored foam insert securely protects your micro, printer, cassette recorder, tapes and manuals during transit. A scalpel is provided to modify the insert for expansion units and an alternative insert can be supplied if you change your hardware in the future.

All components remain fully operational within the case via interconnections routed between the double layers of foam, so there are no unsightly leads.

This is the first case designed for easy use with each component positioned for convenient operation. The overall dimensions are 138mm x 657mm x 363mm.

TRACE

* For any ZX Spectrum *

THIS PROGRAM WILL HELP YOU TO:
Debug your BASIC programs quickly and easily.
Understand how other BASIC programs work.
Follow complex BASIC programs step by step.
Teach BASIC quickly and easily.

HOW?
Before the SPECTRUM executes each BASIC statement in your program it will display the line/statement number and the statement itself in the input area (it will not overwrite the main display area). You control the speed from single step to very fast. You can produce a trace listing on the ZX printer, stop your program at any point to print variables or other expressions, and start/stop tracing from anywhere in your program.

64 CHARACTERS PER LINE ON THE SCREEN AND TO PRINTERS!

TASWORD TWO The Word Processor

Your Spectrum becomes a **professional** word processor with TASWORD TWO. TASWORD TWO gives you an amazing **64 characters per line** on your screen. This is ideal for standard A4 paper and TASWORD TWO prints your text just as it appears on your screen.

Tasword Two drives the following interfaces:

Cobra RS232 I/O Port
Euroelectronics Interface (ZX Lprint)
Hilderbay Interface
Kempston Interface
Morex Interface

The same program drives these interfaces. A short easy to follow set of instructions takes you through setting up your Tasword Two to drive the interface you have or choose to buy. Tasword Two does drive the ZX printer.

£13·90 fully inclusive mail order price.

TASWORD TWO £2 Demonstration Cassette

See for yourself the powerful features of TASWORD TWO. Send just £2 for the Tasword Two demonstration cassette. A voucher is included which gives you £1 off the price of TASWORD TWO.

TASWORD The Word Processor

"This package is definitely value for money."
Educational Computing, April 1983

The first real word processor for the Spectrum and still great value for money. Thirty two characters per line make it ideal for use with the ZX printer.

£7·95 fully inclusive mail order price.

TASWORD £1 Demonstration Cassette

Send just £1 for the demonstration cassette and a voucher giving you 50p off the price of TASWORD.

ZX81 TASWORD

"Very good value and great fun to use."
"Unreservedly recommended." Popular Computing Weekly 19·8·82

No demonstration cassette available but send 50p (refundable against your subsequent purchase of ZX81 TASWORD) for a copy of the manual.

£6·50 fully inclusive mail order price.

TASWORD TUTOR

"an eloquent demonstration of Tasword's uses"

Every TASWORD program comes complete with a manual and a cassette. The cassette contains your TASWORD **and** TASWORD TUTOR. This teaches you word processing using TASWORD. Whether you have serious applications or simply want to learn about word processing TASWORD and TASWORD TUTOR make it easy and enjoyable.

Business Software

FOR SMALL BUSINESSES AND THE SELFEMPLOYED

Business Bank Account.
This program enables you to make debits under 11-15 subheadings. Statements include totals of all subheadings.

ZX 81 **£8.75** ZX SPECTRUM 48K **£10.75**

Sales Day Book.
For all your invoices, this program will enable you to prepare statements of outstanding invoices. Program will also calculate VAT.

ZX 81 **£8.75** ZX SPECTRUM 48K **£10.75**

Purchase Day Book.
Keeps a complete record of all your purchases under 11-15 subheadings. This program will also calculate and deduct VAT.

ZX 81 **£8.75** ZX SPECTRUM 48K **£10.75**

Business Packs.
Incl. Bank Account, Sales, Purchase & Quarterly Analysis programs.

ZX 81 **£25.00** ZX SPECTRUM 48K **£30.00**

Stock Control.
Handles 900 lines, includes details of supplier. Program has full search facilities enabling you to search & update all lines from one supplier. It is also possible to deduct items from stock.

ZX SPECTRUM 48K **£10.75**

Invoicing.
This program will print out invoices, calculate discounts and VAT. The program will calculate totals from unit prices, giving the description of each unit price.

ZX 81 **£15.00** ZX SPECTRUM 48K **£15.00**

Word processing By Tasman.
Tasword Two is a powerful word processing program that will perform all the functions available on a large word processor. The program will give you on screen 64 charactors per line.

ZX SPECTRUM 48K **£13.90**

Masterfile By Campbell Systems.
This is one of the best data systems available for the ZX Spectrum. This program has many uses in a small business.

ZX SPECTRUM 48K **£15.00**

Payroll By Byte One.
This payroll program will handle upto 40 employees and will also calculate N.I.C., PAYE., superannuation and many other deductions. This is a very useful program and extremly good value.

ZX SPECTRUM 48K **£19.95**

All the above programs include VAT, post and packing.
A VAT invoice will be sent with all purchases.

Printers

All the above programs with the exception of Masterfile and Payroll, will now run on a full size printer. We can now offer you a complete package including interface and printer.

Interface for ZX 81 including cable by Memotech..... **£44.78**
Interface for ZX SPECTRUM by Kempston..... **£39.14**

Poor presentation handicaps teaching aids

John Gilbert reviews the latest releases.

THE EDUCATIONAL sector of the book market is expanding but the standard is not becoming noticeably higher. Although the psychology of teaching by computer seems to be developing in the proper direction, the standard of presentation in many cases is not good enough. The explanation is that the books on the market are either too difficult or too easy for the beginner to understand.

The *Spectrum Starter Packs,* numbers one and two, are for the 48K Spectrum. They suffer from being too easy for the age range at which they seem to have been aimed. The packs do not take into account that most children looking at them are growing up in an age of electronics. They do no more than illustrate points in the Spectrum manual and show how the various commands work on the computer.

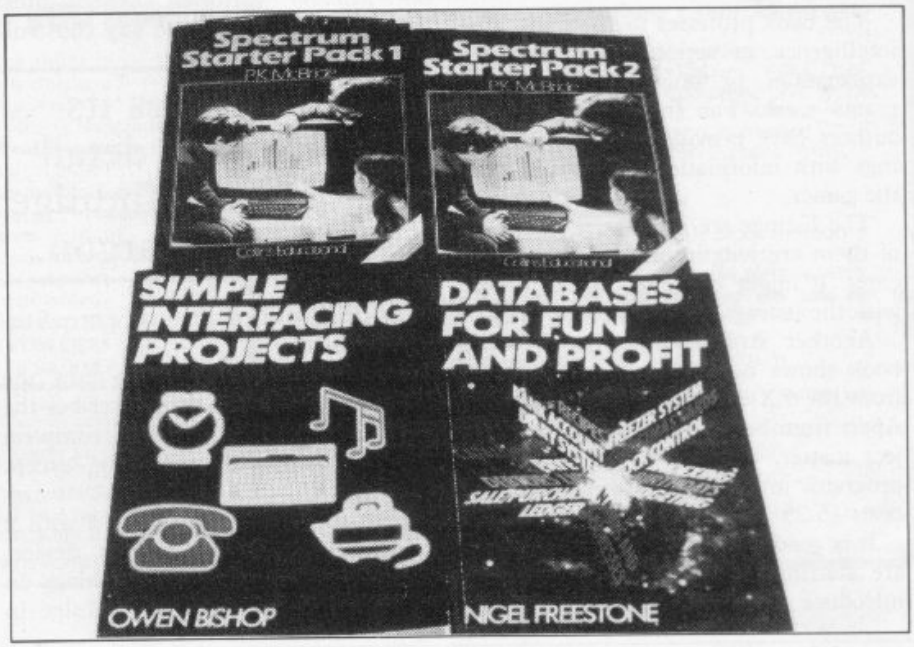
Both starter packs contain program cassettes which explain how the computer works and provide examples of the Spectrum Basic commands. Most of the information on the cassettes is dealt with in the books accompanying the packs, so the inclusion of such cassettes is superfluous.

The books could be used in primary schools, although they would be of more value as a talking-point for teachers than an aid which is given to children who are then left to learn programming virtually on their own.

The intentions behind the starter packs seem good but a little more work could have gone into them to improve the presentation. *Spectrum Starter Packs,* one and two, cost £9.95.

Books on so-called good programming techniques are now forming an important sector of the market. Although most authors fail to inform their readers that there is no best way of programming, the standard of the books is good.

Databases for Fun and Profit, by Nigel Freestone, is one of the good programming books. The author aims to give the reader an understanding of data structures which are used in programming. The book is not machine-specific and should be easily understood by most owners of the ZX-81 and Spectrum.



It starts by introducing the binary and hexidecimal number systems which are associated with computers, particularly with storage and machine code. It then explains how arrays can be used to create a variety of data structures, such as lists, trees and stacks.

When those structures have been explained the author shows how they are used in several types of programs. He shows what is needed to write diary and bank account programs and name and address systems. He also shows how to incorporate arithmetical formulae, such as income tax calculations, into a program to provide some way of processing the data once it is entered.

Databases for Fun and Profit contains much valuable information for anyone wanting to put Sinclair machines to good use. It is published by Granada Publishing and costs £5.95.

Turning from software projects we move to hardware with *Simple Interfacing Projects,* by Owen Bishop, also published by Granada.

Like the book on databases it is not machine-specific and that makes it different from all the rest. The projects include a real-time clock, a music generator and a ROM board. There are 12 projects which can be built and they are laid out in an easy-to-understand manner. A brief explanation is given of the project and how it works, then the construction details are discussed. As a result the book would be of interest to anyone who has a computer and a basic grounding in electronics. Some experience of programming would also be useful but not essential. *Simple Interfacing Projects* costs £6.95.

Another book which will be of interest to ZX-81 owners is *The Ins and Outs of the Timex TS-1000 and ZX-81,* by Don Thomasson. The book looks as if it was written for a readership in the States but it has some relevance in Britain. It explains the hardware of the ZX-81 and includes a complete circuit diagram of the machine.

The author explains how the CPU chip works and gives a detailed account of the pins which feed it with input and output data. A practical knowledge of electronics is necessary for you to follow the discussions in the book and a knowledge of machine code would also be helpful. It is published by Melbourne House and costs £5.95.

A new work from Interface is *The Turing Critereon — Machine Intelligent*

continued on page 96

continued from page 95

Programs for the 16K ZX-81. The introduction defines computer intelligence as communicating along a wire with something which you are not sure is human or machine.

The problem with the book is that you cannot tell whether it has been written by a human author or a machine, because it is full of listings and not much else.

The book professes to show machine intelligence in action, complete with explanations of how intelligent programs work. Far from doing so the authors have provided a group of listings with information on how to play the games.

The listings are impressive but some of them are lengthy and take hours to enter. It might be better to buy a tape with the listings recorded on it.

Another strange thing is that the book shows how to convert programs from the ZX-80 into ZX-81 programs. Apart from being irrelevant to the subject matter, the idea of typing ZX-80 programs into a ZX-81 seems futile. It costs £5.25.

It is good to see that most publishers are starting to reduce prices as they introduce new titles. All the titles in this month's review cost less than £7. Last year books about Sinclair computers cost anything from £5 to £15.

Many publishers are having to lower prices because of the competition from companies which have just entered the market. As a result the standard should continue to rise and prices should fall.

The first book to deal with the insides of the Spectrum, *Spectrum Hardware Manual* by Adrian Dickens, must be a welcome addition to any construc-

> 'It describes its workings in detail and does not indulge in technical jargon.'

tor or student of computers, writes **Stephen Adams.**

It provides an insight on how the computer works and then describes the Spectrum in detail, including complete circuit diagrams of everything, except the ULA.

The user has to be satisfied with a pin-by-pin description of that device. The author describes its workings in simple detail and does not indulge in technical jargon. The circuit principles are explained but not component by component, except where the author is sure of his ground, i.e., the power supply, CPU and RAM chips.

The video section is a little misleading as it refers to B-Y as BLUE-YELLOW, where in real life the Y stands for luminance — the whiteness of the picture. It gives the adjustments necessary to deal with some problems associated with the video.

One-third of the book is circuit diagrams and descriptions of circuits the user can add to the back of the Spectrum. The author seems a little nervous about suggesting that the user make improvements inside the Spectrum. A port made from a PIO, add-on joysticks, plus an exterior keyboard are also described. One suggestion for model one users only is to allow for 127 extra ports by improving on the decoding for the I/0 map.

The differences between the models one and two are pointed-out frequently, with photographs to show the components on the circuit board. A "dead cockroach" IC and the transistor across the model two Z-80A CPU are described, along with why they were necessary.

Sherston Software

Sherston Software offer a range of educational programs designed by primary school teachers and written by professional programmers. It is our policy to produce high quality programs at reasonable prices.

Reading Programs

Short Vowel Sounds: *BBC Model B and Spectrum 48K*

A very comprehensive program to practice short vowel sounds using simple words and pictures. Options include diagnostic, practice and final assessment modes. The speed, number of retries and weighting on particular vowels can all be altered. Nicely presented with graphics and sound effects. **£7.00.**

Word Builder: *BBC Model B*

Word Builder builds up words exactly as children should and shows the sequence on the screen for the children to sound out and read at their own speed. Includes sections on initial consonants and short vowel sounds, consonant blends and digraphs, double consonants and vowel-consonant digraphs. Presented in large, colourful, lower case letters. **£4.00.**

Maths

Maths Snap: *BBC Model B*

A 'game' for 1, 2, 3 or 4 players to practice number bonds. Options include addition, subtraction (or both), multiplication and division (or both) all at five levels of difficulty. The time allowed and number of questions per game can both be altered making it suitable for all ability levels. Children love it! **£6.00.**

All programs have been thoroughly tested in the classroom and are accompanied by full explanatory notes. We trust our customers not to break the copyright laws. If you are not satisfied with our product, return it within seven days and get your money back.

Orders to Sherston Software, 1 Noble Street, Sherston, Malmesbury, Wilts SN16 0NC. Cheques or P/O's payable to Sherston Software. Allow 28 days for delivery.

All software not currently available on the Spectrum soon will be!

WIN THE POOLS??

SPECTADRAW 2

THE NEW POOLS PREDICTION PROGRAM FOR THE 48K ZX SPECTRUM

Spectadraw 2 examines the recent form of teams playing in each week's English and Scottish Football League matches and then refers to a large database to see what has happened in the past when teams with similar form met. By combining the lessons learnt from the past with the teams current league position, it can then identify the matches which are likely to yield draws and output suitable predictions. The program will also predict the matches which are least likely to result in draws so that suitable fixed odds predictions can be made on home and away results.

The program is supplied complete with a database tape containing data on over 7500 matches, together with a comprehensive instruction manual. The database tape contains all results up to the date of dispatch.

Program, database and instruction manual
only £12.95 inclusive.

Mr B. S. McAlley

HIGH RESOLUTION PROGRAMS FOR 16K ZX81

We utilise a SOFTWARE ONLY technique developed by Steve Briers BSc to produce a stable 248 by 224 pixel display. ABSOLUTELY NO HARDWARE MODIFICATIONS ARE REQUIRED FOR THE FOLLOWING PROGRAMS:

INVADERS —Game options—one or two players—taking turns or playing simultaneously. Adjustable bomb dropping and missile firing rates. Difficulty increases as game progresses. Advanced keyboard scanning routines to aid game playing.

SWARM —Fast moving arcade type game. Shoot down saucers as they dart across the screen firing their missiles. Progressive difficulty.

ZORF —An advanced arcade game incorporating five different sheets—invaders, galaxian, zorfians, meteorite shower and mother ship. Progressive difficulty.

GRAPHICS The program you've been waiting for! Enables you to use high resolution graphics in your own programs. Commands are CLS, PRINT, PLOT, POKE, DRAW, SPRITE and SCREENOFF. The SPRITE command allows you to define a shape and move it about the screen at will. Comprehensive editing facilities are provided and the graphics commands are easily incorporated into BASIC programs. Easy to follow instructions are included.

Send this coupon to ODYSSEY COMPUTING, 28 BINGHAM ROAD, SHERWOOD, NOTTINGHAM NG5 2EP. Tick the programs you require.

☐ Invaders	£4.95	☐ Swarm	£3.95
☐ Zorf	£5.95	☐ Graphics	£5.95

MEMOTECH

The Complete Range

NEW PRICES UP TO 37.5% OFF PLUS FREE P + P!

Fifteen months ago Memotech developed the first 64K Memopak, designed to maximise the capabilities of the Sinclair ZX81. Since then, using the ZX81 as a starting point, we've gone on to produce a comprehensive range of Memopaks, adding 16K and 32K memory expansions, utilities packages comprising a Word Processor, Z80 Assembler and Spreadsheet Analysis, plus Communication Interfaces, High Resolution Graphics and a professional quality Keyboard.

To complete our range of ZX81 add-ons, we are now introducing the MEMOPAK RS232 Serial Interface.

RS232 Interface

The RS232 is an all-purpose interface which allows the ZX81 not only to output to suitable serial printers, but can link up with numerous types of peripheral or even other processors. The Interface has two main modes of operation: BASIC mode allows you to use the range of functions supplied in the RS232 EPROM within an ordinary BASIC program, and TERMINAL mode allows you to use your ZX81 as a terminal to another processor. The EPROM functions offered permit the user to send, receive and convert bytes between ZX81 code and ASCII, as well as check the status of numerous control flags. Received or transmitted data can appear simultaneously on the screen, and received data may be printed simultaneously.

£39.95 inc. VAT

Memopak Centronics I/F

The BASIC commands LPRINT, LLIST and COPY are used to print on any CENTRONICS type printer. All ASCII characters are generated and translation takes place automatically within the pack. Reverse capitals give lower case. Additional facilities allow high resolution printing.

£24.95 inc. VAT

Memopak HRG

This pack breaks down the constraints imposed by operating at the ZX81 character level and allows high definition displays to be generated. All 248 × 192 individual pixels can be controlled using simple commands, and the built in software enables the user to work interactively at the dot, line, character, block and page levels.

£29.95 inc. VAT

Memocalc

The screen display behaves as a 'window' on a large sheet of paper on which a table of numbers is laid out. The maximum size of the table is determined by the memory capacity, and with a Memopak 64K a table of up to 7000 numbers with up to 250 rows or 99 columns can be specified.

£29.90 inc. VAT

Memotext

Text is first arranged in 32 character lines for the screen with comprehensive editing facilities. On output the user simply chooses the line length required for printing and the system does the rest. Used with the Memopak Centronics Interface, the Word Processor makes available printout with 80 character lines, upper and lower case and single and double size characters.

£29.90 inc. VAT

Memopak Memory Extensions

For those just setting out on the road to real computing, these packs transform the ZX81 from a toy to a powerful computer. Data storage, extended programming and complex displays all become feasible. Further details available on request.

16K Memopak £24.95 32K Memopak £34.95
64K Memopak £49.95 Prices inclusive of VAT

MEMOPAKS ARE AVAILABLE AT MAIN BRANCHES OF WH SMITH and JOHN MENZIES

Z80 Assembler

The Assembler allows you first to code and edit a source program in the Z80 language, and then assemble it into machine code. You can now write flexible and economic programs. The Editor mode allows you to code directly in the right format, manipulate individual lines and control the exact placing of source and machine code. Routines may be merged or listed (even to a commercial printer using our Centronics Interface). The assembler mode handles all standard Z80 mnemonics, numbers in hex or decimal, comments and user-selected labels.

£29.90 inc. VAT

Memotech Keyboard

The Memotech plug-in Keyboard plus buffer pack takes the effort out of data entry for ZX81 users. The Keyboard has a light professional touch and is housed in an elegant aluminium case. The simple plug-in system means that you are not obliged to open up your ZX81, use a soldering iron or invalidate your ZX81 warranty.

Keyboard Buffer Pak

The Buffer Pak performs a "housekeeping" function for the Keyboard, interfacing directly with the port of your ZX81.

£34.95 inc. VAT

All Prices are inclusive of VAT, postage and packing.

To Order: Send your Name, Address, Memopaks required, plus a Cheque/Postal Order/Access/Barclaycard number (please state which) to: Memotech Limited, Station Lane Industrial Estate, Witney, Oxon. OX8 6BX. Telephone Witney 2977

We want you to be completely satisfied with your Memopak – all our products carry a 14 day money back guarantee.

£7·95 Paperback 110 pages NEW

These programs cover a wealth of basic concepts every child will meet in primary education. They are produced by professional educators and have been thoroughly tested in a primary school. Designed to go beyond drill & practice they promote learning through interaction and discovery. Programs range from counting and simple arithmetic to ones dealing with volume, balance and direction, mostly in form of games. Each program is short but powerful and comes with full documentation.

HIRE ZX81/SPECTRUM PROGRAM TAPES

Make the most of your computer by hiring from the original and still the only software library offering all these features:

- Over 900 tapes stocked, offering more than 120 different programs from 39 suppliers (all with their permission)—many of the best currently advertised, plus some specially commissioned—and the range increases each week!
- Arcade, adventure and simulation games, many business and home utilities, graphics, education...and so much more besides
- Descriptive catalogue helps you make your choice
- **Free** quarterly, illustrated magazine includes tips from a professional programmer, DIY plans, reviews, letters, discount offers—and our **Top 40 Tapes** chart averaged from thousands of members' scores
- Full-time staff offer you a friendly, efficient welcome & service
- A fortnight's hire for just £1 +40p p/p—hire what/when you like
- All tapes guaranteed loadable
- Help given with loading problems (azimuth test tape available) and with marketing members' programs
- You may switch from ZX81 to Spectrum at any time
- Send SAE for details—or join on money-back no-risk approval today

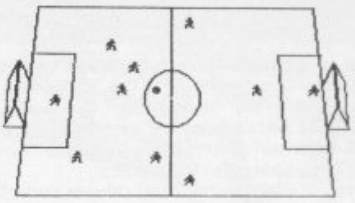
16K AND 48K
NEW SPORTS GAMES

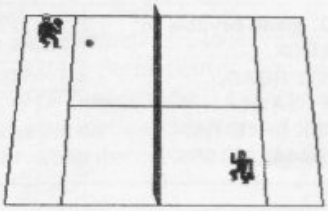


New action sports games feature a 3D view of the game. In football and tennis you play one side, the computer plays the other. The computer is fast and hard to beat. Different skill levels.

FOOTBALL
Each player can move, shoot etc. independently. Includes fouls if players collide, corners, throw ins etc. Scale 90 minutes play. Any team of names can be used. Game can be suspended and player numbers shown at the press of a key. **Price £5.50**

BIG MATCH SOCCER
Just like football game but for 2 players. Each player uses keys at his side of the keyboard to control his men. All men can be moved, shoot etc. independently. Practice with football then play your friends in the big match. **Price £5.50**

SUPER SOCCER
A deluxe version of the football. Even faster action, harder to beat. Choose team colours etc. **Price £7.00**

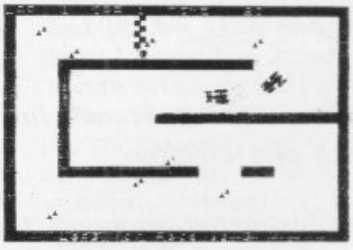


TENNIS
Each key plays a different stroke. Move your players anywhere on court. Computer plays a hard game. All tennis rules used, just like the real thing. Proper serving and scoring. Plays 3 sets. Animated figures. **Price £5.50**

TANK BATTLE
3D view from the tanks turret of woods, villages, attacking tanks etc. Shots can destroy buildings, trees and enemy tanks. 360 degree turret movement. **Price £4.50**

PINBALL
Flippers flashing lights etc. Like an arcade machine. **Price £3.95**

DESTROYER
Planes attack your ship with bombs, and submarines with torpedoes. Defend with guns and depth charges. **Price £3.95**



CAR RACE
You drive one car the computer the other. Control your car with steering and brakes. Choice of 2 circuits. Lapcounters and time recorded. **Price £3.95**

SPACE FIGHTER
Pilots eye view of space. Attack aliens, dock with refueling ship in flight. **Price £4.50**

SUPER SPACE INVADERS AND MAZE MUNCHER
Now both on one cassette, great value at only **£4.50**

SUPER OFFER Spend £15 and get any extra game free

Please add 35p post and packing per order

ZX81 MACHINE CODE?

ZX.ASZMIC ROM gives:

- **full screen editor**
- **multiple files**
- **powerful assembler**
- **complete debug**
- **hi~res graphics**

ZX.Aszmic Rom replaces the Basic Rom in ZX81 to transform the machine into a complete Assembly Language Development station. Fast. Powerful. Professional. Reliable.

NEW! ASZMIC PLUG-IN EXTERNAL BOARD

accepts the Aszmic Rom to combine the best of machine code and basic. 24 I/O lines, Eprom programmer, 8k user socket.
Aszmic alone, £39.95 including comprehensive manual.
Aszmic + Board + Manual, only £54.90
Enquiries please enclose S.A.E.

COMPROCSYS LTD.,
P.O. Box 149, South Croydon,
Surrey, CR2 7YX

GLOSSARY

Basic — Beginners' All-purpose Symbolic Instruction Code. A programming language resembling English which is used by beginners because most popular microcomputers have it as standard.

Bug — an error in a program.

EPROM — Erasable Programmable Read-Only Memory. Semi-permanent storage. Information is not erased if the power is turned off in the computer. Programs can be erased by subjecting the memory chips to ultra-violet light. The memory can then be re-programmed using an electrical device called an EPROM blower.

Interface — RS232 and Centronics. A device which enables other computers or add-ons, such as printers, to be connected to the computer. It converts non-standard signals from add-ons to the standard signals of the computer in use.

Kilobyte — (K). A measurement of memory size. Most machines use 16K as a minimum but 48K is generally agreed to be necessary for serious work.

Machine code — an electronic pulse code used by the computer to perform functions and communicate with memory and other devices.

Mnemonics — abbreviated instructions — for example LD for Load — used in machine language programming.

Motherboard — an external printed circuit board which is used like a multi-way plug planner. It enables other printed circuit boards, such as graphics boards and colour boards, to be slotted-in.

Port — a link to the outside world which can be used by programs and the computer.

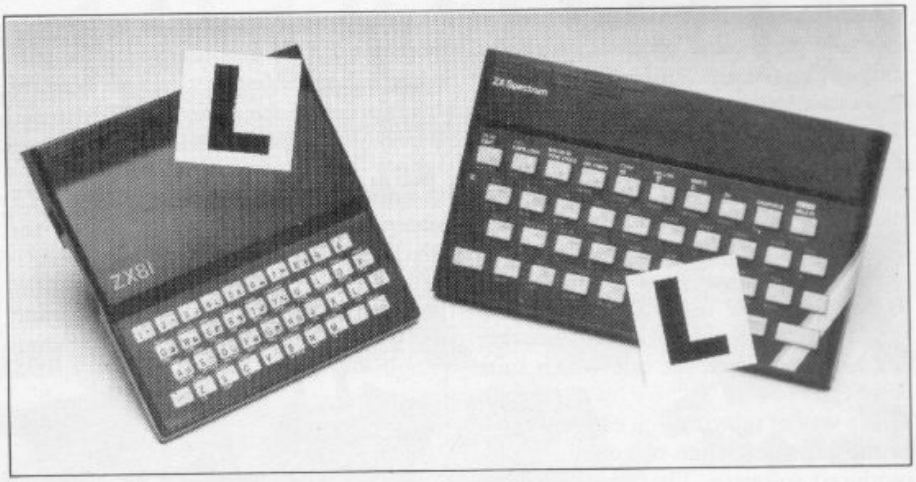
PCB — printed circuit board. A board which has on it the electronic circuits of the computer.

RAM — Random Access Memory. Information and programs can be stored in this type of memory as electronic pulses which conform to a set of numbers — machine language — in which programs are represented in the computer. When the power is turned off the information will be lost.

ROM — Read Only Memory. Information stored in this type of memory is not lost when the power is switched off.

Software — programs which control the operation of the computer.

Syntax error — a bug caused by incorrect use of a programming language.



Our easy-to-follow guide for new owners

The basic route to a habit-forming hobby

BUYING a Sinclair machine can be the start of a life-time's obsession with home computing. It is easy, however, to become discouraged if everything does not go according to plan from the beginning.

For those with only a little knowledge of computers and their capabilities, the best way to approach the machines is to abandon any ideas for special uses. While the 48K Spectrum is big enough for simple uses in small businesses, the range of Sinclair computers does not contain machines for major uses. It is better to become accustomed to the many facilities and then decide how you wish to use them.

Begin by unpacking your machine, overcoming your surprise at its size and weight and, following the manual, set up the system. If you cannot get the K on the screen, check that everything is plugged into its correct socket and re-set the machine by pulling-out the power plug for one second and try tuning-in again. If still nothing appears, check the power supply unit by shaking it. If it rattles, return it. If it is satisfactory, check your system with that of a friend.

If you have a Spectrum you will have received an introductory booklet which explains what the computer can do and giving detailed instructions on how to set it up. Also included is a fault-finding guide.

Once the K appears you are ready to begin learning about your machine. It can prevent family arguments if you can afford a separate television set for your system. It also makes life easier if you find somewhere to leave your equipment set up permanently. You will find that a few power sockets are needed and a four-way block connector on a short length of extension cable will help to tidy trailing leads.

When using a Spectrum, a television set has to be more finely-tuned than when using a ZX-81 because of the added dimension of colour. If the set is not tuned properly, the colours will look hazy instead of sharp and clear. If no colour can be seen when it is switched on, the power supply or the television set may be at fault.

Some users have experienced some difficulty with some television sets, which include Hitachi, Grundig and Toshiba. Sets which many people have found compatible include the Sony Trinitron, Fidelity and Ferguson.

The manuals are written in great detail and are reasonably easy to follow. Some of the chapters may not seem immediately relevant but it is worthwhile reading them as you might miss something important.

Patience is needed at that stage to learn the ways in which the computer will accept information. It is tempting to try to enter programs before you are ready but that is likely to lead to errors. For example, words like AND, THEN and AT should not be typed-in letter by letter.

By the time you have reached chapter 11 in the ZX-81 manual and chapter 19 in the Spectrum manual you should have accumulated sufficient knowledge to be

continued on page 102

Starting from Scratch

continued from page 101

able to type-in other people's programs, such as those in *Sinclair User* and *Sinclair Programs*, without too much difficulty.

It is that important when using the ZX-81 that it is not jolted. Some of the connections can easily work loose and everything which has been entered will be lost.

The manuals are not to everyone's liking and if you find them difficult to follow a number of books on the market can help you. Find the one which suits you best.

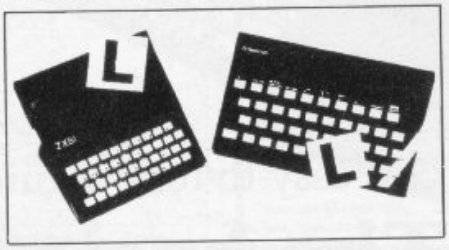
As a way of relaxing you can buy some of the growing range of commercially-produced software. That can be loaded directly from cassette but make sure that your machine is big enough to take the tapes you buy.

For the ZX-81 there are a few tapes for the unexpanded 1K machine but the majority require the 16K RAM pack. Similarly on the Spectrum most companies are taking advantage of the possibilities provided by the larger 48K machine rather than providing cassettes for the 16K.

The tapes can vary in quality and it is advisable to read the reviews in *Sinclair User* and use your judgment to find the best.

An alternative method to learn about both the ZX-81 and the Spectrum is to plunge in at the deep end and see what the machines will do. Refer to the manuals when you have difficulties. You can ignore the functions and calculations initially and experiment with PRINT statements to obtain the feel of the machines.

You may already have heard about the problem involved in SAVEing and



LOADing your own cassettes. The manual gives detailed instructions but many of the early ZX-81s would not accept tapes from some recorders. That problem is said to have been overcome but there can still be difficulties.

Usually they occur when LOADing tapes recorded by other people. One simple method to overcome this is to wind the tape to the middle of the program and type LOAD "" followed by NEWLINE; then increase the volume of the recorder slowly with the tape running until the television screen shows four or five thick black bands. If you then rewind the tape, the program should LOAD normally.

LOADing and SAVEing on the Spectrum is much easier and faster than the ZX-81. One difference is that when SAVEing on the Spectrum the LOAD lead must be disconnected either at the recorder or the Spectrum.

Finally, a health warning. Apart from any practical uses, computing with your Sinclair machine can be a very entertaining hobby and is almost certainly habit-forming. You may easily find yourself crouched over your machine, red-eyed, in the early hours of the morning thinking that in another five minutes you will solve the problem. Try to break that habit by getting into the fresh air and meeting other Sinclair users.

By obtaining a Sinclair computer you find that you have joined a not very exclusive club with many thousands of members, many of whom would be only too happy to advise you if you have difficulties.

Make sure of your regular copies of *Sinclair User* and *Sinclair Programs* and you can be guaranteed many happy hours.

NEW SPECTRUM MEMBERS

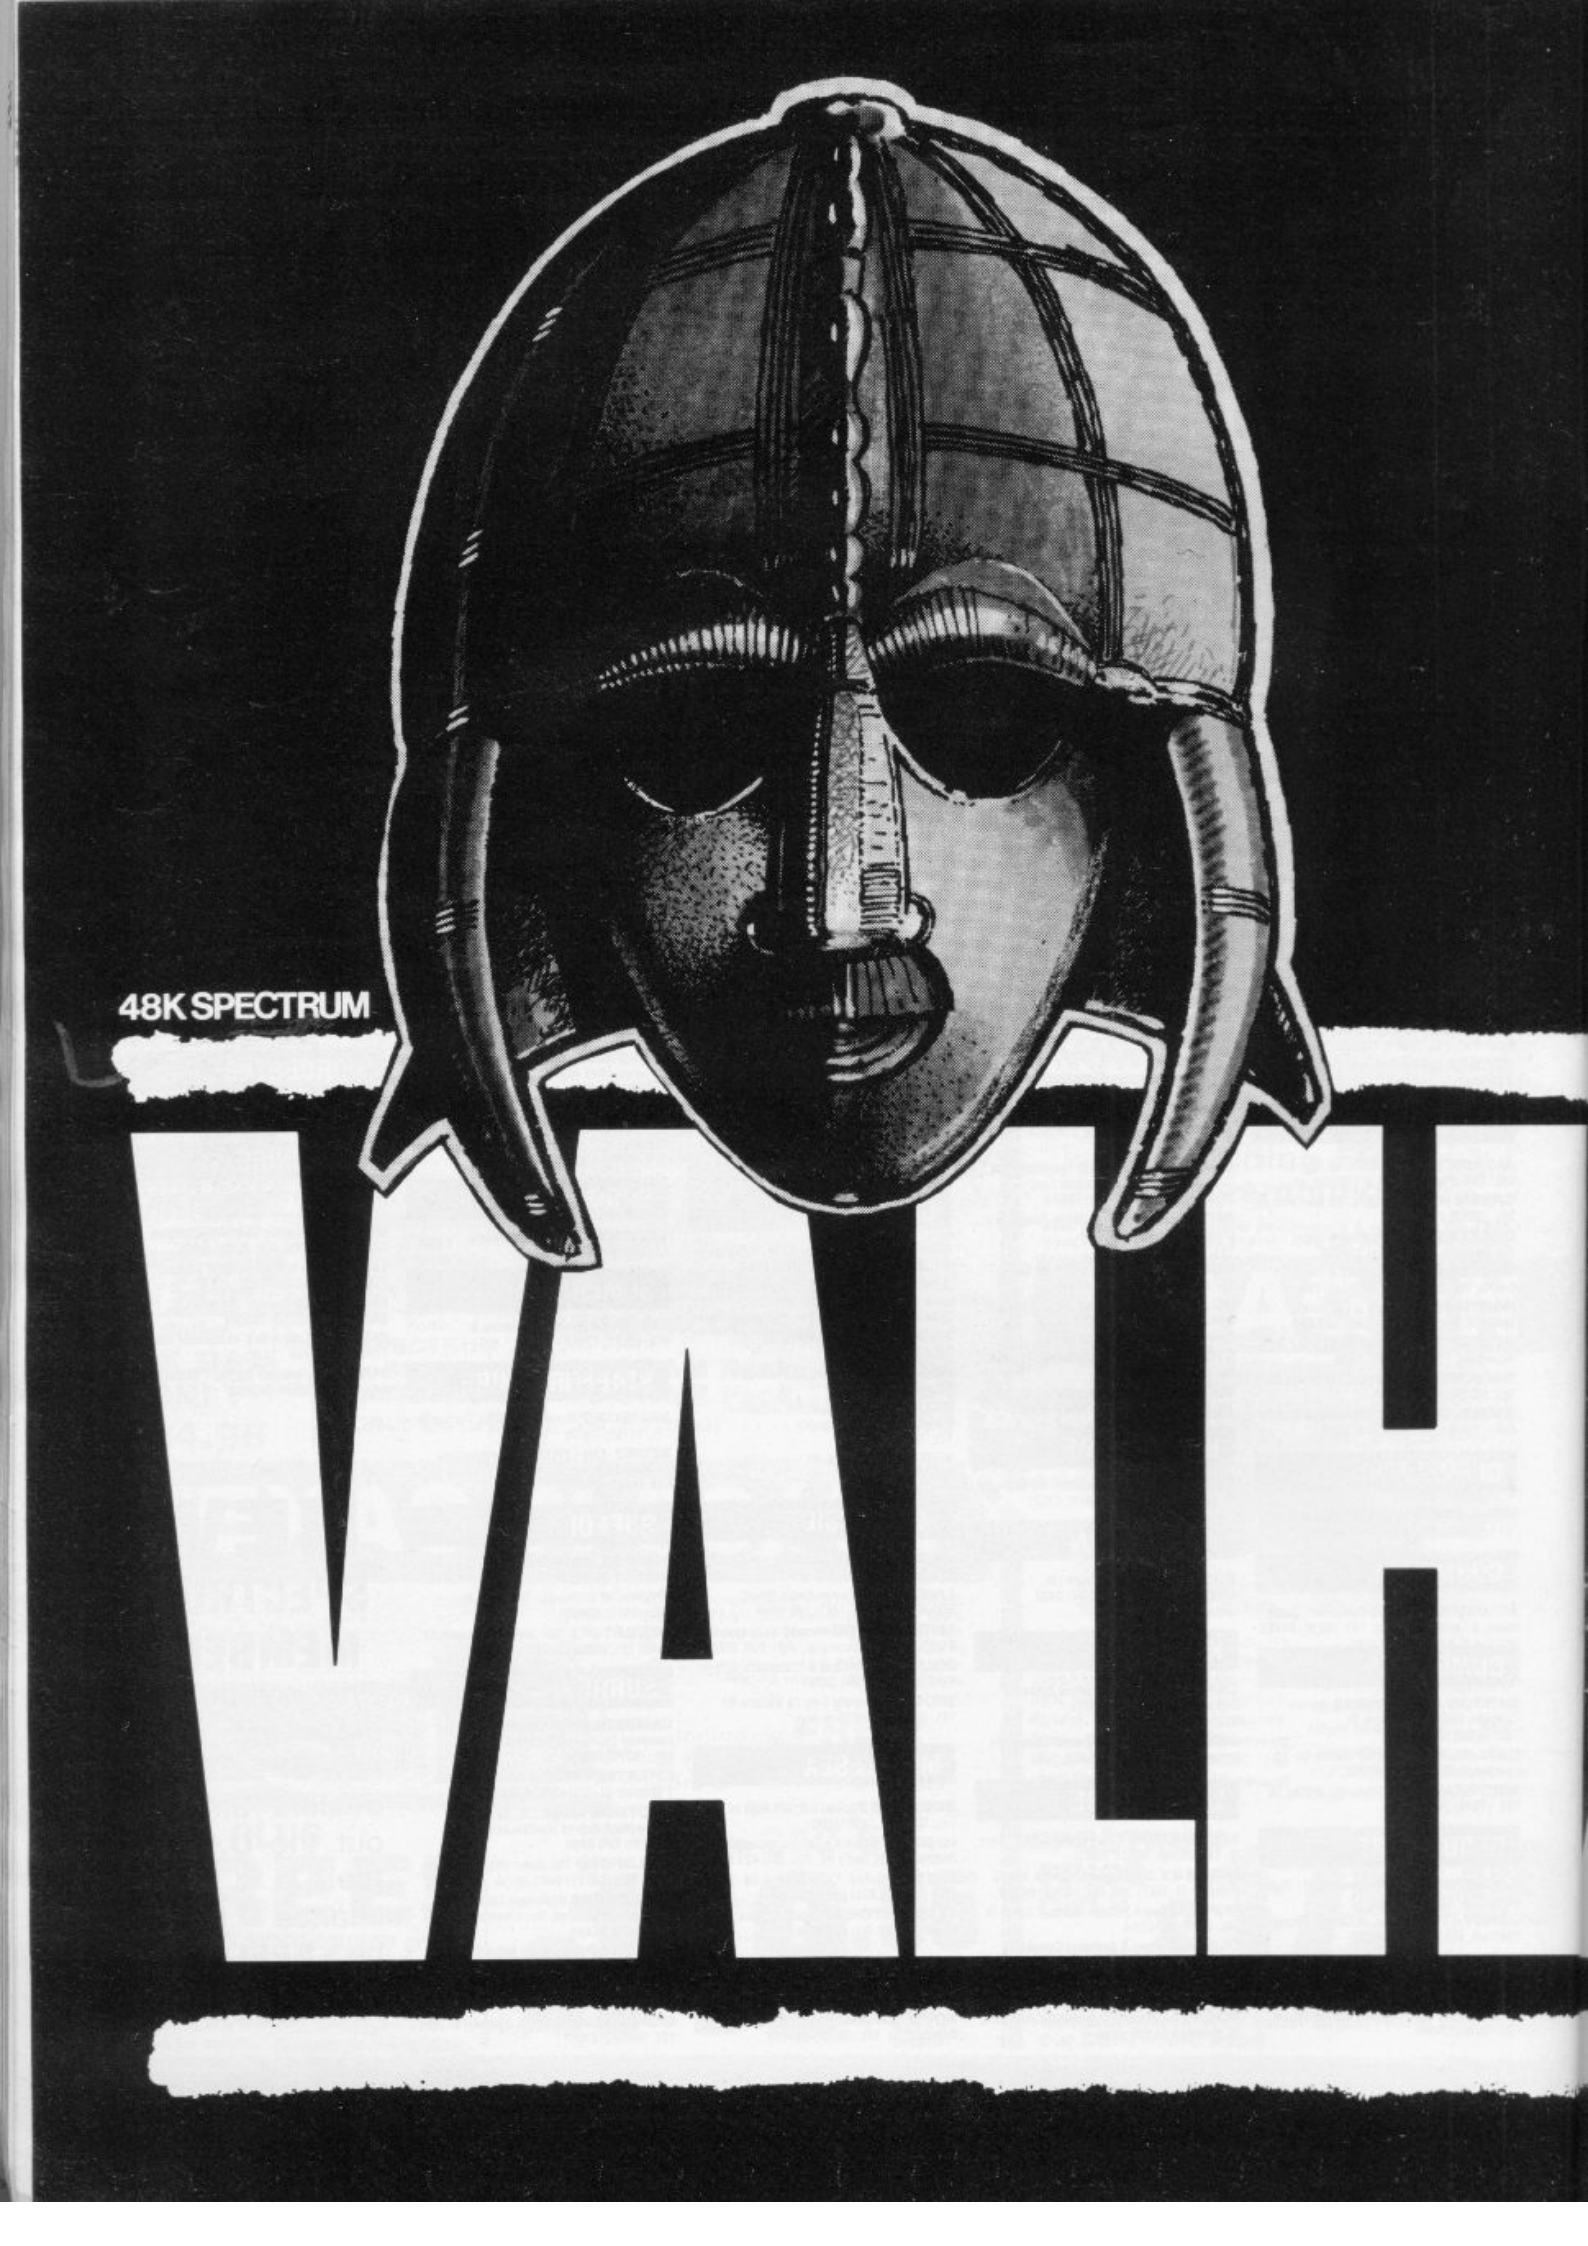
Check **your area** there are many new **SPECTRUM** dealers throughout the **U.K.** So there's a good chance there'll be a **SPECTRUM** centre near you!

Not all stores carry every advertised item, please phone before making a journey – Prices correct at time of going to press E. & O.E.



48K SPECTRUM
VALH

"VALHALLA is an animated graphics adventure whose undisguised intention is to steal the title of "best micro adventure game bar none" from THE HOBBIT.

The 48K program uses a new operating system MOViSOFT and boasts a number of HOBBIT-like features. There are 20 significant characters, each with their own aims and objectives.

You are a minor God set the task of recovering Odin's Golden Helmet. To complete this you will also have to master three lesser tasks, one of which is to rescue IDUN, a maiden responsible for the Golden Apples which keep the Gods youthful.

The games' designer, LEGEND, claims that the program involves a sophisticated degree of interaction. For example, should an enemy overhear you telling a friend some important information, he will try to ruin your plans.

LEGEND stresses that the personality of each of the characters is genuinely independent "as opposed to pseudo independent behaviour like Thorin sitting down and singing about gold or Gandalf walking off with your door for no reason".

The moving graphics are reportedly of cartoon quality, with both background and foreground movement illustrating the events of the plot.

Pretty impressive claims.

HOBBIT fans will no doubt feel both intrigued and sceptical..

Watch this space."

VALHALLA

What is the difference between a bit and a byte?

Andrew Hewson considers the basics of machine code

HAVING RECEIVED a number of letters asking about the fundamental ideas of machine code programming, I have devoted most of the column to the topic. John Stevens of Hammersmith, London writes:

I am trying to learn how to write machine code programs but I am finding it difficult to understand the meaning of some of the words which are used. Can you explain as fully as possible what is the difference between a bit and a byte, and between a register and a variable?

A bit is the fundamental building block of computer memory and can exist in only one of two states. The two states can be thought of as representing ON or OFF; TRUE or FALSE; YES or NO; UP or DOWN; MALE or FEMALE or any other pair of logically opposite conditions. The mechanism by which a computer memory works is not really important to us but in the Sinclair computers the state of a bit is memorised by setting a microscopic solid state switch either ON or OFF as appropriate.

The usual notation is to think of one state as the ZERO state and the other as the ONE state. A bit is considered to be set when it is in the state representing ONE and to be re-set otherwise. That notation allows us to speak of a given pattern of bits in terms of its binary equivalent and by converting the binary number to a decimal; each bit pattern can be given an exceptional positive integer decimal number.

For example, consider eight bits of which the right-most four are set and the left-most four are re-set as illustrated in table one. The binary pattern of the eight bits can be converted to a decimal if it is remembered that, in a binary number, the right-most column is the units column; the next column to the left is the twos column; the next to the left again is the fours column and so on, doubling at each move to the left. The decimal equivalent of 00001111 is therefore:

0*128+0*64+0*32+0*16+
1*8+1*4+1*2+1*1=15

● *Please address problems and queries to Andrew Hewson, Helpline, Graham Close, Blewbury, Oxfordshire.*

Obviously it is inconvenient to refer to bits as the right-most or the third from the right and so the convention is adopted of numbering the bits from the right, starting at zero as shown in table one. When that convention is used the number of each bit is also the power to which 2 must be raised to give the value of the column. That is:

$2^{\text{bit number}} = \text{column value}$

Bit 3, for example, is in the eights column because $2^3=8$.

I chose to consider a group of eight bits together because the Z-80A microprocessor at the heart of the Sinclair computers is designed to operate on eight bits at a time. The term operates covers all the types of task which the Z-80A can perform directly such as addition, subtraction, rotation, logical AND, and the like. Thus although a bit is the fundamental unit of computer memory, bits are usually manipulated together in groups of eight, so a group of eight bits is called a byte — pronounced bite.

There are 256 ways of arranging the contents of a group of eight bits. The first is 00000000, the second is 00000001, the third is 00000010. Thus each of the bytes in RAM can be used to hold a single positive whole number lying between 0 and 255 inclusive by setting or re-setting the eight bits in the byte according to the binary equivalent of the number.

The Z-80A does not alter the contents of memory directly when it is executing a program; rather it copies the contents of a location in memory into one of several special locations in the microprocessor called a register and then operates on the contents of the register. The Z-80A is a powerful microprocessor because it has many registers and so it can hold several numbers at once, thereby reducing the need to make time-consuming transfers between the processor and memory.

Most of the registers have one or more special features. The most important one is the 'a' register or accumulator, so-called because the results of most

Switch setting	Off	Off	Off	Off	On	On	On	On
State	Re-set	Re-set	Re-set	Re-set	Set	Set	Set	Set
Binary pattern	0	0	0	0	1	1	1	1
Bit number	7	6	5	4	3	2	1	0

Table 1. Three ways of representing a group of eight bits of which the four left-most are re-set and the four right-most are set. The bit number is shown on the bottom line.

```
10   FOR I=23296 TO 23325
20   INPUT Z$
30   IF Z$="S" THEN STOP
40   PRINT Z$;"   ";
50   LET Z$(1)=CHR$ (CODE Z$(1)—7*(CODE Z$(1)  57))
60   LET Z$(2)=CHR$ (CODE Z$(2)—7*(CODE Z$(2)  57))
70   POKE I,16*CODE Z$(1)+CODE Z$(2)—816
80   NEXT I
```

Table 3. A Spectrum program to load 30 two-character hexadecimal codes into the printer buffer.

arithmetic or logical instructions are accumulated in the 'a' register. Some instructions use a second register as a second source of data together with the 'a' register.

For example the instruction:

add a,b

means add the contents of the 'a' register to the contents of the 'b' register and leave the result in 'a'.

Thus a register is a dedicated location in the microprocessor which has specific attributes and functions. A variable is a location or group of locations in RAM which are used by a particular program. If the program is written in Basic or another high-level language, the variable is given a name and all references to the variable are made using the name.

The next question, from Alan Bermingham of London, follows from the previous one. He asks:

What do the following programs do—an assembler, a disassembler, an interpreter, a compiler?

A machine code routine consists of a sequence of instructions which the Z-80A understands directly with no need for prior interpretation. The simpler instructions are held in one byte of memory but the more complicated instructions can occupy as many as four bytes.

Generally, the instructions are executed in the order in which they are encountered, although there are exceptions. The Z-80A keeps a note of from where the next instruction is to come by means of a special register pair called the program counter. Thus if the location pointed to by the program counter contains the number 128 in decimal — 80 in hexadecimal — the Z-80A will add the contents of the 'a' register to the contents of the 'b' register and leave the result in the acumulator, because 128 is the decimal machine code instruction for

add a,b

The decimal or hexadecimal codes for all the 600 or so instructions in the Z-80A instruction set are difficult to remember and so for that and other reasons machine code programs are almost always written using an assembler program. An assembler converts instructions like add a,b to the correct code. It also allows the programmer to name variables, add comments and give labels to various points in the program and to call subroutines using the labels. A good assembler will have other facilities as well, all aimed at making the programmer's job as straightforward as possible.

A disassembler performs the opposite function to an assembler; it converts a sequence of numbers into a sequence of mnemonics which are easier to understand than the original code. A list of the more important mnemonics is given in the Sinclair manuals in Appendix A. A disassembler is of use when analysing code written by somebody else to discover how it works.

The output from an assembler is a program which the microprocessor can understand directly because it consists of machine code instructions. In contrast, a program written using an interpreter, such as Sinclair Basic, is held in RAM in more or less the form in which it was entered by the programmer.

Interpreters are high-level languages which bear little or no relationship to the instruction set of the processor on which they are run. Every time the program is executed, however, each line must be analysed by the processor before the required action can be taken. The principal disadvantage of the system is that the programs can be slow to execute, because the processor spends most of its time determining what each program line means.

'A disassembler is of use when analysing code'

A compiler circumvents the problem by analysing each program line once only and then storing a sequence of machine code instructions which are equivalent to the original program. Thus the speed of a machine code program is obtained without losing the convenience of a high-level language. The machine code produced by a compiler can be somewhat tortuous and inflexible and so when efficiency is essential an assembler is used instead.

Robert King of London asks: **I have a program which works well on my friend's Spectrum but always crashes on mine. I suspect a fault in the RAM. Have you a program which checks each RAM location in turn?**

Checking RAM involves setting every bit of every byte, checking that it remains set, and then re-setting every bit and checking that it then remains reset. Setting every bit in a byte is equivalent to POKEing 255 into that byte. Similarly, re-setting every bit is equivalent to POKEing-in 0.

Obviously it is not possible to POKE numbers into every memory location while the machine is running, because the computer will crash, but a partial check can be made by testing every location in the spare area of memory.

The program in table two runs such a check. It can be loaded using an assembler or using the simple hexadecimal loader listed in table three. The program checks every location up to the bottom of the stack and returns the address at which it stops — about 32575 in the 16K machines and 65343 in the 48K machine when they are working correctly.

Finally, I must apologise for an error in the Kaleidoscope program which appeared in the June issue. Line 100 should read:

100 POKE S+32-31*I+32*J,K

My thanks to all those who pointed-out the error.

Hex code	Assembler code	Comment
2A 65 5C	LD HL, (23653)	Set HL to address of spare space
44	LD B,H	Copy HL
4D	LD C,L	to BC
3E OO	LD A,O	Set A to O
77	LD (HL),A	Copy A to memory
7E	LD A, (HL)	Copy memory back to A
FE OO	CP O	Compare result
CO	RET NZ	Return if error
3E FF	LD A,255	Set A to 255
77	LD (HL),A	Copy A to memory
7E	LD A,(HL)	Copy memory back to A
FE FF	CP 255	Compare result
CO	RET NZ	Return if error
A7	AND A	Clear carry flag
23	INC HL	Increment HL
ED 72	SBC HL,SP	Subtract stack pointer from HL
C8	RET Z	Return if finished
A7	AND A	Clear carry flag
ED 7A	ADC HL,SP	Add stack pointer to HL
O3	INC BC	Increment BC
18 E7	JR -25	Repeat for next memory location

Table 2. A Spectrum machine code program to test each memory location between the beginning of the spare space—marked by the STKEND system variable—and the bottom of the stack.

The Challenge of the Decade! With NEW Games like CONFLICT and GALAXY CONFLICT

We're adding the latest and best to our catalogue every month from selected sources throughout the UK and North America – so there's a new challenge for you **every time** at prices you won't beat!

Remember – we specialise in programs for your Sinclair – whether you choose games, business, educational or household software. Many of our games cannot be bought by mail order from any other source. And many of our prices are the lowest you'll find **anywhere**. You'll want to make **sure** victory is yours with these new programs where **two can play:**

CONFLICT – Total war for two players, involving both the machinery [armies, missiles, warships] and finance [stock market, oil, piracy] of conflict.

To order quote the following references: – ZX81-16k: C-1; Spectrum-48k: C-2.

GALAXY CONFLICT – Raise the fleet of battle Eoncruisers then move from bridge to bridge taking full control and responsibility in this battle for the heavens – to prove yourself a born galactic ruler!

To order quote the following references: ZX81-16k: GC-1; Spectrum-48k; GC-2.

Each comes complete with game board, program, counters, markers, maps [CONFLICT only] plus full instructions and rules of war for the **unbeatable introductory price of £9.95!** [N.B. When ordering be sure to specify the correct order number, dependent upon the type of machine – ZX81 or Spectrum – that you own.]

With our Special deal you can't go wrong:

- ★ FREE offer every time [this time it's a free blank C20 cassette with every two programs ordered]
- ★ A replacement guarantee if you're not entirely satisfied with the quality of your purchase – that's how confident we are!

All you have to do is look at our new HOT selection – then order quickly to benefit from the introductory prices of our new games of skill, intelligence and excitement [fast delivery is another of our specialities – so you could be using these new programs SOON]

FREE BLANK C20 COMPUTER CASSETTE WITH EVERY TWO CASSETTES YOU ORDER!

Remember there's no limit to the number of free cassettes you receive if your order justifies them — so why not get together with friends or user group members and share the freebies?

GUARANTEE

Order with complete confidence. If you are not entirely satisfied with the quality of your purchase – return it to us within 7 days and we will provide a replacement

GREAT VALUE! TREMENDOUS SELECTION! PLUS A FREE OFFER EVERY TIME!

Fill in the order form right away — we're guaranteeing fast delivery, quality and satisfaction [after all, we want you to come back for more!]

The Software Workshop, Yew Tree, Selborne, Hants GU34 3JP

Here's a whole NEW selection of the latest games, the best-value software for your ZX-81 or Spectrum.

ZX81 Software

1-01 **Stock Market**
Buy and sell your way to millions! 16K RAM — **£3.95**

1-02 **Football League**
First division fun for the soccer enthusiast. 16K RAM — **£3.95**

1-03 **Test Match**
Match your wits alongside the superstars. 16K RAM — **£3.95**

1-11 **Arcade Action**
Overtaker/Missile Man/Space Fighter/Pilot/Greedy Gobbler/Extra Terrestrial. 1K — **£4.95**

1-12 **Avenger**
Avoid missiles and bombs to become the ruler. 16K RAM — **£4.95**

1-13 **Protector**
Defend your own ship from oncoming attackers. 16K RAM — **£4.95**

1-21 **Football Manager**
Manage your team through a hectic league season! 16K RAM — **£5.95**

Spectrum Software

2-12 **Avenger**
(See 1-12 under ZX81). 48K RAM — **£4.95**

2-13 **Sentinel**
Guard your mother ship against alien attacks. 48K RAM — **£4.95**

2-14 **Meteor Storm**
Spectrum version of the ever-popular arcade game. 16K or 48K RAM — **£4.95**

2-15 **Star Trek**
Popular space program brought to life by excellent graphics. 48K RAM — **£4.95**

2-21 **Frogger**
Manoeuvre the frog across the road avoiding heavy traffic. 48K RAM — **£5.95**

2-22 **Crazy Balloons**
Guide the balloons round the maze without bursting. 48K RAM — **£5.95**

2-23 **Arcadia**
The expert's version of the popular 'Invaders' game. 16K or 48K RAM — **£5.95**

2-24 **Golf**
The finest of golf handicap games. 48K RAM — **£5.95**

2-25 **Test Match**
More exciting than the real thing! 48K RAM — **£5.95**

2-26 **Derby Day**
This favourite has to be a winner. 48K RAM — **£5.95**

2-27 **Rescue**
Rescue the Princess from marauding patrols. 48K RAM — **£5.95**

2-28 **The Orb**
Discover the Orb in the depths of the temple but watch the monsters. 48K RAM — **£5.95**

2-29 **Jackpot**
The harmless way to take on the one-armed bandit. 48K RAM — **£5.95**

2-31 **Football Manager**
See 1-21 under ZX81. 48K RAM — **£6.95**

To: The Software Workshop, Yew Tree, Selborne, Hants GU34 3JP

I wish to order the following programs. I understand that:

* I will receive a FREE blank cassette with every 2 programs ordered
* I can return products within seven days if not entirely satisfied and receive a replacement.

Ref No	Qty	Title	Price

Postage, packing and handling: add 45p for the first cassette, and 25p for each additional cassette. Non-UK orders add extra 50%

SOFTWARE WRITERS

If you write programs for the Spectrum or ZX81, are you being paid what you are worth?

Having written a program which you think has potential, what then? Send it to a software house and hope they are honest? Market it yourself and risk thousands of pounds? Put it away in a drawer?

We are a professional marketing company, interested only in obtaining the highest rewards for software writers. We are not connected with any hardware or software manufacturers and deal with writers in total honesty. Most importantly, we can secure deals for them, worldwide, which are way ahead of anything they could negotiate themselves.

If you have written a program, for any Sinclair computer, which you think could be commercial, send it to us on tape for evaluation. We will advise you, free and without the slightest obligation, on the commercial prospects for your program.

NEW

THE ARCADIAN

16/48K SPECTRUM

includes games to suit all ages, from 5 to 105

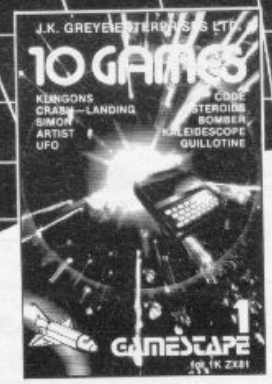
INVASION: Our version of the Classic Arcade Game, surely one of the best around. Includes Full Colour High Res. Graphics, Sound and it's incredibly fast at the end.

KAMIKAZE: If you like Scramble, you'll love this. 16 levels (long ones at that), of tortuously twisting caverns, Missiles, Starmines (which move in between games, so it's never the same next time around), Bases, Fuel Dumps (watch you don't run out of fuel!), and two speeds (difficult and impossible). Definitely a game for those amongst you with a suicidal tendency, when playing games, because you can score even when you crash! (If you can make it past level 8, write and let us know, 'cause that's as far as we've managed!).

MINEFIELD: A totally new game, in which you have to lay mines in a forest. Sounds simple doesn't it? But, once you start, you can't stop and there lies the rub (or to be more exact the explosion!). Guaranteed to get your fingers in a twist!

UFO: Dodge the Asteroids, blast the Alien Craft and work off your aggressive instincts on the keyboard. Gets progressively more difficult the longer you last!

All of these for only **£4.95**



GAMESTAPE 1

1K ZX81

10 Games incl. ASTEROIDS, UFO, CODE, BOMBER, GUILLOTINE, KALEIDESCOPE, etc.

PROBABLY THE BEST VALUE 1k TAPE AVAILABLE. We've done it 1k, games which some of our competitors require 16k to do!

only **£3.95**

GAMESTAPE 2

16K ZX81

***STARFIGHTER** Superb machine code Space Battle, set against a background of twinkling stars, with stunning explosions - if you can hit the enemy!

PYRAMID Can you move the Pyramid? Make a mataka and it will collapse! A thinkers game.

ARTIST The ultimate Graphic Designers aid. 8 Directions, 10 Memories, SAVE, COPY, RUBOUT, CLS, etc.

only **£3.95**

GAMESTAPE 3

16K ZX81

***CATACOMBS** A Multi-Level Graphics Adventure. Each level can contain up to 9 Rooms, 8 Passages, 7 Monsters, Food, Gold, Traps, Phantoms, an Exit (to the next level), and there's an infinite number of levels.

NOTE ...This is NOT one of the necessarily limited text Adventures as sold elsewhere.

"An excellent addictive game which will keep you amused for hours" ...COMPUTERS & VIDEO GAMES

only **£4.95**

3D VORTEX

16/48K SPECTRUM

After a succesful warp transfer, you drop your craft below light speed, only to discover your are caught in the irresistible gravity well of a giant Neutron Star. You are dragged past the Event Horizon, and then the fun really begins! Gravitic Tidal pressures have created a mind boggling Vortex through the tortured supra-matter of the Neutron Star. And guess who's caught in it? The onboard Navigational Computer copes for a while, but what mere machine can withstand the awesome forces inherent in such an anomaly. Soon the Nav. Com. will cease functioning, and then (of course), it's all down to you.

Are you capable of "seat of the pants" flying, it won't be easy? Not only does the Vortex twist and turn, like some demented worm, but your Tau-Sigma Shield will only withstand 10 contacts with the boundary layer. And, as if that wasn't enough, you have to dodge, or laser, the Octoplasms, Droids and Sirius Class Battlestars. Best of luck! You'll need it!

Features ...
Stunning 3D Graphics.
Full Sound Effects.
High Speed Machine Code Animation.
Full instructions.
Choose your own Control Keys.
Compatible with most Joysticks.

only **£5.95**

If you prefer to see before buying, our range of Gamestapes are stocked by W.H. Smith, John Menzies and good computer stores Nationwide.

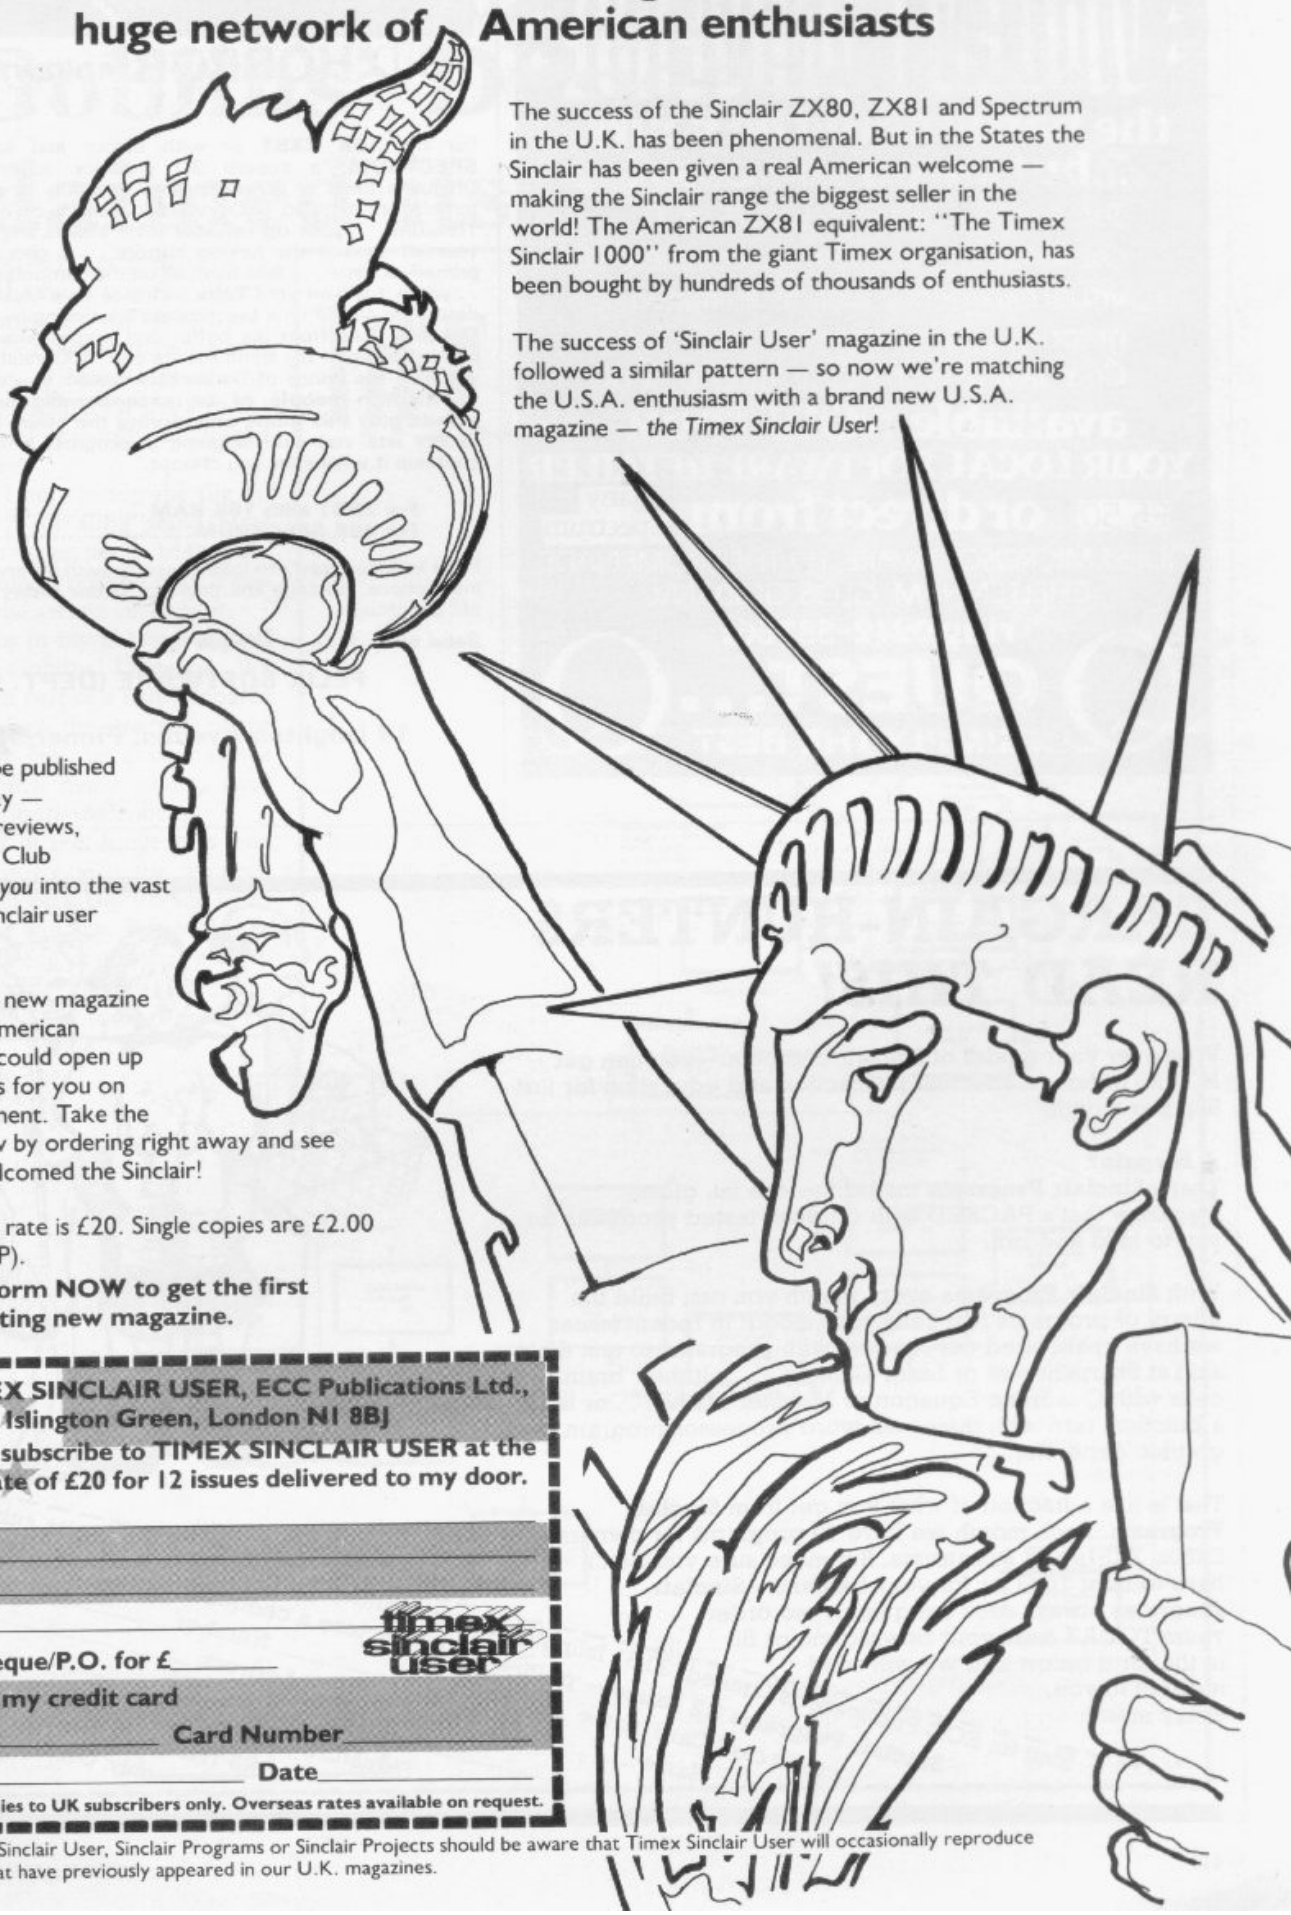
Now you can take a new

AMERICAN look at your Sinclair!

With the new Timex Sinclair User magazine to link YOU into a huge network of American enthusiasts



The success of the Sinclair ZX80, ZX81 and Spectrum in the U.K. has been phenomenal. But in the States the Sinclair has been given a real American welcome — making the Sinclair range the biggest seller in the world! The American ZX81 equivalent: "The Timex Sinclair 1000" from the giant Timex organisation, has been bought by hundreds of thousands of enthusiasts.

The success of 'Sinclair User' magazine in the U.K. followed a similar pattern — so now we're matching the U.S.A. enthusiasm with a brand new U.S.A. magazine — *the Timex Sinclair User*!

The first issue will be published in the U.S.A. in May — packed with news, reviews, programs and User Club information to link *you* into the vast American Timex Sinclair user network.

Remember, this is a new magazine written from the American viewpoint — but it could open up whole new horizons for you on your Sinclair enjoyment. Take the new, American view by ordering right away and see how the U.S.A. welcomed the Sinclair!

Annual subscription rate is £20. Single copies are £2.00 each (including P & P).

Fill in the order form NOW to get the first issues of this exciting new magazine.

Send to: TIMEX SINCLAIR USER, ECC Publications Ltd., 30-31 Islington Green, London N1 8BJ

BARGAIN-HUNTERS READ *THIS!*

Whatever your model of Sinclair computer—you can get HOURS of fun, intellectual satisfaction and education for just 95p per month!

A bargain?
That's **Sinclair Programs** magazine—the fat, glossy magazine that's PACKED with original, tested programs for you to load and run.

With **Sinclair Programs** every month you can build the library of programs that suits your mood: in recent issues we have challenged our readers with programs to test their skill at Sharpshooter or Laser Cannon . . . jolt their brain cells with Quadratic Equation or Monster Maths . . . or take a practical turn with their own word processor program or graphic generator.

That is just a fraction of what you get from **Sinclair Programs**. Each month we have 40 programs for owners of ZX80s, ZX81s and Spectrums. But make sure you don't have to hunt TOO far for your bargains—**Sinclair Programs** always sells out quickly, so order yours TODAY from your newsagent, or fill in the form below and we will send it direct to you, every month.

Mail to: ECC Publications Limited, 30-31 Islington Green, London N1 8BJ Yes — I'd like to subscribe to **Sinclair Programs** (12 issues — price £13.20) I enclose a cheque for £ ____ Please charge my credit card Card: name ____ Number ____ Address ____ Name ____ Signature ____ Date ____

NB This offer applies to UK subscribers only. Overseas rates available on request.

Following his last article about The Hobbit, Quentin Heath has received many pleas for help. He makes his last visit to Middle Earth.

Goblins' Dungeon has claimed its last victim

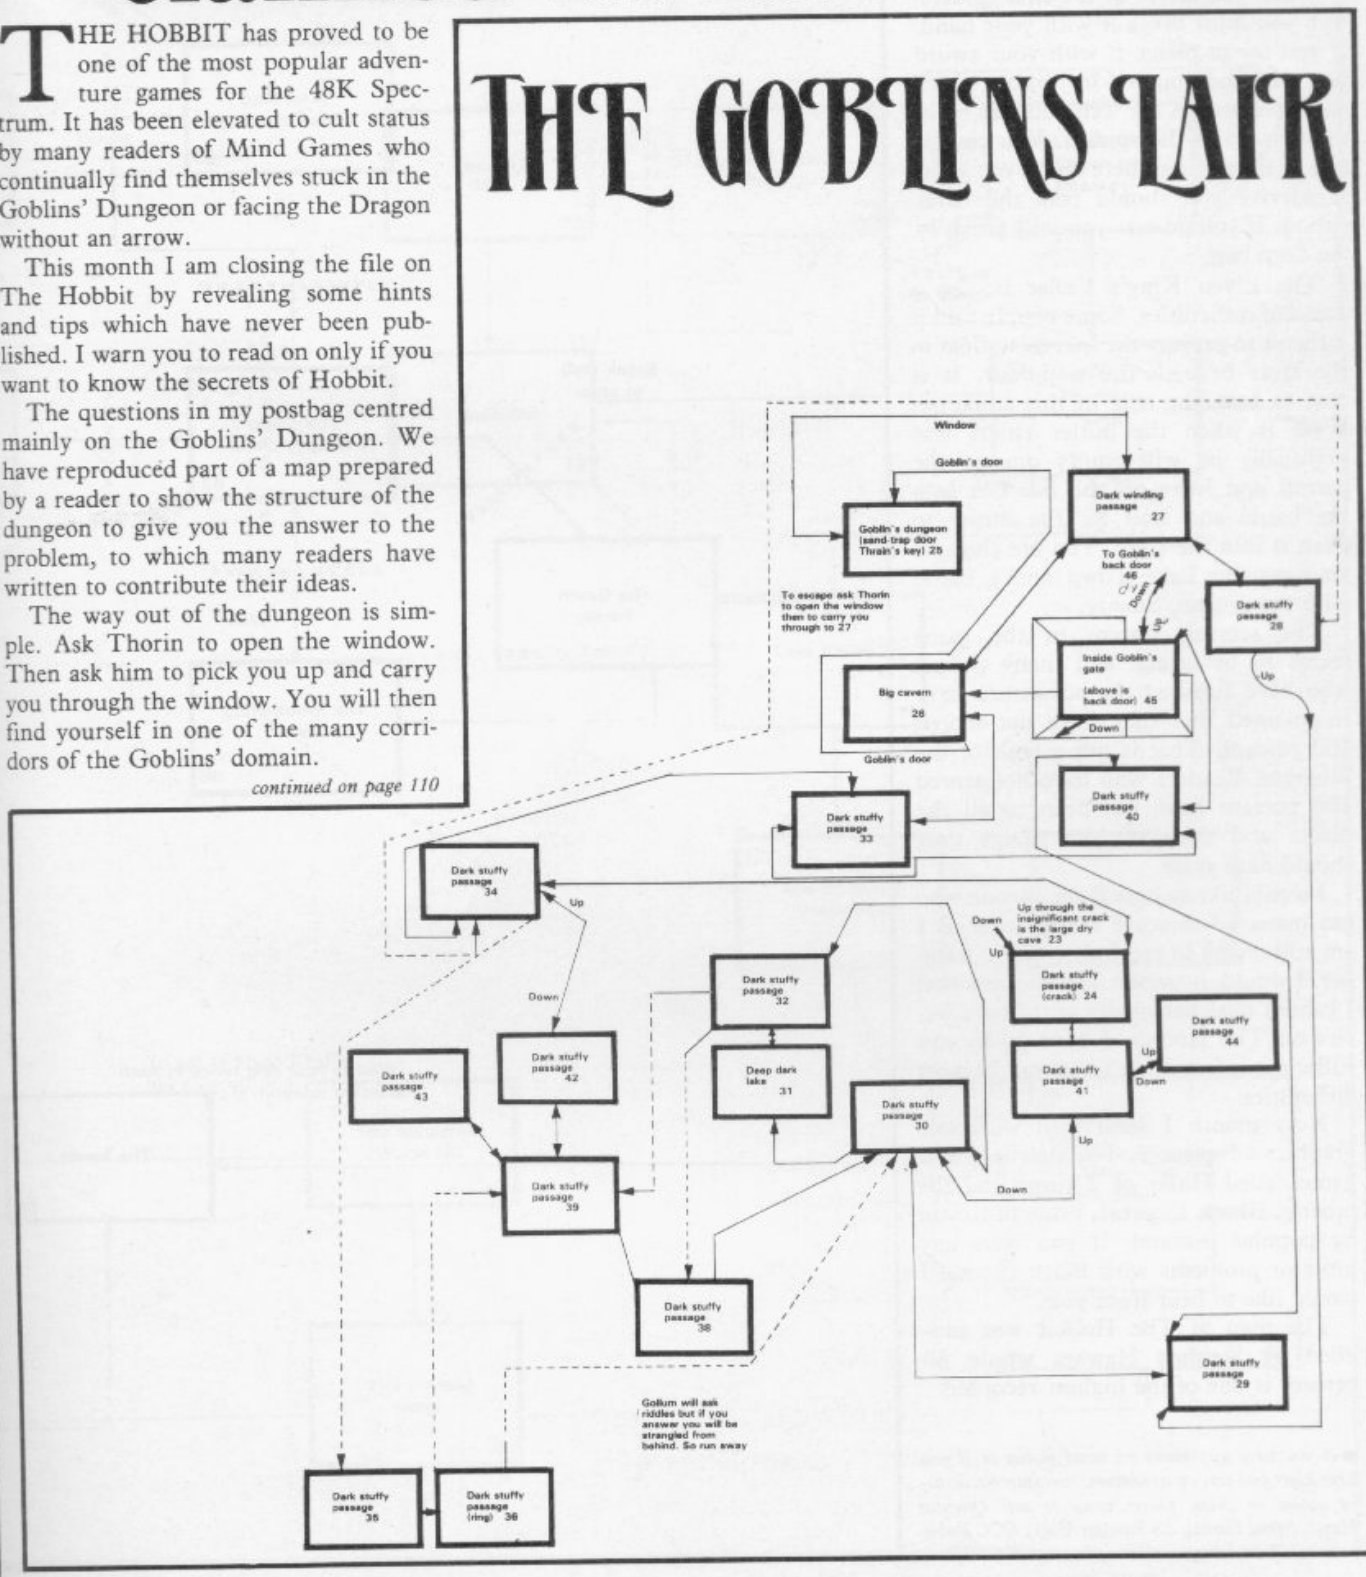
THE HOBBIT has proved to be one of the most popular adventure games for the 48K Spectrum. It has been elevated to cult status by many readers of Mind Games who continually find themselves stuck in the Goblins' Dungeon or facing the Dragon without an arrow.

This month I am closing the file on The Hobbit by revealing some hints and tips which have never been published. I warn you to read on only if you want to know the secrets of Hobbit.

The questions in my postbag centred mainly on the Goblins' Dungeon. We have reproduced part of a map prepared by a reader to show the structure of the dungeon to give you the answer to the problem, to which many readers have written to contribute their ideas.

The way out of the dungeon is simple. Ask Thorin to open the window. Then ask him to pick you up and carry you through the window. You will then find yourself in one of the many corridors of the Goblins' domain.

continued on page 110



continued from page 117

Some people have not tried to cross the river and doubled back to the forest gate. There is a boat hidden on the other side of the river and all you have to do is to throw the rope across, pull the boat through the water and climb into it.

You will then find yourself on the east bank and about to face those deadly spiders looking for a quick snack.

When you arrive at the first spiders' web you must break it with your hand. If you try to pierce it with your sword you will find yourself in trouble. Once you have broken the web you will be in the domain of the spiders. You can go east or north from there but if you want to survive you should take the latter option. If you go east you will finish in the deep bog.

The Elven King's Cellar is also a cause of difficulties. Some people find it difficult to get into the barrels to float in the river beneath the trap-door. It is best to have the ring in this situation. Wear it when the butler enters and eventually he will empty one of the barrels and leave off the lid. Get into the barrel and wait for the butler to push it into the river. You are then on your way to Lake Town and a battle with the dragon, Smaug.

The scoring system in the game seems to be erratic and many people who have finished the adventure have complained that they have not scored 100 percent. That is not a fault of the program. Readers who have not scored 100 percent have not been to all the places and done all the things they should have done.

I would like to hear from anyone who has managed to score 100 percent as I am still trying to reach that magic number. I would, however, like to stress that I cannot deal personally with more letters on The Hobbit. I have given you sufficient information to get out of most difficulties.

Next month I shall deal with two graphics adventures. The first is a new game called **Halls of Things** and the other is **Black Crystal,** brought to you by popular demand. If you have any hints or problems with Black Crystal I would like to hear from you.

The map of The Hobbit was supplied by Stephen Hawkes whose 80 percent is one of the highest recorded.

● *If you have any views on mind games or if you have hints and tips on adventure, computer-moderated games or chess, please write to me: Quentin Heath, Mind Games, c/o* Sinclair User, *ECC Publications, 30-31 Islington Green, London N1 8BJ.*

COUNTEX

FASCINATING GAME FOR PRE/PRIMARY SCHOOL AGES

A fun game for young children which holds their interest while stretching their abilities to identify and count objects, recognise colours, and do simple arithmetic.

Familiar shapes, animals, transport, objects found at home etc. animated in full colour with musical accompaniments.

Graded levels of difficulty with random questions to ensure every game is different and interesting.

The scoring system rewards the child by a man leaping across a water-filled pond. Only a perfect score enables him to reach the other side and earns the accolade 'FANTASTIC'!

BORED WITH ARCADE GAMES??

—2 Addictive Simulation Games for the 48K Spectrum—

BREWERY

Bound to appeal to bored arcadists!! You are the owner of a small local Brewery. Your challenge is to effectively market your beer, expand, and become as big as Bass or Courages. But you'll need plenty of skill! The game is Menu Driven, and has many excellent features.

GANGSTERS

A superb game of strategy. You are a small-time gangster: your challenge is to make The Big Time and take control of the City . . . by hook or crook. But you'll have to watch out for the other Gangsters! Packed with super features, the game is both amusing and addictive!.

Each programme costs £5.95, and is available from:

P. BOULTON
Dept SU3, 54 Grange Road, South Harrow, Middlesex, HA2 0LW.

FIVE OF THE BEST FOR ZX SPECTRUM

MAIL ORDER ADVERTISING
British Code of Advertising Practice

Advertisements in this publication are required to conform to the British Code of Advertising Practice. In respect of mail order advertisements where money is paid in advance, the code requires advertisers to fulfil orders within 28 days, unless a longer delivery period is stated. Where goods are returned undamaged within seven days, the purchaser's money must be refunded. Please retain proof of postage/despatch, as this may be needed.

Mail Order Protection Scheme

If you order goods from Mail Order advertisements in this magazine and pay by post in advance of delivery, *Sinclair User* will consider you for compensation if the Advertiser should become insolvent or bankrupt, provided:

(1) You have not received the goods or had your money returned; and

(2) You write to the Publisher of *Sinclair User* summarizing the situation not earlier than 28 days from the day you sent your order and not later than two months from that day.

Please do not wait until the last moment to inform us. When you do write, we will tell you how to make your claim and what evidence of payment is required.

We guarantee to meet claims from readers in accordance with the above procedure as soon as possible after the Advertiser has been declared bankrupt or insolvent (up to a limit of £4,250 per annum for any one Advertiser so affected and up to £10,000 per annum in respect of all insolvent Advertisers. Claims may be paid for higher amounts, or when the above procedure has not been complied with at the discretion of *Sinclair User*, but we do not guarantee to do so in view of the need to set some limit to this commitment and to learn quickly of readers' difficulties).

This guarantee covers only advance payment sent in direct response to an advertisement in this magazine (not, for example, payment made in response to catalogues etc, received as a result of answering such advertisements). Classified advertisements are excluded.

Features include
ZX81 Repeat key and Spectrum Double shift key.
All keyboards are 'electric typewriter' quality, full size and are fully built and tested. They allow you to use all other add-ons. No extra power is needed. Fully guaranteed.
A fitting service is available for all our keyboards and costs £4.00 including postage and packing. Send for details.

KAYDE DELUXE KEYBOARD
This keyboard is only available for the spectrum. It will allow you to fit your computer inside. It also has a full sized space bar and double shift key. No soldering required. £45.00

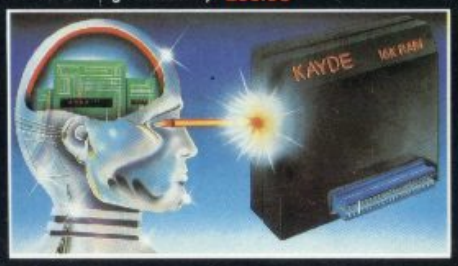
Kayde Super Plug-in Keyboard
This is the ultimate keyboard for your Sinclair computer, you simply plug it into the user port at the back. No disassembling. Complete with full-size space bar and ZX81 repeat key. £49.95

Kayde Standard Keyboard
This is used for both computers, but does not accomodate them inside the casing. Open your computer and plug in the connector. (The ZX81 requires two simple solder connections). The keyboard comes complete with high-impact black plastic case and full fitting instructions. The ZX81 has a repeat key. £30

NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW! NEW!

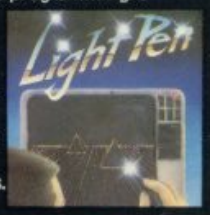
Kayde ZX81 16K RAM Pack
Low power feature allows you to use all other add-ons including ZX81 printer without wobble overheating or memory loss. You should only have to buy one RAM Pack for your ZX81 so buy the best at the beginning and save yourself unnecessary problems. £19.50

Kayde Spectrum 32K RAM Pack (Issue II)
This brings your Spectrum up to a full 48K. It is easily fitted, and comes as a kit with RAM chips that slot into existing connectors. No soldering necessary. £35.95

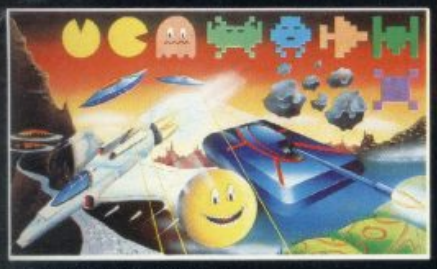


RAM Packs
All Kayde RAM Packs use state of the art technology and feature top-quality, low power memories. Housed in high-impact polysterene, they look good and are fully tested and guaranteed.

Kayde Spectrum Light Pen.
This has the ability to create pictures, sketches or graphs on your own television screen or it can be used to 'pick' from the menu saving you time over using BASIC programming statements. No knowledge of machine code programming is necessary. Each Light Pen comes complete with interface circuits mounted on a connector which plugs directly into the user port with no other connections to make and a software program with comprehensive instructions. £19.95



VALUE! VALUE! VALUE! VALUE! VALUE! VA



Kayde 4K Graphics ROM Pack
This comes complete with a pre-programmed 4K Graphics ROM to give you an extra 450 graphics. The board has facilities for either 2K of RAM (for user definable graphics) 4K of RAM or our 4K Tool Kit. The entire board fits neatly inside your computer.
A free fitting service is available on request.

4K Graphics Board	£19.95
4K Tool Kit	£9.95
2K UDG ROM and Character Generator Cassette	£10.95
16K Graphic Software Peckman	£5.95
New! Ladders	£5.95

Kayde Spectrum Sound Module
This module fits neatly inside your Spectrum and lets the sound come through the more powerful speaker on your television rather than the Spectrum. No soldering required. £9.95

Kayde BBC/Spectrum Sound Module.
This sound module plugs into the user port at the rear of your computer and requires no soldering. £12.95

Kayde Keys (VIC 20)
This program runs on just 300 bytes and yet gives you the use of function keys and characters on a VIC 20, and there are over 25 commands at your disposal. £6.95

Design/Restore (VIC 20)
A complete system to enable you to create your own characters. Also includes restore program to load characters into your VIC. Three character sets included. £9.95

Kayde Software
The Swamp
Available for VIC 20,(16K) Dragon 32, New Brain, Oric 48 and 48k Spectrum
Death stalks the Swamp at every turn. Nowhere is safe and you're on your own. You survive on your wits alone with nobody to help you. Be thankful it's only the latest game from Kayde You'll gasp with relief when you come to the end of the struggle against some of the most dangerous monsters ever programmed. You can be sorcerer, wise man, mercenary, knight or a druid. But you've got to be good. No silly problems to hinder your progress. It's just you against the swamp. £9.95

SOFTWARE WRITERS WANTED
If you want the best deal for your original programs then send a copy to us for review. We offer highest royalties, security and marketing. Don't forget to include a description of the program and for what machine it is intended.
